ANNUAL GENERAL MEETING OF THE SHAREHOLDERS

CIR S.p.A.
107th Year of Business

Milan, 26 April 2013, 1st call
Milan, 29 April 2013, 2nd call

NOTICE OF ANNUAL GENERAL MEETING

The Shareholders are invited to attend the Ordinary Annual General Meeting of the Shareholders on 26 April 2013 at 10.30. a.m., at the first call, at the Palazzo delle Stelline Congress Centre, Corso Magenta 61, in Milan and, if necessary, at the second call on 29 April 2013, same time and place, to discuss and pass resolution on the following

AGENDA

1. Annual Report and Financial Statements for the year ended 31 December 2012. Resolutions on the same.
2. Re-determination of the number of members of the Board of Directors and appointment of the same.
3. Appointment of an Alternate Auditor.
4. Proposal to cancel the resolution of 27 April 2012 regarding the authorization to buy back and dispose of own shares and proposal for a new authorization.
5. Compensation Report.
6. Proposal to approve Stock Grant Plan 2013.

INFORMATION ON THE SHARE CAPITAL

The share capital amounts to € 396,670,233.50 and consists of 793,340,467 ordinary shares each with a nominal value of € 0.50.

As of the date of publication of this notice, the Company owns 49,989,000 of its own shares for which voting rights are suspended.

ATTENDING THE SHAREHOLDERS' MEETING IN PERSON AND IN PROXY

Entitlement to take part in the Meeting and exercise a vote is attested by a notification – made by an authorized intermediary as per the terms of Art. 22 of Joint Consob-Bank of Italy Measure of 24 December 2010 – in favour of the individual who has the right to vote based on evidence available at the close of business Wednesday 17 April 2013, i.e. the seventh trading day preceding the date fixed for the first call of the Shareholders' Meeting. Any persons who have entitlement only after that date will not have the right to attend or vote at the Meeting.

To make it easier to check their entitlement to take part in the proceedings of the Meeting, participants are requested to show their copy of the notice made to the Company which the authorized intermediary, in accordance with current regulations, is required to make available to them.

Any holders of shares that have not yet been dematerialized should first present their share certificates to an authorized intermediary for input into the centralized clearing system in electronic form, in accordance with the provisions of Article 17 of Joint Consob / Bank of Italy Measure of 24 December 2010, and should request that the notification be sent in as above.

Persons with voting rights can appoint a proxy to represent them at the Shareholders' Meeting in accordance with Art. 2372 of the Civil Code and with any other rules or regulations applicable. The proxy form at the bottom of the notification issued by the authorized intermediary may be used or

alternatively there is a proxy form which can be downloaded from the company website www.cirgroup.it in the section Governance. The proxy form can be sent by registered post with advice of receipt (A.R.) to the Company's Registered Office or, alternatively, may be sent to the certified e-mail address segre@legalmail.it. In accordance with legislation on the subject, Shareholders can appoint as proxy, without incurring any charges, Studio Segre S.r.l. as the Representative Designated by the Company as per the terms of Art. 135-*undecies* of D.Lgs no. 58/1998 and subsequent amendments and additions ("TUF"). The proxy is appointed by signing the appropriate form available in the above-mentioned section of the website. The signed document must be sent to the Designated Representative, Studio Segre S.r.l. – Via Valeggio, 41 – 10129 Turin, by registered post with advice of receipt (A.R.) or sent by e-mail to the certified address segre@legalmail.it, by the end of the second trading day before the date fixed for the Shareholders' Meeting even at the second call (i.e. by Wednesday 24 April 2013 or Thursday 25 April 2013 for the second call). The proxy is not valid for the motions for which no voting instructions have been given. The proxy and the voting instructions are revocable until the dates by which they were given. The notice sent to the company by the authorized intermediary attesting the Shareholder's entitlement to attend the meeting is needed even when the Designated Representative of the company is appointed as proxy. Therefore, in the absence of the above-cited notification the proxy will not be valid.

RIGHT TO ASK QUESTIONS ON THE ITEMS ON THE AGENDA

Shareholders who wish to ask questions regarding the items on the Agenda of the Shareholders' Meeting may send their questions by registered post with advice of receipt (A.R.) to the Company's Registered Office or by certified e-mail to the address segre@legalmail.it attaching the certification issued by an authorized intermediary proving that they are entitled to exercise this right. Questions must reach the company by the close of the third trading day preceding the date fixed for the first call of the meeting, i.e. by the close of 23 April 2013. The company will give its response during the Shareholders' Meeting at the latest. Questions with the same content will receive a single response.

ADDITIONS TO THE AGENDA AND PRESENTATION OF NEW RESOLUTION PROPOSALS

As per the terms of Art. 126-*bis* of the TUF, Shareholders representing even jointly at least one fortieth of the share capital may request, within ten days of the publication of this notice, an addition to the items on the Agenda to be dealt with, indicating in their request the further items proposed, or they may submit proposed resolutions on subjects already on the Agenda. It should be remembered, however, that any such addition is not allowed for the items on which the Shareholders, as per the terms of the law, vote on a proposal made by the directors or on a plan or a report prepared by the same, other than those included in Art. 125-*ter*, paragraph 1 of the TUF. Requests should be made by registered post with advice of receipt (A.R.) to the Registered Office of the Company or by certified e-mail to the address segre@legalmail.it and must be accompanied by a report on the subject being put forward as well as by the certification(s) issued by an authorized intermediary attesting the person's entitlement to exercise this right.

RE-DETERMINATION OF THE NUMBER OF MEMBERS OF THE BOARD OF DIRECTORS AND APPOINTMENT OF THE SAME

In relation to the second item on the Agenda, it should be noted that, as per the terms of Art. 147-*ter* of the TUF and Art. 8 of the Company Bylaws, the Directors are appointed by the Shareholders' Meeting on the basis of lists presented to the Shareholders in which the candidates are listed in numerical order.

Only Shareholders who alone or together with other Shareholders represent at least 2.5% (two point five per cent) of the share capital can present lists of candidates. The lists, signed by the Shareholder or the Shareholders who are presenting them, or even by one of them delegated by the others to do so, and accompanied by the required documents, must be delivered by the Shareholders presenting them to the registered office of the company or sent to the certified e-mail address segre@legalmail.it by 1 April 2013 and will be published in accordance with current regulations. Since this date is a public holiday, lists will be accepted by fax to the number 02 72270326 provided that they are then delivered to the Company Headquarters by 2 April 2013.

A Shareholder cannot present or vote for more than one list, even through an intermediary or a fiduciary company. Nobody can be a candidate in more than one list and acceptance of candidature in more than one list means that that person cannot be elected. Lists which include a number of candidates equal to or higher than three must include candidates belonging to both genders, in at least the proportion specified in current legislation on the subject of gender balancing.

Candidates who intend to present lists are invited to consult the recommendations contained in Consob Communiqué DEM/9017893 of 26 February 2009.

The lists must be accompanied by:

- The information relating to the identity of the Shareholders who have presented them, with an indication of the percentage of their total shareholding interest and with one (or more) certificate(s) to be delivered to the Registered Office at the same time or, in any case, by 5 April 2013 at the latest; this information should show the entitlement of the shareholder(s) as of the date on which the lists were presented;
- A declaration by Shareholders other than those holding, even jointly, a controlling interest or a relative majority, that they have no connection with them as indicated by current legislation and regulations on this subject;
- An exhaustive description of the personal and professional characteristics of the candidates together with a declaration made by the same candidates that attests that they possess the requisites required by current regulations and by the Company Bylaws and in which they give any activities that they carry out in competition with the Company and accept their candidature. Candidates for the position of Director must possess the requisites required mandatorily by current regulations.

When only one list is presented or accepted for the vote, all the Directors are taken from that list. In the event that no lists are presented or that fewer Directors are elected than the number determined by the Shareholders' Meeting, then the same Shareholders must be reconvened in order to appoint the full Board of Directors. Any lists presented that do not comply with the instructions as above are considered as not having been presented.

APPOINTMENT OF AN ALTERNATE AUDITOR

With reference to the third item on the Agenda, which has the aim of making up the full number of the Board of Statutory Auditors, it should be noted that the appointment of an alternate auditor will, as per the terms of Art. 2401 of the Civil Code, take place without application of the list vote.

DOCUMENTATION

The documentation relating to the items on the Agenda, as set out in current legislation, which includes, among other things, the complete text of the proposed resolutions, is available to the public as per the terms of the law at the Company's Registered Office (in Milan, Via Ciovassino 1) and is also available on the Company website www.cirgroup.it in the section Governance. Shareholders may obtain a copy of the documentation.

The Company Bylaws are available on the Company website www.cirgroup.it in the section Governance.

THE BOARD OF DIRECTORS

LETTER TO THE SHAREHOLDERS

Dear Shareholders,

2012 was a year defined by the presence of a new and deep recession in Italy and other European countries in an economic climate that is, in some ways, worse than that of the crisis of 2009. This scenario which looks as if it will continue in 2013 too, affected the results of the whole group and particularly those of the two main businesses active in the domestic market, which have already been up against important structural discontinuities in their respective sectors.

In the energy business Sorgenia has to operate in a market negatively impacted by a production overcapacity due to the sharp fall in consumption in recent years and a liberalization process that in many ways is still incomplete, especially in the gas sector. Despite the signs of recovery reported in the fourth quarter of the year, the company recorded a significant loss in 2012 (due partly to a writedown of assets, in line with what many utilities have done or are doing in Italy and in Europe), which had a negative effect on the net result of the Cir group. The company has begun a series of efficiency enhancing actions and has been selling off non-strategic assets with the aim of reducing debt and recouping profit margins.

In the media sector, the Espresso group is facing a “perfect storm”, characterized by an unprecedented crisis in advertising and a structural fall in printed newspaper circulation, which is not sufficiently compensated by the continuing growth of the digital business. In a very negative scenario for the sector, Espresso nonetheless obtained significantly better results than those of its main competitors and closed the year with net income of over 20 million euro, generating a healthy cash flow.

Sorgenia and Espresso are facing significant challenges in the sectors in which they operate, but despite the complexity of the situation, I have confidence in both companies, in their people and in the positioning they have achieved in their respective markets over the years.

The environment is more stable in the third largely domestic business of the group, healthcare, where KOS has been continuing to grow in recent years in the healthcare and care-home sector in the centre and north of Italy, leveraging in particular the good quality of its services. The company has also launched some new initiatives in managing diagnostic and therapeutic technologies in India with the objective of selectively internationalizing its business.

In the automotive components sector, despite the strong decline in the sector at the European level and the signs of a slowdown in Brazil, Sogefi benefited from its expansion in other international markets, starting with Asia and North America, and from its acquisition of Systèmes Moteurs in the second half of 2011. Non-European countries today make up around 1/3 of Sogefi's total revenues. In 2012, in particular, the company made new investments to increase its production capacity in India. The commitment of the company will be directed towards continuing growth in the markets with the best prospects, exploiting the quality of its products and its technological know-how.

Some of the positive aspects of 2012 were the good result achieved by the financial investments of the group, the fact that a positive financial position was maintained at holding level and the increase in net income at the parent company of the group, Cir SpA. The Board of Directors Meeting nonetheless decided to put forward the proposal to the AGM that no dividends be distributed given the negative result at group level and the need to preserve the sound financial structure of Cir in this moment of uncertainty at the macroeconomic level. This was a difficult decision for a group that puts

the interests of you Shareholders at the centre of our activity, but we are convinced that it was the right decision to take.

In 2013 our main priorities will be to concentrate on the four main business activities of the group, with particular focus on energy and media, and to continue to pursue operating efficiencies while still making investments in the areas or sectors with the best return opportunities. The signals coming from the economy are not particularly optimistic but we believe that in the medium term the group has the potential to return to value creation for all of you Shareholders. We are all committed to this objective.

2013 will be a year of great change for the group. As you are aware, a few months ago my father Carlo De Benedetti, in an act of great generosity without precedent in Italy, decided to transfer the control of the group to my brothers and me, without return consideration. For us it is an honour but also an important responsibility that we accept with commitment, enthusiasm and gratitude. Our company owes its existence to his passion and his intuition. Our father will remain an important point of reference for the group.

After these changes in the control structure of the group, I will become executive chairman of Cir while Monica Mondardini, maintaining her position at Espresso after the excellent work she has done, will take on the position of chief executive of our company as well. I feel that this choice is an important one that will strengthen the top management structure of the Cir group, having had the opportunity to appreciate the great personal and professional qualities of Monica in the four years she has been working for Espresso. I would also like to take the opportunity to thank Stefano Micossi, who will remain on the Board of Cir, for carrying out the role of non-executive chairman for the last four years in which he made an important contribution to the evolution of the corporate governance of our company.

I have always been a keen supporter of the positive value of change and I am certain that our new ownership and top management structure will stimulate ideas, talents and a renewed commitment to meet the complex challenges that await us and to look forward with confidence to the future development of the group.

Signed by
The Chief Executive Officer
Rodolfo De Benedetti

ANNUAL REPORT

REPORT ON OPERATIONS

Dear Shareholders,

In 2012 the CIR Group made a consolidated net loss of € 33.1 million compared with consolidated net income of € 9.7 million in 2011.

The contribution made by the four main operating subsidiaries was negative for € 38.1 million compared with a positive one of € 59.4 million in 2011, mainly due to Sorgenia's heavily negative contribution of € 70.3 million (positive for € 8.1 million in 2011), penalised, in particular, by asset write-downs in relation to the difficult economic environment and changes in the regulatory framework. Despite the recession, Espresso, Sogefi and KOS together made a positive contribution of € 32.2 million.

The result of CIR and the financial holding companies was positive for € 8.6 million (negative for € 24.7 million the previous year), having benefited from the positive result of financial management (€ 45.2 million) and from the private equity investments (€ 9.6 million), versus financial expenses of € 31.5 million (including the figurative statutory interest being set aside on the proceeds of the "Lodo Mondadori" case).

In 2012 the CIR Group had revenues of € 5,063 million, an increase of 11.9% on 2011 (€ 4,522.7 million). The difference is due to higher sales of electricity by Sorgenia and an increase in turnover by the Sogefi group, mainly thanks to the acquisition in August 2011.

The Group suffered a significant decline in profit margins in 2012 due to the poor performance of Sorgenia and, to a lesser extent, of Espresso. EBITDA came to € 308.1 million, 34.3% down on 2011 (€ 468.6 million).

The CIR Group consists of the following business sectors: energy (electricity and gas), media (publishing, radio, Internet and television), automotive components (systems, engine and suspension components), healthcare (care homes, rehabilitation centres and hi-tech services) and non-core investments (private equity, venture capital and other investments).

In the energy sector the Sorgenia Group had revenues of € 2,572.3 million, a 21.3% increase on 2011 (€ 2,120.3 million) and EBITDA before write-downs of € 101.4 million, 47.3% down on 2011 (€ 192.2 million). The results for the year, heavily affected by the asset write-downs in line with various other Italian and European utilities, reflect the downward trend in electricity demand due to the recession and the high cost of gas-fired power plants. The net result, which was negative for € 196.8 million, was mainly affected by asset write-downs of € 134.3 million (in renewables, E&P, thermal and certain tax credits) compared with consolidated net income of € 15.6 million in 2011. Sorgenia is continuing with the measures taken to combat the recession and the market crisis, concentrating on two main objectives: debt reduction and margin recovery, thanks to asset disposals, cutting costs, renegotiating the gas contract and growth in the residential sector.

In the media sector, with the publishing market badly hit by the crisis and suffering from a 14.3% decline in advertising expenditure in 2012, the Espresso group closed the year with revenues of € 812.7 million, a drop of 8.7%, but outperforming the market in terms of advertising revenues (-10.9%). The consolidated operating result (EBIT) fell to € 60.4 million (€ 122.5 million in 2011) and net income was € 21.8 million compared with € 60.6 million the previous year.

The Sogefi group in 2012 had revenues of € 1,319.2 million, a 13.9% increase on the previous year. Despite the car crisis in Europe, sales benefited from the growth in non-European markets and the contribution made by Systèmes Moteurs. EBITDA for the year came to € 126 million (+12.7%) and net income amounted to € 29.3 million (+22%).

The KOS group had consolidated revenues in 2012 of € 355.4 million (+1.7%) and EBITDA of € 53.4 million, compared with € 52.2 million in 2011, with net income of € 12.1 million, compared with € 8.9 million the previous year.

Bear in mind that following the Milan Court of Appeal's sentence deposited on 9 July 2011 which condemned Fininvest to pay compensation for the damages caused by bribery in the "Lodo Mondadori" case, on 26 July 2011 CIR received a total of € 564.2 million from Fininvest, including legal expenses and interest. In accordance with international accounting standards (IAS 37), this amount has not had any impact, nor will, on the Group's income statement until the final appeal has been decided. This higher amount of cash, which is offset in the financial statements by an equivalent liability, does not have any effect on the Group's financial strategy, which is based on prudence and caution, at a time when financial markets are particularly complex. This amount has in fact been invested, some in the short term (cash deposits and money market funds through CIR S.p.A.), some in the medium term (bonds through Cir Investimenti S.p.A., a wholly-owned subsidiary, formerly called Dry Products). The yield on these investments is more or less in line with the statutory interest being accrued.

The charts on the following pages show a breakdown by business sector of the economic and financial results of the Group, a breakdown of the contribution made by the main subsidiaries and the aggregate results of CIR, the parent company, and the other holding subsidiaries (CIR International, CIGA Luxembourg and CIR Investimenti)

(*) The financial position includes cash and cash equivalents of Sorgenia Holding S.p.A.

(**) Certain amounts of the period ended 2011 were redetermined after the conclusion of the Purchase Price Allocation process of Systèmes Moteurs S.A.S..

(1) This item is the sum of "intangible assets", "tangible assets", "investment property", "investments in companies consolidated at equity" and "other equity investments" in the consolidated statement of financial position.

(2) This item is the sum of "other receivables", "securities" and "deferred taxes" under non-current assets and of "other payables", "deferred taxes", "personnel provisions" and "provisions for risks and losses" under non-current liabilities in the consolidated statement of financial position. This item also includes the "assets held for disposal" and "liabilities associated with assets held for disposal" in the consolidated statement of financial position.

(3) This item is the sum of "inventories", "contract work in progress", "trade receivables" and "other receivables" under current assets, and of "trade payables", "other payables" and "provisions for risks and losses" under current liabilities in the consolidated statement of financial position.

(4) This item is the sum of "financial receivables", "securities", "available-for-sale financial assets" and "cash and cash equivalents" under current assets, of "bonds" and "other borrowings" under non-current liabilities, and of "bank overdrafts", "bonds" and "other borrowings" under current liabilities in the consolidated statement of financial.

1. PERFORMANCE OF THE GROUP

Consolidated revenues for 2012 amounted to € 5,063 million compared with € 4,522.7 million in 2011, an increase of € 540.3 million (+11.9%).

Consolidated revenues can be broken down by business sector as follows:

<i>(in millions of euro)</i>	2012	%	2011	%	Change absolute	%
Energy						
Sorgenia Group	2,572.3	50.8	2,120.3	46.9	452.0	21.3
Media						
Espresso Group	812.7	16.1	890.1	19.7	(77.4)	(8.7)
Automotive components						
Sogefi Group	1,319.2	26.1	1,158.4	25.6	160.8	13.9
Healthcare						
KOS Group	355.4	7.0	349.6	7.7	5.8	1.7
Other sectors	3.4	-	4.3	0.1	(0.9)	-
Total consolidated revenues	5,063.0	100.0	4,522.7	100.0	540.3	11.9
of which: ITALY	3,469.6	68.5	3,266.9	74.2	202.7	6.2
OTHER COUNTRIES	1,593.4	31.5	1,255.8	27.8	337.6	26.9

The **condensed consolidated income statement** is as follows:

<i>(in millions of euro)</i>	2012	%	2011	(*)	%
Revenues	5,063.0	100.0	4,522.7		100.0
Consolidated EBITDA (1)	308.1	6.1	468.6		10.4
Consolidated EBIT	60.3	1.2	255.2		5.6
Financial management result (2)	(105.5)	(2.1)	(134.9)		(3.0)
Income taxes	(29.7)	(0.6)	(57.7)		(1.2)
Net result including minority interests	(74.9)	(1.5)	62.6		1.4
Minority interests	41.8	0.8	(52.9)		(1.2)
Net result of the Group	(33.1)	(0.7)	9.7		0.2

1) This is the sum of "earnings before interest and taxes (EBIT)" and "amortisation, depreciation and write-downs" in the consolidated income statement.

2) This is the sum of "financial income", "financial expense", "dividends", "gains from trading securities", "losses from trading securities" and "adjustments to the value of financial assets" in the consolidated income statement.

(*) Certain 2011 figures have been restated following the Sogefi Group's completion of the Purchase Price Allocation in connection with Systèmes Moteurs S.A.S..

Consolidated EBITDA in 2012 came to € 308.1 million (6.1% of revenues) compared with € 468.6 million in 2011 (10.4% of revenues), a decrease of € 160.5 million (-34.3%). The reduction in margins, despite the increase recorded by Sogefi, is primarily attributable to the lower profitability of Sorgenia and Espresso due to the downturn in Italian economy. Sorgenia's results were also affected by write-downs related to equity investments which are consolidated using the equity method.

Consolidated EBIT in 2012 amounted to € 60.3 million (1.2% of revenues), compared with € 255.2 million (5.6% of revenues) in 2011, a decrease of € 194.9 million.

The net result of financial management, negative for € 105.5 million (negative for € 134.9 million in 2011), was brought about by net financial expenses of € 125.1 million (€ 119.2 million in 2011), dividends and net gains on trading and the valuation of securities of € 10.7 million (€ 9.2 million in 2011) and positive adjustments to the value of financial assets for € 8.9 million (negative for € 24.9 million in 2011).

The **condensed consolidated capital structure of the CIR Group** at 31 December 2012, with comparative figures at 31 December 2011, is as follows:

<i>(in millions of euro) (1)</i>	<i>31.12.2012</i>	<i>31.12.2011 (*)</i>
Fixed assets	4,250.3	4,333.8
Other net non-current assets and liabilities	247.8	209.3
Net working capital	338.3	271.0
Net invested capital	4,836.4	4,814.1
Net financial debt	(2,504.4)	(2,335.1)
Total equity	2,332.0	2,479.0
Group equity	1,373.0	1,437.7
Minority interests	959.0	1,041.3

(1) These figures are the result of a different aggregation of the items in the financial statements. For a definition, see the notes to the "Consolidated statement of financial position by business sector" shown earlier.

() Certain 2011 figures have been restated following the Sogefi Group's completion of the Purchase Price Allocation in connection with Systèmes Moteurs S.A.S..*

Net invested capital at 31 December 2012 amounted to € 4,836.4 million compared with € 4,814.1 million at 31 December 2011, a net increase of € 22.3 million, mainly due to amortisation, depreciation and write-downs made by the operating groups during the year, as well as the change in the Sorgenia Group's net working capital.

The **consolidated net financial position** at 31 December 2012 showed net debt of € 2,504.4 million (an increase of € 169.3 million compared with € 2,335.1 million at 31 December 2011) caused by:

- a financial surplus for CIR and the financial holding companies of € 33.2 million, which compares with € 10.8 million at 31 December 2011. The increase is mainly due to the positive balance of € 6.6 million between dividends received and paid and the positive adjustment to the fair value of portfolio securities, as mentioned previously;
- total net debt of the operating groups of € 2,537.6 million compared with € 2,345.9 million at 31 December 2011. The increase of € 191.7 million is mainly due to investments by the Sogefi and Sorgenia groups and an increase in the Sorgenia Group's working capital.

The net financial position includes shares of hedge funds, which amounted to € 84.2 million at 31 December 2012. The accounting treatment of these investments involves recognising changes in the fair value of the funds directly to equity.

The performance of these investments since inception (April 1994) through to the end of 2012 has shown a weighted average return in dollar terms of 6.6%. In 2012, the performance was a positive 5.2%.

Total equity at 31 December 2012 came to € 2,332.0 million compared with € 2,479 million at 31 December 2011, a decrease of € 147 million.

Group equity went from € 1,437.7 million at 31 December 2011 to € 1,373.0 million at 31 December 2012, a net decrease of € 64.7 million, mainly due to the distribution of dividends and the loss for the period.

Minority interests went from € 1,041.3 million at 31 December 2011 to € 959 million at 31 December 2012, a net decrease of € 82.3 million.

The notes to the financial statements explain how consolidated equity has evolved over time. The **consolidated statement of cash flows** for 2012, prepared according to a "managerial" format which, unlike the version included in the financial statements, shows the changes in net financial position rather than the changes in cash and cash equivalents, can be summarised as follows:

<i>(in millions of euro)</i>	<i>2012</i>	<i>2011 (*)</i>
SOURCES OF FUNDS		
Net result for the period including minority interests	(74.9)	62.6
Amortisation, depreciation, write-downs and other non-monetary changes	342.9	203.6
Self-financing	268.0	266.2
Change in working capital and other non-current assets and liabilities	(147.4)	(63.2)
CASH FLOW GENERATED BY OPERATIONS	120.6	203.0
Increases in capital	24.9	34.4
TOTAL SOURCES OF FUNDS	145.5	237.4
APPLICATIONS OF FUNDS		
Net investment in fixed assets	(200.7)	(121.9)
Price paid for business combinations	(6.5)	(146.5)
Net debt of acquired companies	0.5	8.3
Buy-back of own shares	(3.3)	(18.3)
Payment of dividends	(41.5)	(40.5)
Other changes in equity	(63.3)	(75.1)
TOTAL APPLICATIONS OF FUNDS	(314.8)	(394.0)
FINANCIAL SURPLUS (DEFICIT)	(169.3)	(156.6)
NET FINANCIAL POSITION AT THE BEGINNING OF THE PERIOD	(2,335.1)	(2,178.5)
NET FINANCIAL POSITION AT THE END OF THE PERIOD	(2,504.4)	(2,335.1)

() Certain 2011 figures have been restated following the Sogefi Group's completion of the Purchase Price Allocation in connection with Systèmes Moteurs S.A.S..*

A breakdown of the net financial position is given in the notes to the financial statements.

Net cash flow generated by operations amounted to € 120.6 million compared with € 203 million in 2011 and consists of self-financing of € 268 million compared with € 266.2 million in 2011, against a decrease in net working capital of € 147.4 million versus € 63.2 million the previous year. Applications of funds in 2012 amounted to € 314.8 million and include € 200.7 million relating to investments made primarily by the Sorigenia and Sogefi groups.

At 31 December 2012 the CIR Group had 13,940 employees, compared with 14,072 at 31 December 2011.

2. PERFORMANCE OF THE PARENT COMPANY

CIR S.p.A., the parent company, closed 2012 with net income of € 7.9 million, compared with € 0.3 million in 2011.

Equity at 31 December 2012 stood at € 938.8 million, compared with € 946 million at 31 December 2011.

The **condensed income statement** of CIR S.p.A. for 2012, with comparative figures from 2011, is as follows:

<i>(in millions of euro)</i>	<i>2012</i>	<i>2011</i>
Net operating costs <i>(1)</i>	(10,5)	(20,7)
Other operating costs, amortisation and depreciation <i>(2)</i>	(3,4)	(3,3)
Financial management result <i>(3)</i>	14.7	16.0
Result before taxes	0.8	(8.0)
Income taxes	7.1	8.3
Net result	7.9	0.3

(1) This item is the sum of "sundry revenues and income", "cost for services" and "personnel costs" in the income statement of CIR S.p.A..

(2) This item is the sum of "other operating costs" and "amortisation, depreciation and write-downs" in the income statement of CIR S.p.A..

(3) This item is the sum of "financial income", "financial expense", "dividends", "gains from trading securities", "losses from trading securities" and "adjustments to the value of financial assets" in the income statement of CIR S.p.A..

The net operating costs in 2012 amounted to € 10.5 million versus € 20.7 million in 2011. They include charges arising from share-based incentive plans for € 3.5 million (€ 4.4 million in 2011) and legal costs of € 1.7 million (€ 10.4 million in 2011).

The net result generated by financial management includes dividends from subsidiaries, which amounted to € 34.2 million in 2012 compared with € 29.3 million in 2011, net financial expense of € 17 million (€ 10.8 million in 2011) and losses on trading and the valuation of securities of € 2.5 million, in line with 2011.

Lastly, 2012 benefited from a positive net tax position of € 7.1 million, compared with € 8.3 million in 2011, mainly thanks to participation in the CIR Group tax consolidation.

The **condensed statement of financial position** of CIR S.p.A. at 31 December 2012, with comparative figures as at 31 December 2011, is as follows:

<i>(in millions of euro)</i>	<i>31.12.2012</i>	<i>31.12.2011</i>
Fixed assets <i>(1)</i>	1,211.3	1,202.8
Other net non-current assets and liabilities <i>(2)</i>	323.7	310.8
Net working capital <i>(3)</i>	(27.8)	(12.4)
Net invested capital	1,507.2	1,501.2
Net financial position <i>(4)</i>	(568.4)	(555.2)
Equity	938.8	946.0

(1) This item is the sum of "intangible assets", "tangible assets", "investment property" and "equity investments" in the statement of financial position of CIR S.p.A., the Parent Company.

(2) This item is the sum of "other receivables" and "deferred taxes" in the non-current assets and "personnel provisions" in the non-current liabilities of the statement of financial position of CIR S.p.A..

(3) This item is the sum of "other receivables" in current assets and "other payables" and "provisions for risks and losses" in current liabilities in the statement of financial position of CIR S.p.A..

(4) This item is the sum of "financial receivables", "securities", "available-for-sale financial assets" and "cash and cash equivalents" in the current assets, "bonds" in non-current liabilities and "borrowings" in current liabilities in the statement of financial position of CIR S.p.A..

The net financial position at 31 December 2012 showed debt of € 568.4 million compared with € 555.2 million at 31 December 2011.

Equity decreased from € 946 million at 31 December 2011 to € 938.8 million at 31 December 2012, mainly because of the net result for the period (€ 7.9 million) and the effects of accounting for the notional cost of incentive plans (€ 3.5 million), both of which increased equity, and the distribution of dividends which reduced it (by € 18.6).

At 31 December 2012, the Company held 49,989,000 treasury shares (6.3% of the share capital) for a total of € 108.3 million, the same as at 31 December 2011.

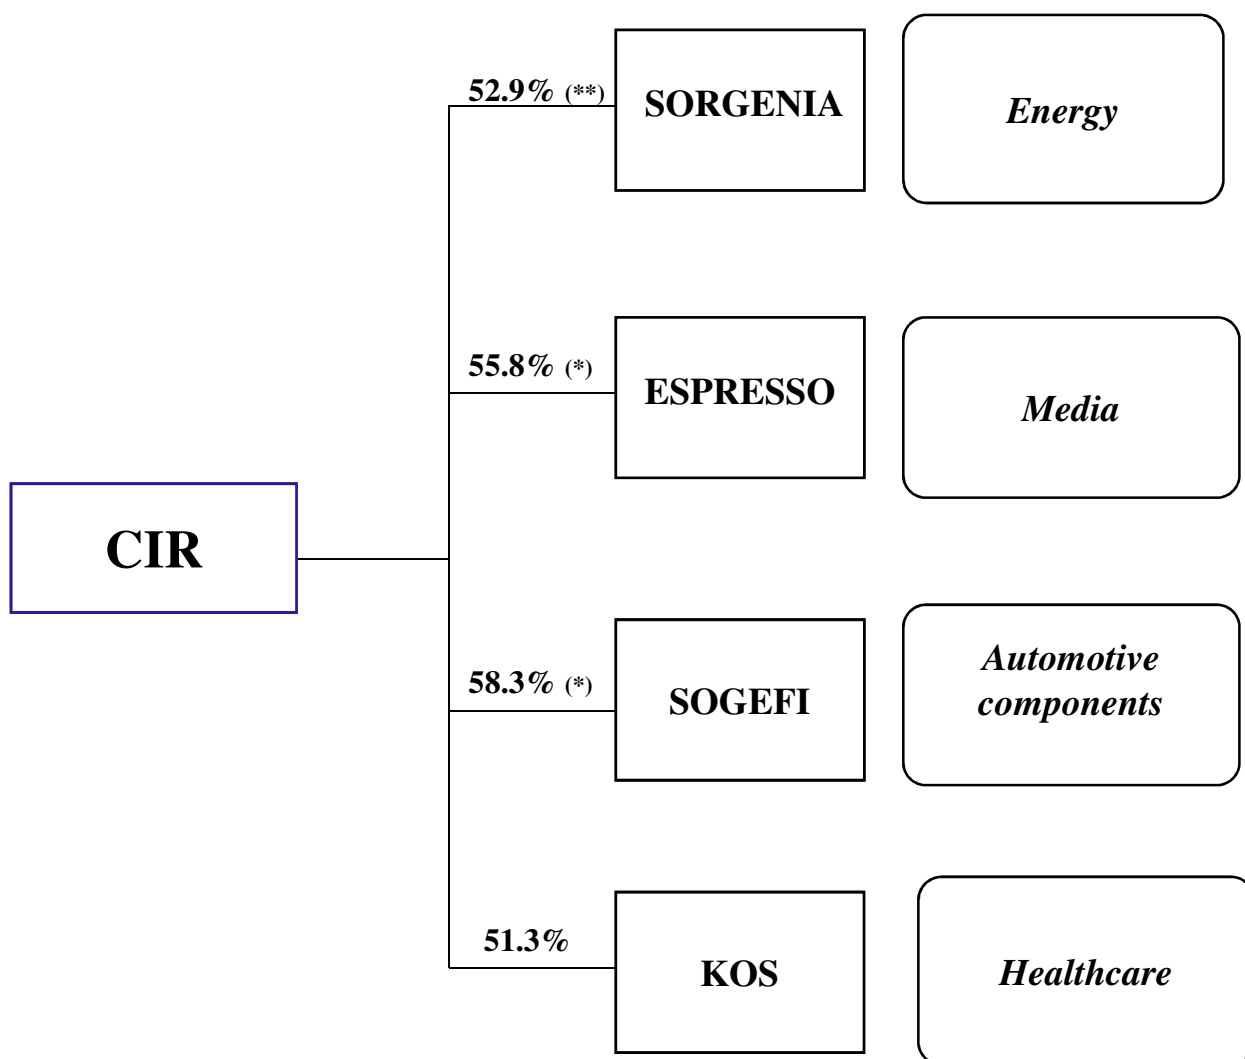

3. RECONCILIATION OF THE PARENT COMPANY'S FINANCIAL STATEMENTS WITH THE CONSOLIDATED FINANCIAL STATEMENTS

The following is a reconciliation between the net result and equity of the Group with the parent company's figures.

<i>(in thousands of euro)</i>	<i>Equity 31.12.2012</i>	<i>Net result 2012</i>
Financial statements of CIR S.p.A. (parent company)	938,834	7,892
- Dividends from consolidated companies	(34,149)	(34,149)
- Net contribution of consolidated companies	546,755	(8,185)
- Difference between the carrying values of investee companies and the portions of their equity included in the consolidation, net of their contributions	(79,819)	-
- Other consolidation adjustments	1,377	1,377
Consolidated financial statements (Group share)	1,372,998	(33,065)

MAIN EQUITY INVESTMENTS OF THE GROUP

AT 31 DECEMBER 2012

(*) The percentage is calculated net of treasury shares

(**) Percentage of indirect control through Sorgenia Holding

4. PERFORMANCE OF THE BUSINESS SECTORS

ENERGY

In 2012 the Sorgenia Group had consolidated revenues of € 2,572.3 million, an increase of 21.3% compared with € 2,120.3 million in 2011, thanks to higher volumes of electricity sold.

The Sorgenia Group's net result in 2012 was a loss of € 196.8 million compared with net income of € 15.6 million in 2011.

Sorgenia's results in 2012 were mainly affected by the asset write-downs of € 134.3 million, in line with what many important Italian and European utilities have done in 2012 and previous years, essentially because of the economic downturn and changes in regulatory frameworks. In detail, having carried out impairment tests, Sorgenia made the following write-downs: in renewable sources, mainly due to a revision of the incentives in the wind sector (€ 64 million), in exploration and production of hydrocarbons (E&P), due to unsatisfactory outcomes (€ 16 million), in its conventional generating business (€ 44.3 million, of which € 36.7 million relating to the group); other assets (€ 8.2 million) and certain tax credits (€ 9.4 million). The net result at year-end was also affected by the reduction in EBITDA and higher depreciation.

Consolidated revenues are as follows:

<i>(in millions of euro)</i>	2012		2011		Change
	<i>Amounts</i>	<i>%</i>	<i>Amounts</i>	<i>%</i>	<i>%</i>
Electricity	2,386.9	92.8	1,921.0	90.6	24.3
Natural gas	142.0	5.5	179.6	8.5	(20.9)
Other revenues	43.4	1.7	19.7	0.9	n.s.
TOTAL	2,572.3	100.0	2,120.3	100.0	21.3

In addition to the write-downs, the results also suffered from the effects of the recession on domestic energy demand (electricity consumption fell during the year by 2.8%, the largest decline since the beginning of the century after that of 2009), as well as from the difficulties encountered by the thermoelectric sector due to the high cost of gas at power plants and competition from renewables at peak hours.

In a year of crisis for the entire energy sector, the company showed some positive signs in the fourth quarter, namely an upswing in profitability thanks to the reduction of natural gas costs (more than 50% of EBITDA before write-downs in 2012 was earned in the period October-December) and a reduction in debt by € 66 million compared with the end of September.

EBITDA before write-downs amounted to € 101.4 million compared with € 192.2 million in 2011 (-47.3%).

EBITDA after write-downs, including the adjustment of € 44.3 million following the impairment test on equity investments, consolidated at equity, amounted to € 57.1 million.

Consolidated EBIT for 2012 was negative for € 127 million compared with a positive figure of € 89.9 million in 2011.

Consolidated net debt, excluding the impact of cash flow hedge components, amounted to € 1,861.6 million at 31 December 2012, compared with € 1,667.2 million at 31 December 2011. The difference is due to an increase in working capital and the investments to complete the Aprilia plant and in

renewables. In the last quarter, with the investment programme substantially completed, the debt was reduced by around € 66 million, mainly thanks to an improvement in working capital.

In addition, net debt at 31 December 2012 does not include the positive impact of the first tranche of the proceeds of sale of the Orlando exploration field (€ 35 million) and the most recent contract signed for the sale of Sorgenia E&P UK Ltd (€ 20 million), which operates in exploration in the North Sea. The sale formalities should be completed by 31 March 2013.

At 31 December 2012 the Sorgenia Group had 451 employees compared with 466 at 31 December 2011.

Sorgenia is continuing the action taken in recent months to cope with Italy's deep recession and the difficulties of the national energy market. It is concentrating above all on two priority objectives: debt reduction and recovery in profitability. To achieve these, the company will continue its policy of selling non-core assets, reducing costs and renegotiating the gas contract. As for commercial development, Sorgenia aims to grow more in the residential sector.

As regards the stage of completion of the Business Plan, the Aprilia plant (Latina), the fourth and last combined cycle plant (CCGT) planned by Sorgenia, began operations in 2012.

As regards activities in the field of renewables (*Sorgenia Green*), the Campagna "A" (SA) 12 MW wind farm began operations in September, a new 12.5 MW plant in France commenced in early October, and construction work on the Ricigliano (SA), 12 MW, and Campagna "B" (SA), 8 MW, wind farms was completed in December.

MEDIA

The Espresso Group closed 2012 with consolidated revenues of € 812.7 million, 8.7% down on the € 890.1 million in 2011.

Consolidated net income was € 21.8 million (after provisions for € 11.9 million in connection with outstanding tax litigation), compared with € 60.6 million in 2011.

Note that the consolidated net result does not include the effect of the actuarial gains and losses accrued during the year of € 5.8 million, due to early adoption of IAS 19 Revised.

Group revenues are as follows:

<i>(in millions of euro)</i>	2012		2011		Change
	Amounts	%	Amounts	%	%
Circulation	261.5	32.2	271.4	30.5	(3.7)
Advertising	476.3	58.6	534.7	60.1	(10.9)
Add-ons	49.4	6.1	62.9	7.1	(21.5)
Other revenues	25.6	3.1	21.1	2.3	21.3
TOTAL	812.7	100.0	890.1	100.0	(8.7)

During 2012, the deterioration in the economic situation, featuring a severe recession and considerable uncertainty about future prospects, has led to a number of particularly crucial changes in the publishing industry.

Advertising expenditure fell by 14.3% on 2011 (source: Nielsen Media Research), getting steadily worse during the year, as the contraction went from -7.5% in the first quarter to -20.5% in the last. This trend has hit all media with the exception of the Internet (+5.3%, but excluding search engines as they are not picked up by Nielsen): the press saw advertising fall by 17.9%, television by 15.3% and radio by 10.2%.

In terms of circulation, the downward trend seen in previous years has got worse in both daily newspapers and periodicals, reflecting a general crisis in consumer spending: according to internal estimates based on ADS figures, 2012 saw an 8.7% decline in newspaper sales.

The Espresso Group's circulation revenues came to € 261.5 million, a decrease of 3.7% compared with € 271.4 million the previous year, in a market that overall suffered an 8.7% decline in copies sold, as mentioned previously. Good performances by the Group's publications compared with its reference market segments continued in 2012.

The latest ADS (December 2012) and Audipress figures (2012/III Survey) show that *la Repubblica* is still the top daily newspaper in terms of newsstand sales and readership (3 million), and *L'Espresso* is in first place in newsmagazines with 2.5 million readers.

Advertising revenues, which amounted to € 476.3 million, suffered a 10.9% downturn on the previous year, in a market that has shrunk by 14.3%. The trend of each media is basically a reflection of general market trends; however, the Group's results on all media are slightly better than the pack. Press revenues lost 16.5% (-17.9% for the market), while radio revenues fell by 2.5% (-10.2% for the market). Internet advertising grew rapidly (+14%), despite the slowdown in that particular market's growth (+5.3%). This progress by the Group is based on developing group website audiences, with an average of 2.4 million unique daily users (+7% on 2011 - source: Nielsen Site Census). *Repubblica.it* ranks first among information websites in Italian, with an average of 2 million unique daily users (+5% on 2011), well ahead of its next competitor.

Add-on revenues came to € 49.4 million, 21.5% down on 2011, which reflects a general depression in consumer spending and a progressive contraction of this market that has been going on since 2007 after a period of intense growth.

Other revenues, amounting to € 25.6 million, increased by 21.3% on 2011, thanks to the growth in digital terrestrial TV bandwidth rentals to third parties.

Total costs show a reduction of 2.4%: excluding digital publishing and DTT, where costs are rising to support their development, there has been a 5% reduction thanks to further rationalisation, especially in the industrial and administrative areas.

Consolidated EBITDA came to € 102.4 million, decreasing by 35.9% compared with € 159.8 million in 2011. The areas where developments are particularly critical are the newspaper, *la Repubblica*, magazines and add-ons, whereas local dailies and radio stations are showing greater resilience. The Internet results, on the other hand, are improving, thanks to revenue growth; likewise television, thanks to more bandwidth rentals.

Lastly, it is worth pointing out that restructuring charges provided for in 2012 amounted to € 18.2 million, compared with € 12.9 million in 2011.

Consolidated EBIT came to € 60.4 million, a decrease of 50.7% on the previous year (€ 122.5 million). The increase in amortisation with respect to the previous year is largely due to the fact that the Group has begun to amortise the rights under the 20-year concession granted on 28 June 2012 to use certain DTV frequencies.

Consolidated net debt at 31 December 2012 amounted to € 108.1 million, another slight improvement on the figure of € 110.2 million at 31 December 2011: the current financial surplus of € 29 million was absorbed by dividends for € 25 million and by the purchase of treasury stock for € 1.9 million.

At the end of December 2012, the Group had 2,536 employees, including those on fixed-term contracts, 137 fewer than at 31 December 2011. The average number of employees during the period was 4.8% lower than the previous year, down from 2,747 to 2,614 employees.

The Board of Directors of Gruppo Editoriale L'Espresso, the holding company, which met on 26 February 2013, proposed not to distribute any dividend for 2012.

As regards trends in advertising and circulation, the first two months of 2013 are not showing any signs of improvement on the last quarter of 2012.

The Espresso Gruppo has successfully overcome the crisis of 2009, returning in 2011 to its pre-crisis levels of profitability, thanks to radical restructuring over a period of two years (2009-2010), and significantly reducing its debt.

As for coping with the second wave of the crisis, which began in the last quarter of 2011 and is still underway, the Group has introduced plans to accelerate digital development, on the one hand, and to make further cost reductions on the other, but which were not enough to maintain profitability at the same level as in 2011.

Moreover, without a turnaround in the economy and in this specific market, which currently looks unlikely, the decline in results will probably continue in 2013.

AUTOMOTIVE COMPONENTS

In 2012 the Sogefi Group posted double-digit growth in revenues and earnings compared with last year, thanks to expansion in non-European markets, especially in North America and Asia, and the contribution made by Systèmes Moteurs, which were consolidated for the entire period, whereas in 2011 they entered the Group's scope of consolidation only in the last five months of the year.

These results were obtained despite the significant drop in car sales in Europe, which is Sogefi's main market (-7.8% on 2011 with car registrations back at 1995 levels). The negative performance of the car sector was, however, offset by the rise in production levels in all the other markets where the Group is present, starting from North America (+17.4%), China (+5.8%), India (+5.3%) and Brazil (+0.8%).

In 2012, the Sogefi Group achieved revenues of € 1,319.2 million, an increase of 13.9% compared with € 1,158.4 million the previous year, the highest level ever in the Group's history. The increase over the previous year was due to growth in non-European markets and the contribution made by Systèmes Moteurs. The revenues generated by the Group outside Europe rose in 2012 to 33.5% of the total, from 30.5% in 2011, thanks to strong progress in North America (+107.6%), China (+33.5%) and India (+48.3%), which more than offset a slight reduction in Mercosur (-3.8%), due to a slowdown in the Brazilian market in the middle of the year. As far as Sogefi's main clients are concerned, Ford is now the Group's second-largest customer in terms of revenues.

Consolidated net income of the Sogefi Group came to € 29.3 million, 22% up on € 24 million in 2011.

The breakdown of the Sogefi Group's consolidated by business sector is as follows:

<i>(in millions of euro)</i>	2012		2011		Change %
	Amounts	%	Amounts	%	
Engine systems	792.6	60.1	611.5	52.8	29.6
Suspension components	528.6	40.1	547.7	47.3	(3.5)
Intercompany	(2.0)	(0.2)	(0.8)	(0.1)	n.a.
TOTAL	1,319.2	100.0	1,158.4	100.0	13.9

The year was characterised by a higher impact of the cost of materials on revenues (52% versus 49.8% in 2011) due to a change in sales mix, whereas the impact of labour cost remained the same at 22.9%.

The reorganisation designed to cut fixed overheads continued during the year. Restructuring costs came to € 12.2 million, compared with € 8.7 million in 2011, and related mainly to the definitive closure of an engine filter production plant at Llantrisant (Wales). Non-operating costs of € 2.1 million have also been incurred to close the stabilizer bar plant in Prichard (USA), and € 2.2 million for consulting services relating to the Group's international development initiatives.

Helped by a constant focus on costs, the consolidated EBITDA of € 126 million (9.6% of revenues) increased by 12.7% compared with € 111.9 million (9.7% of revenues) in 2011.

EBIT rose to € 62.8 million (4.8% of revenues), compared with € 58.5 million (5% of revenues) in 2011, an increase of 7.3%.

The *Engine Systems Division* turned in revenues of € 792.6 million, an increase of 29.6 % due to the consolidation of Systèmes Moteurs for an entire year, strong market growth in North America and progress in China and India, while business in South America remained substantially stable. The division's EBITDA was € 74.7 million (€ 52 million in 2011) and EBIT amounted to € 39 million (€ 24.4 million in 2011), both on the rise despite the costs incurred to close the plant in Wales.

The following projects were implemented during the year, in line with Sogefi's strategy of expanding its presence in non-European markets: the start of construction of a new plant at Wujiang (China) and an increase in the production capacity of the plants in Prichard (USA) and in Bangalore, Pune and Delhi (India).

The revenues of the *Suspension Components Division* amounted to € 528.6 million, a slight decrease (-3.5%) compared with € 547.7 million in 2011, due to a significant fall in demand on the part of European generalist manufacturers in the last quarter of the year. The division's EBITDA was reduced to € 56.9 million (€ 68.3 million in 2011) and EBIT to € 32.3 million (€ 44.1 million in 2011).

During the year, the new Indian plant at Pune was inaugurated and construction work began on a third production plant in Wujiang (China).

Net debt at 31 December 2012 amounted to € 295.8 million, in line with the figure of € 299.8 million at 31 December 2011, thanks to the steps taken to reduce working capital, the receipt of € 7.4 million for the sale of a factory in Brazil, after the distribution of dividends for € 17.2 million.

The Group had 6,735 employees at 31 December 2012 (6,708 at 31 December 2011).

Sogefi's Board of Directors met on 26 February 2013 and proposed distributing a dividend for 2012 of € 0.13 (the same as the previous year).

Globally, the car market is expected grow slightly in 2013, with declining volumes in the European market, continuing growth in China and India, and volumes rising more moderately in North and South America. In this context, the Sogefi Group expects to continue growing in markets outside Europe, especially in North America and Asia, to have stability in the cost of key raw materials and to continue implementing efficiency measures.

HEALTHCARE

In 2012 the KOS Group achieved revenues of € 355.4 million, compared with € 349.6 million the previous year, an increase of 1.7%, thanks to growth in its three lines of business.

Group revenues are as follows:

<i>(in millions of euro)</i>	<i>2012</i>		<i>2011</i>		<i>Change</i>
	<i>Amounts</i>	<i>%</i>	<i>Amounts</i>	<i>%</i>	<i>%</i>
Care homes	150.2	42.3	148.0	42.3	1.5
Rehabilitation	142.3	40.0	141.9	40.6	0.3
Acute/Hi-tech	62.9	17.7	59.7	17.1	5.4
TOTAL	355.4	100.0	349.6	100.0	1.7

Consolidated EBITDA came to € 53.4 million (15% of revenues), 2.3% up on € 52.2 million in 2011, also because of the change in the scope of consolidation and developments of activities that took place in 2012 (around € 1 million).

Consolidated EBIT was € 27.3 million compared with € 30.3 million the previous year, a decrease mainly due to higher impairment write-downs of € 2.2 million.

Consolidated net income amounted to € 12.1 million compared with € 8.9 million the previous year. The improvement in these results was also thanks to a non-recurring item (€ 4 million) for income tax (IRES) recovered due to the higher deductibility of regional tax (IRAP) for the period 2007-2011 (under Legislative Decree no. 201/2011).

At 31 December 2012 the KOS Group had net debt of € 163.4 million, compared with € 165.1 million at 31 December 2011. The main factors contributing to the difference were the increase in capital of € 17.5 million carried out in May by the shareholder AXA Private Equity and cash flow from operations, offset by a negative change in working capital and the capital investments made during the period.

At 31 December 2012 consolidated equity amounted to € 233.3 million versus € 207.2 million at 31 December 2011.

The Group had 4,164 employees at 31 December 2012 compared with 4,080 at 31 December 2011.

Start-up activities continue in India where the KOS Group set up the ClearMedi Healthcare Ltd joint venture during the second half of 2011. It is held 51% by the KOS Group and 49% by a local company and provides diagnostic and therapeutic technologies to Indian hospitals on an outsourcing basis.

The KOS Group, which at 31 December 2012 was managing 64 facilities mainly in central and northern Italy for a total of some 5,950 beds in use, with another 900 being built, operates in three strategic business areas, in turn split into four segments:

- 1) *Care homes*: management of care homes and psychiatric care communities, with 41 nursing facilities and 9 psychiatric rehabilitation facilities, for a total of 4,350 beds in operation (of which 4,154 in care homes);
- 2) *Rehabilitation*: management of hospitals and rehabilitation centres, including 13 rehabilitation facilities (with two geriatric care homes) and 12 hospitals, for a total of 1,489 beds;
- 3) *Hospital management*: management of a hospital and hi-tech services in 23 public and private facilities.

5. NON-CORE INVESTMENTS

These are represented by venture capital, private equity and other investments.

VENTURE CAPITAL AND PRIVATE EQUITY

CIR Ventures is the Group's venture capital fund. At 31 December 2012 the fund's portfolio included investments in four companies, three of which in the United States and one in Israel, working in the field of electronics and information and communications technology (ICT). The overall fair value of these investments at 31 December 2012 amounted to \$13.4 million.

Through CIR International, a subsidiary, the CIR Group manages a diversified portfolio of private equity funds and direct minority shareholdings, whose fair value at 31 December 2012, based on the NAV communicated by the various funds, was around € 97 million. Outstanding commitments at 31 December 2012 amounted to € 10.6 million. During 2012 there were proceeds on disposal of € 9.6 million.

OTHER INVESTMENTS

The Swiss Education Group (SEG) is a world leader in hospitality management training (for hotels, restaurants, etc.), in which CIR has an interest of around 20%. In 2012, it increased its revenues compared with the previous year, mainly thanks to a sustained level of registrations during the year, with a strong element of this demand coming from Asian countries. In 2012, two new Cesar Ritz facilities opened in Le Bouveret and Lucerne (Cesar Ritz is one of the Group's schools dedicated to the culinary arts). Initiatives were launched in 2012 - and are still ongoing - to increase the reception capacity of the various schools, given the steady rise in new applications.

On 7 November 2012 CIR International completed an agreement, initially signed on 28 September 2012, which ceded control of Food Concepts Holding S.A. to a specialist operator.

At a consolidated level, this deal resulted in a loss of € 6.2 million, but this could be offset by a deferred element of the price that is conditional on the company's future profits. At 31 December 2012 CIR International still held a 19% stake in the company.

During the year, Nexenti Advisory (formerly Jupiter Finance) carried out a reorganisation with a view to pulling out of all activities subject to regulatory reserves, together with other related

activities, in favour of the securitisation vehicles Zeus Finance S.r.l., Urania Finance S.A. and Vesta Finance S.r.l. This was done by transferring these functions during the months of June and July 2012 to other servicers with suitable regulatory qualifications and recognised standing in the sector. In accordance with the shareholder's strategy, the Company then focused its servicing functions, maintaining a role in Zeus and Urania as asset advisor in order to protect and ensure the strategic objectives of stakeholders, even if no longer carrying out any activity that is under the control of the Supervisory Authority.

As a result, the Company applied for and on 18 October obtained its cancellation from the lists supervised by the Bank of Italy. It has also amended its objects and company name in line with the regulatory requirements.

At 31 December 2012 the net value of the CIR Group's investments in activities related to non-performing loans amounted to € 63.8 million.

6. SIGNIFICANT EVENTS WHICH OCCURRED AFTER THE CLOSE OF THE YEAR

As regards significant events that took place after 31 December 2012, note that the sale of Sorgenia E&P (UK) Ltd for a total of € 20 million was completed on 21 February 2013.

7. BUSINESS OUTLOOK

The performance of the CIR Group in 2013 will be influenced by how the macroeconomic scenario evolves, especially in the Italian economy, still suffering from a persistent recession whose intensity is hard to predict. In this scenario, all of the Group's main operating subsidiaries will continue to take action to improve operating efficiency, but without giving up their business development initiatives.

8. PRINCIPAL RISKS AND UNCERTAINTIES TO WHICH CIR S.P.A. AND THE GROUP ARE EXPOSED

Risks connected with the results of the Group

The CIR Group operates, among other things, in the automotive components sector, which is subject to cyclical factors, and in the media sector which is highly sensitive to trends in the economic cycle. It is difficult to forecast the extent and duration of these various cycles. However, any macroeconomic event, such as a significant decline in a particular market, volatility in the financial markets, a rise in energy prices, fluctuations in commodity prices, etc. could have an impact on the Group's prospects and business activities, as well as on its results and financial position.

Risks connected with borrowing requirements

The CIR Group expects to be able to meet its borrowing requirements in terms of maturing loans and investment needs with its operating cash flows, available liquidity and by renewing or refinancing its bank loans or bonds. Even in the current market context, the Group aims to maintain a sufficient capacity to generate funds from ordinary operations.

The Group invests any free cash flow, spreading its investments over a suitable number of prime counterparties, matching the residual life of these investments with the maturity of its obligations on the funding side.

However, in light of the current financial crisis, it cannot be ruled out that there may be banking or money market situations that could obstruct the normal functioning of the financial system.

Risks connected with fluctuations in exchange and interest rates

A significant part of Group borrowings involves the payment of interest at floating rates, mainly linked to Euribor. So any rise in interest rates could result in higher funding costs or more costly debt refinancing on the part of Group companies.

In order to limit the risk of interest rate fluctuations, the Group uses interest rate derivatives to keep them within a predetermined range.

Some Group companies, particularly in the Sogefi Group, do business in European countries that do not belong to the Euro-zone and non-EU countries that use different currencies, exposing them to the risk of fluctuations in foreign exchange rates against the euro. In line with its risk management policies, the Group takes out hedges to limit this risk.

Despite this hedging, sudden fluctuations in exchange or interest rates could have a negative impact on the Group's economic and financial results.

Risks connected with customer and supplier relations

In its relations with customers, the Group manages the demand concentration by suitably diversifying its customer portfolio, both geographically and in terms of distribution channels. In relations with suppliers the approach differs according to the business sector. For example, the Sogefi Group diversifies its sourcing by using several suppliers operating in different parts of the world, which enables the Group to reduce its risk of commodity price fluctuation and avoid relying too heavily on key suppliers.

Risks connected with competitiveness in the Group's business sectors

The Group operates in markets with genuine entry barriers against new competitors thanks to technology or quality gaps, the need to make substantial initial investments and the fact that it operates in sectors that are highly regulated, requiring special authorisations from the competent authorities.

It is important as the ability to develop and deliver innovative products would allow Group companies to achieve results in line with the strategic forecasts.

Risks connected with environmental policies

The Group operates in sectors that are subject to a host of environmental rules and regulations (at local, national and supranational level) and they are often revised to become more restrictive. Having to comply with these regulations, especially if they continue to change, could lead to very high costs that potentially could impact the Group's profit margins.

CIR S.p.A., as the Parent Company, is exposed to substantially the same risks and uncertainties as described above for the Group.

Share-based incentive plans

The CIR Group has put in place various share-based incentive plans for the Group company management teams. Reference should be made to the Notes to the Financial Statements for further information on these plans.

Treasury shares

At 31 December 2012 the Parent Company owned 49,989,000 treasury shares (equal to 6.3% of share capital). The Group does not own any shares other than those indicated above. For further details on the subject of own shares held, reference should be made to the comment on equity in the Notes to the Financial Statements.

At 31 December 2012 the Group has no shares in subsidiaries, nor has it bought or disposed of such shares during the year, either directly or through a trust or third party.

Transactions with Group companies and related parties

On 28 October 2010 the Company adopted the Regulations on Related Party Transactions envisaged in Consob Resolution no. 17221 of 12 March 2010, as amended by Resolution no. 17389 of 23 June 2010. This procedure can be found in the Governance section on the web site: www.cirgroup.it.

The procedure aims to establish principles of conduct that the Company is required to adopt in order to guarantee the correct management of related party transaction and it therefore:

1. sets out the criteria and procedures for identifying the Company's related parties;
2. dictates the principles for identifying related party transactions;
3. regulates the procedures for carrying out related party transactions;
4. establishes methods for compliance with the related disclosure obligations.

The Board of Directors has also appointed a Related Party Transactions Committee, establishing that its members coincide with membership of the Internal Control Committee, except for the system of substitutes envisaged in the procedures.

During the year CIR S.p.A. provided management and strategic support services to its subsidiaries and associates which, among other things, involved supplying administrative and financial services, merging and acquisition and disbursing loans.

Transactions with the Parent Company consisted of providing services of an administrative and financial nature and being supplied with management support and communication services. The main concern of CIR and its counterparties in relation to these services is to ensure quality and a high level of efficiency of the services rendered, which derive from CIR's specific knowledge of Group business activities.

Also note that CIR S.p.A. has signed lease contracts with subsidiaries and executives with strategic responsibilities within the Group.

The Group's related party transactions are settled at arm's length, taking into consideration the quality and specific nature of the services provided.

The most significant financial relations between CIR, its subsidiaries and other related parties are analysed in detail in the Notes to the Financial Statements, in particular the items *Other receivables* and *Sundry payables* in the statement of financial position and the items *Sundry revenues and income*, *Costs for Services*, *Financial Charges* and *Dividends* in the income statement.

For further details on related party transactions, reference should be made to paragraph 26 “Other information”.

Regarding the main equity transactions reference should be made to the appropriate sections of the Notes to the Financial Statements.

It should be pointed out that the CIR Group did not enter into any transactions with related parties, according to Consob’s definition, or with entities other than related parties of an atypical or unusual nature beyond normal business administration or such as to have any significant impact on the economic, financial or equity position of the Group.

The code of conduct governing transactions with related parties was defined by the Board of Directors of the company in September 2002.

National Tax Consolidation

The Income Tax Consolidation Act (TUIR) offers the option for companies belonging to the same group to determine a single total income figure corresponding in principle to the sum of the taxable incomes of the various companies (parent company and subsidiaries controlled directly and/or indirectly by more than 50% according to certain requisites) and thus to calculate a single income tax figure for the Group companies.

In 2010 CIR and companies of the Espresso, Sogefi, KOS and Jupiter (now Nexenti Advisory) subgroups renewed their participation in the “CIR Tax Consolidation” for the three years 2010-2012. At 31 December 2012, 18 companies participate in the CIR Tax Consolidation.

Report on Corporate Governance

The CIR Group’s corporate governance model is based on the guidelines contained in the Code of Conduct prepared by the Corporate Governance Committee of Borsa Italiana and published in December 2011 with the additions and adjustments made necessary by the nature of the Group.

In compliance with regulatory requirements, every year an “Annual Report on Corporate Governance” is prepared, which contains a general description of the corporate governance system adopted by the Group and gives information on the ownership structure and on compliance with the Code of Conduct, including the main governance practices applied and the characteristics of the risk management and internal control system in relation to the financial disclosure process.

It should be noted that the full text of the “2012 Annual Report on Corporate Governance” was approved in full by the Board of Directors’ Meeting convened to approve the Draft Financial Statements at 31 December 2012.

The Annual Report on Corporate Governance will be available to anyone on request, in accordance with the conditions stipulated by Borsa Italiana for their publication. The Report is also available in the Governance section of the company web site (www.cirgroup.it).

In relation to Italian Legislative Decree 231/01, issued with the aim of bringing regulations on the subject of the administrative liability of entities into line with international agreements signed by Italy, on 7 March 2003 the Board of Directors of the company approved the adoption of a Code of Ethics of the CIR Group, published as an attachment to the “Annual Report on Corporate Governance”, which defines the values pursued by the Group in the achievement of its objectives and establishes binding principles of conduct for its Directors, employees and Group stakeholders. Moreover, on 29 October 2004, the Board of Directors of the company approved the “Organization Model – the Organizational and Management Model as defined by Legislative Decree 231/01”, in line

with the instructions laid down in the decree which aims to ensure correctness and transparency in the conduct of business and corporate activities.

The Organization and Management Model as per Legislative Decree 231/01 is continually updated by the Board of Directors to take into account the broadening of the scope of the rules on the subject.

In relation to the obligations set out in Art. 2.6.2, paragraph 15 of the Rules of Borsa Italiana, taking into account the provisions of Articles 36 and 37 of Consob Resolution 16191, it is hereby confirmed that there are no conditions that could prevent the listing of CIR shares on the MTA market organised and managed by Borsa Italiana S.p.A. since the non-EU foreign subsidiaries, which have particular significance for CIR, publish their own articles of association and the composition and powers of their administrative bodies according to the legislation applicable to them or voluntarily, provide the Company's auditors with the information necessary to carry out the audit activity on the annual and interim accounts of CIR, and they have a administrative and accounting system suitable for providing Company Management and its auditors with the economic, patrimonial and financial figures necessary for preparation of the consolidated financial statements. Furthermore, in relation to the fact that the company is subject to management and coordination by its parent company COFIDE - Gruppo De Benedetti S.p.A., the company has fulfilled all the disclosure obligations and the other obligations required by Article 2497-*bis* of the Italian Civil Code, has the power to negotiate independent relations with customers and suppliers, has no centralised treasury function in common with COFIDE and the Board of Directors of the company, out of a total of 12 members, has 7 who possess the requisites of independence and are thus sufficient to guarantee that their judgement has a significant weight in the decision-making process of the Board.

Lastly, it should be noted that the companies of the group have complied with the provisions of art. 2497- *bis* of the Italian Civil Code.

Preparation of the "Security Policy Document"

As regards compliance with personal data processing regulations under Legislative Decree no. 196/03, the Personal Data Protection Code, Decree Law 5 of 9 February 2012, known as the "Simplification Decree" repealed the obligation to prepare a Security Policy Document. All of the other obligations remain valid.

However, the fact that this document is no longer required does not reduce the level of monitoring of compliance with these regulations.

Compliance with the Personal Data Protection Code is verified by means of the risk analysis document, which is prepared once a year, and a separate data processing map, which is updated whenever there are changes.

Research and development

Research and development at Group level in 2012 was concentrated principally in the energy sector. Sorigenia's R&D has been focusing on two main areas: energy efficiency and sustainable mobility.

Since 2006, Sorigenia has a participation in Noventi Ventures II LP, a venture capital fund for the development of industrial initiatives aimed at protecting and respecting the environment. Over the years, it has made investments in various hi-tech and innovative businesses. These include Aurora Algae, for the production of quality, high-performance products based on micro-algae for the pharmaceutical, nutrition, aquaculture and fuel markets; Lumenergi, for the development of high-efficiency civil and industrial lighting solutions, capable of savings of up to 70%; HelioVolt, for the development of thin film solar panels, that combine an efficiency of more than 14-15% with low manufacturing costs, to create the next generation of CIGS (Copper Indium Gallium Selenide) photovoltaic cells.

On the topic of sustainable mobility, Sorgenia is also active at a local level with the "Companies for eMilan" project, which has seen growing interest over the last year and now involves 20 companies in the Milan area. The project aims to demonstrate how sustainable mobility through the provision of electric vehicles and battery charging services can be a valid means of transport for private companies.

On the same theme, Sorgenia also plays an active and important role in the project launched by the Municipality of Milan to structure and facilitate the uptake of sustainable mobility in the area.

Sorgenia also remains heavily involved in the question of Smart Houses, through participation in working groups and specific European tenders. The Smart House model envisages a home totally free of environmental impact and running costs, as it is able to exploit energy that is self-generated (through solar panels and/or geothermal systems) and adjust internal temperatures to daily needs, also with the assistance of remote devices.

Sorgenia also sponsored the Cleanweb Hackathon, which was held in Rome in November and December 2012. During this event, more than 100 developers, designers and experts worked as a team to develop programs or apps to improve environmental sustainability in terms of energy, transport and consumption.

In the components sector, R&D expenditure for the year amounted to € 35.9 million (€ 26.1 million the previous year), mainly oriented towards product innovation.

Exception to the obligation to publish information documents in accordance with art. 70, paragraph 8, and art. 71, paragraph 1-bis of the Issuers' Regulations

In accordance with art. 70, paragraph 8, and art. 71, paragraph 1-bis of Consob Regulation no. 11971/99, as amended by Resolution no. 18079 of 20 January 2012, the Board of Directors decided to exercise its right to make an exception to the obligation to publish the information documents required in the event of significant transactions such as mergers, spin-offs, increases in capital by means of a contribution in kind, acquisitions and disposals.

Other

CIR S.p.A. – Compagnie Industriali Riunite has its registered office in Via Ciovassino 1, Milan, Italy.

CIR shares have been listed on the Milan Stock Exchange since 1973 (Reuters code: CIRX.MI, Bloomberg code: CIR IM).

This report for the period 1 January-31 December 2011 was approved by the Board of Directors on 11 March 2013. CIR S.p.A. is subject to management and coordination by Cofide – Gruppo De Benedetti S.p.A..

10. PROPOSED ALLOCATION OF THE RESULT FOR THE YEAR

Dear Shareholders,

The financial statements for the year ended 31 December 2012, which we are submitting for your approval, closed with net income of € 7,891,685.12 that we propose allocating to “Retained earnings”.

THE BOARD OF DIRECTORS

Milan, 11 March 2013

1. STRUCTURE AND CONTENT OF THE FINANCIAL STATEMENTS

These consolidated financial statements have been prepared in accordance with international accounting standards (IAS/IFRS) issued by the International Accounting Standards Board ("IASB") and ratified by the European Union, as well as with the measures issued in implementation of Art. 9 of D. Lgs. no. 38/2005, including all the interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"), previously known as the Standing Interpretations Committee ("SIC").

The financial statements are prepared on the basis of the principle of historical cost, modified as required for the valuation of certain financial instruments, in compliance with the matching and revenue recognition principles and on the assumption that the enterprise is a going concern. In fact, in spite of the presence of a difficult economic and financial environment, the Group has evaluated that there are no significant uncertainties, as defined in paragraph 25 of IAS 1, relating to the ongoing nature of the concern.

The consolidated financial statements at 31 December 2012 include the parent company CIR S.p.A. (hereinafter "CIR") and its subsidiaries, and were prepared using the accounts of the individual companies included in the scope of consolidation; these correspond to their separate interim financial statements or the consolidated statements of sub-groups, examined and approved by their respective boards and amended and re-stated where necessary to bring them into line with the accounting principles listed below and, where compatible, with Italian regulations.

The classification formats adopted are as follows:

- The statement of financial position is split into assets and liabilities on the basis of current and non-current items;
- the income statement is broken down by type of expense;
- the statement of cash flows has been prepared using the indirect method;
- the statement of changes in equity gives a breakdown of the changes which took place during the year and in the previous year;
- the statement of comprehensive income shows items of income that are suspended in equity.

These financial statements have been prepared in thousands of euro, which is the Group's "functional" and "presentation" currency in accordance with IAS 21, except where indicated otherwise.

Events after the reporting date

No important events took place after the end of the year which could have had a significant effect on the Group's financial position, equity or results. See point 6 of the Report on Operations for an explanation of events that took place after the end of the year.

Publication of the financial statements was authorised by the Company's Board of Directors on 11 March 2013 (as required by paragraph 17 of IAS 10).

2. CONSOLIDATION PRINCIPLES

2.a. Consolidation methods

All companies where the Group exercises control according to IAS 27, SIC 12 and IFRIC 2 are considered subsidiaries. More specifically, subsidiaries are all those companies and investment funds where the Group has decision-making powers in matters of financial and operating policy. Such powers are presumed to exist when the Group holds a majority of a company's voting rights, including any voting rights that are potentially exercisable without any restrictions or where it has effective control over Shareholders' Meetings, despite not having a majority of the voting rights.

Subsidiaries

Subsidiaries are fully consolidated from the date on which the Group takes control and are de-consolidated when such control ceases to exist.

Consolidation is on a line-by-line basis. The main criteria used when applying this method are the following:

- the carrying value of each investment is eliminated against the Group's share of its equity and the difference between the acquisition cost and net equity of investee companies is posted, where appropriate, to the asset and liability items included in the consolidation. If there is a balance left over, it is posted to income if negative or to assets as goodwill if positive. Goodwill is tested for impairment based on its recoverable value;
- significant transactions between consolidated companies are eliminated on consolidation, as are receivables and payables and unrealised profits on transactions between Group companies, net of tax;
- minority interests in equity and the net result for the period are shown separately in the consolidated statement of financial position and income statement.

Associates

All companies in which the Group has a significant influence, without having control, in accordance with IAS 28, are considered associates. Significant influence is presumed to exist when the Group has between 20% and 50% of the voting rights (excluding cases of joint control). Associates are consolidated using the equity method from the date on which the Group acquires significant influence in the associate and are de-consolidated from the moment when this influence no longer exists.

The main criteria used when applying the equity method are the following:

- the carrying value of each investment is eliminated against the Group's share of its equity and any positive difference identified at the time of the acquisition, net of any impairment; the corresponding share of the net income or loss for the period is posted to the income statement. If the Group's portion of the associate's accumulated losses exceeds the carrying value of the investment, the investment is written off and any further losses are not recorded, unless the Group has a contractual obligation to do so;
- any unrealised gains and losses generated by transactions between Group companies are eliminated, except where the losses reflect impairment of the associate's assets;
- the accounting policies of associates are amended, where necessary, to bring them into line with those of the Group.

Joint ventures

All companies that the Group controls together with another company according to IAS 31 are considered joint ventures.

Joint control is presumed to exist when the Group owns 50% of a company's voting rights.

International accounting standards envisage two methods for consolidating investments in joint ventures:

- the standard method, which involves proportionate consolidation;
- the alternative method, which involves using the equity method.

The Group has adopted the equity method.

2.b. Translation of foreign companies' financial statements into euro

The translation into euro of the financial statements of subsidiaries from outside the Euro Area, none of which has a hyperinflationary economy according to the definition given in IAS 29, is carried out at the year-end exchange rate for the statement of financial position and at the period average exchange rate for the income statement. Any exchange rate differences resulting from the translation of equity at the year-end exchange rate and from translation of the income statement at the average rate for the period are recorded in the item "Other reserves" under equity.

The main exchange rates used are the following:

	31.12.2012		31.12.2011	
	Average rate	31.12.2012	Average rate	31.12.2011
US dollar	1.2849	1.3194	1.39196	1.2939
GB pound	0.8108	0.8161	0.8675	0.8353
Brazilian real	2.5023	2.7036	2.3239	2.4159
Argentine peso	5.8350	6.4863	5.7369	5.5676
Chinese renminbi	8.1064	8.2210	8.9847	8.1588
Indian rupee	68.5871	72.5689	64.7668	68.713
Romanian leu	4.4567	4.4444	4.2371	4.3233
Canadian dollar	1.2842	1.3137	1.3752	1.3215
Mexican peso	16.9005	17.1851	17.2444	18.0512
Hong Kong dollar	9.9671	10.2260	10.8237	10.0510

2.c. Scope of consolidation

The consolidated financial statements at 31 December 2012 and 2011 are the result of consolidating CIR (Parent Company) and all of the companies directly or indirectly controlled, jointly controlled or associated as of those dates. Assets and liabilities scheduled for disposal are reclassified to specific asset and liability items to highlight these circumstances.

In particular, the assets shown as "discontinued" relate to assets of the Sorgenia group scheduled for disposal in 2013.

A list of the equity investments included in the scope of consolidation, with an indication of the consolidation method used, is given in the appropriate section of this report, along with a list of those that have been excluded.

2.d. Changes in the scope of consolidation

The main changes in the scope of consolidation compared with the previous year concern the following:

Energy

The following companies are new entries to the scope of consolidation:

- Cap Energie S.a.s.
- Ecoparc des Energies S.a.s.
- Eolian Amzacea Independenta S.r.l.
- Eolian Medgidia Pestera S.r.l.
- Eolian Falciu Unu S.r.l.
- Sorgenia ASD S.r.l.
- Wind Project Falciu Trei S.r.l.

The following changes in the scope of consolidation have also taken place:

- following their entry into service, as a result of the non-monetary contributions of business divisions during 2012 by their parent companies, PVP 1 Srl, Sorgenia Castelvetero S.r.l. and Sorgenia Ricigliano S.r.l., which were previously accounted for at cost, are now consolidated line-by-line;
- Tecnoparco Valbasento S.p.A., which was previously carried at cost, is now valued at equity.

There was also a change in name during the year:

- Sorgenia France S.a.s. (formerly Sorgenia France Développement S.a.s.)

Note that in June 2012 Sorgenia E&P UK, a Group company that operates in the exploration and production of hydrocarbons and the UK affiliate MPX Energy reached an agreement with the IONA Energy Group for the sale of its shares (35% and 30% respectively) in the oil field known as Orlando (United Kingdom). In light of this agreement, given that the conditions envisaged in IFRS 5 have been satisfied, in the consolidated financial statements at 31 December 2012, the Group has classified the assets held for disposal in a special section of the consolidated statement of financial position.

Media

On 8 December 2012, a joint venture between the Espresso Group and the Huffington Post Media Group was set up to launch an Italian version of the Huffington Post website. At 31 December 2012, the new company, Huffington Post S.r.l., of which the Espresso Group holds 49% of the share capital, was consolidated using the equity method.

Automotive components

The following changes took place in the scope of consolidation during the year:

- the subsidiary Allevard Rejna Autosuspensions S.A. increased its stake in its subsidiary S.ARA Composite S.A.S. through increases in capital from 86.67% to 90% (of the share capital subscribed and effectively paid-in);

- the subsidiary Allevard Rejna Autosuspensions S.A. increased its stake in the subsidiary Allevard IAI Suspensions Pvt Ltd through capital increases from 51% to 54.91%;
- the subsidiary Systèmes Moteurs S.a.s. increased its stake in the subsidiary Systèmes Moteurs S.r.l. from 99% to 99.9997%;
- the subsidiary Sogefi Filtration S.A. increased its stake in the subsidiary Systèmes Moteurs S.r.l. from 0% to 0.0003%;
- Sogefi S.p.A. (sector holding company) increased its stake in the subsidiary Allevard Rejna Autosuspensions S.A. from 99.987% to 99.99%;
- Sogefi S.p.A. established Sogefi (Suzhou) Auto Parts Co. Ltd (China). The company, which is not yet operational at the end of 2012, operates in the field of suspension components and engine systems.

Note that, in accordance with IFRS 3, as explained below in paragraph 2.e. "Business combinations", at 30 June 2012, the Group retrospectively adjusted the provisional amounts recognised at 31 December 2011 related to the acquisition of Systèmes Moteurs in July 2011 to reflect new information on the situation at the date of acquisition.

Lastly, note that the liquidation of the subsidiary Integral S.A. was completed in 2012. This did not involve any change in the scope of consolidation.

There were no further changes in the scope of consolidation during the period.

Healthcare

The following transactions took place in 2012 involving a change in the scope of consolidation:

In the Rehabilitation sector (Istituto di Riabilitazione Santo Stefano S.r.l. and Redancia), the acquisition in May of a 39% interest in Casa Argento S.r.l. for € 650 thousand, thereby reaching 90% of the share capital.

This gave rise to a negative consolidation difference of € 54 thousand, in accordance with international accounting standards (IFRS 3 revised), which has been recorded in a special equity reserve. In December 2012, Casa Argento S.r.l. was merged with Abitare il tempo S.r.l..

In the Care Home sector, Redancia S.r.l., a company that manages homes for the rehabilitation of psychiatric subjects, was merged with Residenze Anni Azzurri S.r.l. in November 2012.

In the Hospital Management sector, Medipass S.r.l. subscribed an increase in capital of Medipass Healthcare Ltd in November 2012. This raised the investment in this company from 65% to 90%. This gave rise to a negative consolidation difference of € 73 thousand, in accordance with international accounting standards (IFRS 3 revised), which has been recorded in a special equity reserve.

In November 2012, Medipass Healthcare Leeds & Belfast Ltd was established as a UK company owned 55% by the indirect subsidiary Medipass Healthcare Ltd.

November 2012 saw the acquisition of HTI Leeds Ltd and HTI Ireland Ltd, which hold important contracts for the management of the technology park at two leading hospitals: the St. James Institute of Oncology (Leeds) and Belfast City Hospital Cancer Centre (Belfast). Both companies are owned 100% by Medipass Healthcare Leeds & Belfast Ltd. The agreed price of € 9,838 thousand gave rise to goodwill of € 8,778 thousand.

In November 2012, Medipass S.r.l. took part in an increase in the share capital of Clearmedi Healthcare Ltd, which diluted the holding of the subsidiary Medipass Healthcare Ltd. The 51% interest previously held by Medipass Healthcare Ltd is now held 24% by Medipass S.r.l. and 27% by

Medipass Healthcare Ltd. This gave rise to a positive consolidation difference of € 40 thousand, in accordance with international accounting standards (IFRS 3 revised), which has been recorded in a special equity reserve.

Other companies

From these consolidated financial statements, Swiss Education Group AG is valued using the equity method, as a result of new agreements that give CIR International S.A. a greater influence over the company.

CIR S.p.A. increased its stake in the associate LLIS Lake Lemman International School S.A. through increases in capital from 49.36% to 66.39%, so from 1 December 2012 it is now consolidated line-by-line.

The following companies were excluded from the scope of consolidation during the second half of 2012: Devil Peak S.r.l. and its subsidiary Foppolo Risorse S.r.l. and Food Concepts Holdings S.A. and its subsidiary Food Concepts Germany GmbH.

Note that Dry Products S.p.A. changed its name to CIR Investimenti S.p.A. during the first half of 2012.

2.e. Business combinations

As mentioned previously, in the first half of 2012 the Group completed the process of determining the fair value of the assets and liabilities acquired from the Systèmes Moteurs Group when it was purchased in July 2011, in accordance with the acquisition method.

The following chart gives a breakdown of the definitive fair values of the assets and liabilities acquired and of the goodwill at the date of acquisition of control (29 July 2011), as well as the corresponding provisional values at 31 December 2011:

(in thousands of euro)

ASSETS	Final fair value	Provisional fair value at 31.12.2011
CURRENT ASSETS		
Cash and cash equivalents	8,311	8,311
Other financial assets	--	--
Inventories	51,395	51,395
Trade receivables	48,193	48,193
Other receivables	3,877	5,307
Tax receivables	4,356	4,356
Other assets	334	334
TOTAL CURRENT ASSETS	116,466	117,896
NON-CURRENT ASSETS		
FIXED ASSETS		
Land	1,006	1,006
Property, plant and equipment	38,129	37,156
Other tangible fixed assets	715	715
Intangible assets	47,570	17,627
Deferred tax assets	87,420	56,504
OTHER NON CURRENT ASSETS		
Investments in associates	274	274
Other receivables	24,320	952
Deferred tax assets	12,304	1,518
TOTAL OTHER NON-CURRENT ASSETS	36,898	2,744
TOTAL NON-CURRENT ASSETS	124,318	59,248
TOTAL ASSETS (A)	240,784	177,144
LIABILITIES	Final fair value	Provisional fair value at 31.12.2011
CURRENT LIABILITIES		
Bank overdrafts and short-term loans	--	--
Current portions of medium/long - term financial debts and other loans	--	--
TOTAL SHORT-TERM FINANCIAL DEBTS	--	--
Other short-term liabilities for derivative financial instruments	--	--
TOTAL SHORT-TERM FINANCIAL DEBTS AND DERIVATIVE FIN. INSTRUMENTS	--	--
Trade and other payables	74,517	69,653
Tax payables	32	32
Other current liabilities	2,887	2,887
TOTAL CURRENT LIABILITIES	77,436	72,572
NON- CURRENT LIABILITIES		
OTHER LONG-TERM LIABILITIES		
Long-term provisions	31,276	4,815
Other payables	1,359	1,359
Deferred tax liabilities	16,771	6,816
TOTAL OTHER LONG-TERM LIABILITIES	49,406	12,990
TOTAL NON-CURRENT LIABILITIES	49,406	12,990
TOTAL LIABILITIES (B)	126,843	85,562
Transferred consideration for the acquisition	146,501	146,501
Net asset acquired (A) - (B)	113,941	91,582
GOODWILL	32,560	54,919
Transferred consideration for the acquisition	146,501	146,501
Cash and cash equivalents owned by the purchased group	(8,311)	(8,311)
CASH FLOW FOR THE ACQUISITION	138,190	138,190

The following is an explanation of the nature and amount of the main adjustments made to the fair value of the assets and liabilities acquired, applicable to the assessment period.

Completion of the process of measuring the fair value of "Plant and machinery" resulted in an increase of € 973 thousand.

Completion of the process of measuring the fair value of "Intangible assets" made it possible to identify the following intangible assets separately:

- Customer Relations: € 19,215 thousand (to be amortised over a useful life of 20 years);
- Patents: € 2,292 thousand (to be amortised over a useful life of 4-5 years);
- Brand name "Systèmes Moteurs": € 8,437 thousand (to be amortised over a useful life of 20 years).

Completion of process of measuring the fair value of contingent liabilities under product warranties made it possible to detect liabilities of € 25,068 thousand, of which € 4,177 thousand recognised in "Trade payables and other payables" (current) and € 20,891 thousand in "Long term provisions" (non-current). At 31 December 2012 these contingent liabilities amounted to € 6,020 thousand. Management is of the opinion that any balance remaining after full or partial insurance compensation and reimbursements from subcontractors ought to be indemnified by the seller of the shares of Systèmes Moteurs S.A.S. The Group has therefore recognised an asset based on such indemnities for an amount of € 23,368 thousand under "Other non-current receivables".

The item "Long term provisions" also includes other liabilities of € 7,000 thousand. The balance contains miscellaneous items including costs for legal proceedings related to the recovery of these "Other non-current receivables".

As a result of the above, the impact of deferred taxation has changed and goodwill has been reduced from € 54,919 thousand to € 32,560 thousand.

3. ACCOUNTING POLICIES

3.a. Intangible assets (IAS 38)

Intangible assets are recognised only if they can be separately identified, if it is likely that they will generate future economic benefits and if the cost can be measured reliably.

Intangible assets with a finite useful life are valued at purchase or production cost net of amortisation and accumulated impairment.

Intangible assets are initially recognised at purchase or production cost. Purchase cost is represented by the fair value of the means of payment used to purchase the asset and any additional direct cost incurred to prepare the asset for use. The purchase cost is the equivalent price in cash at the date of recognition; where payment is deferred beyond normal terms of credit, the difference compared with the cash price is recognised as interest for the whole period of deferment.

Amortisation is calculated on a straight-line basis over the expected useful life of the asset and starts when the asset is ready for use.

Intangible assets *with an indefinite useful life* are not amortised, but monitored constantly for impairment. It is mainly the Espresso Group's newspaper/magazine titles and TV/radio frequencies that are considered intangible assets with an indefinite useful life.

The carrying value of intangible assets is maintained to the extent that there is evidence that this value can be recovered through use; to this end, an impairment test is carried out at least once a year to check that the intangible asset is able to generate future cash flows.

Development costs are recognised as intangible assets when their cost can be measured reliably, when there is a reasonable assumption that the asset can be made available for use or for sale and that it is able to generate future benefits. Once a year or any time it appears to be justified, capitalised costs are impairment tested.

Research costs are charged to the income statement as and when they are incurred.

Trademarks and licences, which are initially recognised at cost, are subsequently accounted for net of amortisation and accumulated impairment. The period of amortisation is defined as the lower of the contractual duration for use of the licence and the useful life of the asset.

Software licences, including associated costs, are recognised at cost and are recorded net of amortisation and any accumulated impairment.

The "customer relationship" represents the value assigned during the purchase price allocation process to the customer portfolio of the Systèmes Moteurs Group at the date of acquisition of control.

The "name" represents the value assigned during the purchase price allocation process to the name "Systèmes Moteurs" at the date of acquisition of control.

Goodwill

In the event of the acquisition of companies, the identifiable assets, liabilities and contingent liabilities acquired are recognised at their fair value as at the acquisition date. The positive difference between the acquisition cost and the Group's share of the fair value of these assets and liabilities is classified as goodwill and recorded in the statement of financial position as an intangible asset. Any negative difference ("badwill") is posted to the income statement at the time of acquisition.

After initial recognition, goodwill is valued at cost less any accumulated impairment. Goodwill always refers to identified income-producing assets, whose ability to generate income and cash flow is monitored constantly for impairment.

See paragraph 3.x. below (Business Combinations and Goodwill).

3.b. Tangible assets (IAS 16)

Tangible assets are recognised at purchase price or production cost, net of accumulated depreciation.

Cost includes associated expenses and any direct and indirect costs incurred at the time of acquisition and needed to make the asset ready for use. Financial charges relating to specific loans for long-term investments are capitalised up to the date when the assets become operational.

When there are contractual or compulsory obligations for decommissioning, removing or clearing sites where fixed assets are installed, the value recognised also includes a discounted estimate of the costs that will be incurred for their disposal.

Fixed assets are depreciated each year on a straight-line basis over the residual useful life of the assets.

Land, assets under construction and advance payments are not subject to depreciation.

Land and buildings not used for corporate operating purposes are classified under a separate asset item and accounted for on the basis of IAS 40 "Investment property" (see paragraph 3.e. below).

In the event of circumstances that suggest that an asset has been impaired, its carrying value is checked against its recoverable value (i.e. fair value or value in use, whichever is the higher). Fair value can be established on the basis of values expressed by an active market, recent transactions or the best information available at the time with a view to determining the potential proceeds of selling the asset. Value in use is determined by discounting the cash flows expected from using the asset, applying best estimates of its residual useful life and a rate that takes into account the implicit risk of the specific business sectors in which the Group operates. This valuation is carried out for each individual asset or for the smallest independent cash generating unit (CGU) that can be identified.

If there is a negative difference between these values and the carrying value, the asset gets written down; if subsequently the reasons for the impairment no longer apply, the asset is revalued. Such write-downs and revaluations are posted to the income statement.

3.c. Government grants

Government grants are recognised when there is a reasonable degree of certainty that the recipient will comply with the conditions for the grant, whether or not there is a formal resolution awarding it; in other words, when it is highly likely that the grant will be received.

Capital grants are recognised in the statement of financial position either as deferred income, which is then transferred to the income statement over the useful life of the asset being financed, thereby reducing the depreciation charge, or by deducting them directly from the asset in question.

Government grants obtainable in the form of a reimbursement of expenses and costs already incurred or to provide immediate support for the recipient without there being any future costs related to the grant, are recognised as income in the period in which they can be claimed.

3.d. Leased assets (IAS 17)

Lease contracts for assets where the lessee substantially assumes all the risks and rewards of ownership are classified as finance leases. Where such finance leases exist, the asset is recognised at the lower of its fair value and the present value of the minimum lease payments stipulated in the contracts. Total lease payments are allocated between the financial element and the capital to be reimbursed in such a way as to obtain a constant rate of interest on the outstanding debt. The residual lease payments, net of financial charges, are classified as borrowings. The interest expense is charged to the income statement over the period of the lease. Assets acquired under finance leases are depreciated to an extent consistent with the nature of the asset. Lease contracts in which the lessor substantially retains the risks and rewards of ownership, on the other hand, are classified as

operating leases and payments made under such leases are charged to the income statement on a straight-line basis over the period of the lease.

In the event of a sale and leaseback agreement, any difference between the selling price and the carrying value of the asset is not recognised to the income statement unless the asset itself suffers an impairment loss.

3.e. Investment property (IAS 40)

Investment property is property (land or a building, or part of a building, or both) held (by the owner or by the lessee under a finance lease) to earn rentals or for capital appreciation or both, rather than for use in the production or supply of goods or services or for administrative purposes, or for sale in the ordinary course of business.

The cost of an investment property is represented by its purchase price, as well as any improvements, replacements and extraordinary maintenance.

For self-constructed investment property, an estimate is made of all costs incurred up to the date on which the construction or development is finished. Until that date, IAS 16 applies.

In the case of an asset held under a finance lease, the initial cost is determined according to IAS 17 as the lower of the fair value of the property and the present value of the minimum lease payments due.

The Group has opted for the cost method to be applied to all investment property held. Under the cost method, the value is measured net of depreciation and any impairment losses.

On disposal or when the asset is permanently withdrawn from use, all related income and expenses must be charged to the income statement.

3.f. Impairment of intangible and tangible assets (IAS 36)

At least once a year the Group verifies whether the carrying value of intangible and tangible assets (including capitalised development costs) are recoverable, in order to determine whether the assets have suffered impairment. If such evidence exists, the carrying value of the assets is reduced to its recoverable value.

An intangible asset with an indefinite useful life is tested for impairment at least once a year; more frequently if there is any sign that it may have suffered a loss in value.

When it is not possible to estimate the recoverable value of an individual asset, the Group estimates the recoverable value of the cash generating unit to which the asset belongs.

The recoverable value of an asset is the higher of its fair value less costs to sell and its value in use.

To determine the value in use of an asset, the Group calculates the present value of estimated future cash flows, applying a discount rate that is consistent with the cash flows and which reflects the current market assessment of the time value of money and the specific risks of the business sector.

An impairment loss is recognised if the recoverable value is lower than the carrying value.

If at a later date the loss on an asset (other than goodwill) no longer exists or is less than it was, the carrying value of the asset or of the cash generating unit is written up to the new estimated recoverable value, though it cannot exceed the value that it would have had if no impairment loss had been recognised. The reversal of an impairment loss is posted immediately to the income statement.

3.g. Other equity investments

Investments in companies where the Parent Company does not exercise a significant influence are accounted for in accordance with IAS 39, which means that they are classified as available for sale and measured at fair value, or at cost if the fair value or market price cannot be reliably estimated.

3.h. Receivables and payables (IAS 32, 39 and 21)

Receivables and payables are initially recognised at their fair value, which usually corresponds to the nominal value. Receivables are adjusted, where necessary, to their estimated realisable value. Subsequently, receivables and payables are measured at amortised cost.

Receivables and payables in foreign currencies are initially accounted for at the rates of exchange in force on the transaction date. They are then adjusted to the period-end exchange rates and any exchange gains and losses are recognised to the income statement (see paragraph 3.u. below).

3.i. Securities (IAS 32 and 39)

In accordance with IAS 32 and IAS 39 investments in companies other than subsidiaries and associates are classified as available for sale and measured at fair value.

Gains and losses resulting from fair value adjustments are recorded in a special equity reserve. In the event of impairment losses or disposal of the securities, the gains and losses previously recognised to equity are transferred to the income statement.

Note that purchases and sales are recognised on the trade date.

This category also includes financial assets bought or issued and then classified either as held for trading or at fair value through profit and loss in application of the fair value option.

For further details of the accounting treatment of financial assets, we would refer readers to the specific note on "Financial Instruments".

3.l. Income taxes (IAS 12)

Current taxes are provided for on the basis of a realistic estimate of taxable income under current tax regulations of the country in which the company is based, taking into account any exemptions and tax credits that may be claimed.

Deferred taxes are calculated on the basis of any temporary differences (taxable or deductible) between the carrying values of assets and liabilities and their tax bases and are classified as non-current assets and liabilities.

A deferred tax asset is recognised to the extent that taxable income will probably be available in the future to offset deductible temporary differences.

The carrying value of deferred tax assets is subject to periodic analysis and is reduced to the extent that it is no longer probable that there will be sufficient taxable income to take advantage of the deferred tax asset.

3.m. Inventories (IAS 2)

Inventories are shown at the lower of weighted average purchase or production cost and their estimated realisable value.

3.n. Cash and cash equivalents (IAS 32 and 39)

Cash comprises cash on hand and demand deposits. Cash equivalents are short-term, highly liquid investments that are readily convertible into cash and which are subject to an insignificant risk of changes in value.

3.o. Equity

Ordinary shares are recorded at their par value. Costs directly attributable to the issuance of new shares are deducted from the equity reserves, net of any related tax benefit.

Treasury shares are shown separately as a deduction from reserves; any subsequent sale, reissuance or cancellation will not have any impact on the income statement, only on equity.

Unrealised gains and losses on financial assets classified as "available for sale" are recognised, net of tax, under equity in the fair value reserve.

The reserve is reversed to the income statement when the financial asset is realised or impairment to it is recognised.

The hedging reserve is formed when fair value changes are recognised on derivatives which have been designated as "cash flow hedges" or "hedges of net investments in foreign operations" for the purposes of IAS 39.

The portion of gains and losses considered "effective" is recognised to equity and is reversed to the income statement as and when the elements being hedged are in turn recognised to the income statement, or when the subsidiary is sold.

When a subsidiary prepares its financial statements in a currency different from the Group's functional currency, the subsidiary's financial statements are translated and any translation differences are recognised in a special reserve. When the subsidiary is sold the reserve is reversed to the income statement, accounting for any gains or losses on the disposal.

"Retained earnings (losses)" include accumulated earnings and balances transferred from other reserves when these are released from any previous limitations.

This item also shows the cumulative effect of any changes in accounting principles and/or the correction of errors, which are accounted for in accordance with IAS 8.

3.p. Borrowings (IAS 32 and 39)

Loans are initially recognised at cost, represented by their fair value net of any transaction costs incurred. Subsequently, borrowings are measured at amortised cost calculated by applying the effective interest rate method, taking into consideration any issuance costs incurred and any premium or discount applied at the time the instrument is settled.

3.q. Provisions for risks and losses (IAS 37)

Provisions for risks and losses refer to liabilities which are probable, but where the amount and/or maturity is uncertain. They are the result of past events which will cause a future cash outflow. Provisions are recognised exclusively in the presence of a current obligation to third parties, whether legal or implicit, which implies an outflow and when a reliable estimate of the amount involved can be made. The amount recognised as a provision is the best estimate of the disbursement required to settle the obligation as at the reporting date. The provisions recognised are reviewed at the close of each accounting period and adjusted to represent the best current estimate. Changes in estimates are recognised to the income statement.

When the estimated outflow relating to the obligation is expected in a time horizon longer than normal payment terms and the discount factor is significant, the provision represents the present value, discounted at a nominal risk-free rate, of the expected future outflows to settle the obligation.

Contingent assets and liabilities (potential assets and liabilities, or those not recognised because no reliable estimate can be made) are not recognised. However, adequate disclosure on such items is provided.

3.r. Revenue and income (IAS 18)

Revenues from the sale of goods are recognised at the time ownership and the risks related to the goods are transferred, net of returns, discounts and rebates.

Service revenues are recognised at the time the service is provided, based on its stage of completion at the reporting date.

Income from dividends, interest and royalties is recognised as follows:

- dividends, when the right to receive payment is established (with a balancing entry under receivables when distribution is approved);
- interest, using the effective interest rate method (IAS 39);
- royalties, on an accrual basis, in accordance with the underlying contractual agreement.

3.s. Employee benefits (IAS 19)

Benefits to be paid to employees on termination of their employment and other long term benefits are subject to actuarial valuation.

Following this methodology, liabilities recognised represent the present value of the obligation adjusted for any actuarial gains or losses not accounted for.

Italian Financial Law no. 296/2006 made important changes to employee leaving indemnity (TFR) regulations, introducing the option for workers to transfer their indemnity maturing after 1 January 2007 to selected pension schemes. Therefore, all employee leaving indemnity accrued as at 31 December 2006 for employees who exercised this option, while remaining within the sphere of defined benefit plans, was determined using actuarial methods that exclude the actuarial/financial components relating to future changes in salary. Given that this new method of calculation reduces the volatility of actuarial gains and losses, the decision was made to abandon the corridor method and recognise all actuarial gains and losses to the income statement.

IFRS 2 "Share-based Payment" issued in February 2005 with validity from 1 January 2005 (revised version effective 1 January 2010) requires that application should be retrospective in all cases where stock options were assigned after 7 November 2002 and where the vesting conditions of the plans had not yet matured at the effective date.

In accordance with this standard, the CIR Group now measures and recognises the notional cost of stock options to the income statement under personnel costs and apportions them throughout the vesting period of the benefit, with a balancing entry in the appropriate equity reserve.

The cost of the option is determined at the assignment date of the plan, applying special models and multiplying by the number of options exercisable over the reference period, assessed with the aid of appropriate actuarial variables.

Similarly, the cost resulting from the assignment of phantom stock options is determined in relation to the fair value of the options at the assignment date and is recognised to the income statement under personnel costs over the vesting period of the benefit; unlike for stock options, the balancing entry is recorded under liabilities (other personnel provisions) and not in an equity reserve. Until this liability is extinguished its fair value is recalculated at each reporting date and on the date of actual disbursement and all fair value changes are recognised to the income statement.

3.t. Derivatives (IAS 32 and 39)

Derivatives are measured at fair value.

The Group uses derivatives mainly to hedge risks, in particular interest rate, foreign exchange and commodity price risks. Classification of a derivative as a hedge is formally documented, stating the effectiveness of the hedge.

For accounting purposes hedging transactions are classified as:

- *fair value hedges* – where the effects of the hedge are recognised to the income statement;
- *cash flow hedges* – where the fair value change of the effective portion of the hedge is recognised directly to equity, while the non-effective part is recognised to the income statement;
- *hedges of a net investment in a foreign operation* – where the fair value change of the effective portion of the hedge is recognised directly to equity, while the non-effective part is recognised to the income statement.

Trading in derivatives with commodities as their underlying, carried on by Sorgenia as part of its normal day-to-day activities, is represented by showing the positive and negative fair values of such transactions in “Other receivables” and “Other payables” with the net result being shown in a single item in the income statement.

3.u. Foreign currency translation (IAS 21)

The Group's functional currency is the euro and this is the currency in which its financial statements are prepared. Group companies prepare their financial statements in the currencies used in their respective countries.

Transactions carried out in foreign currencies are initially recognised at the exchange rate on the date of the transaction.

At the reporting date, monetary assets and liabilities denominated in foreign currencies are translated at the exchange rate prevailing on that date.

Non-monetary items measured at historical cost in a foreign currency are translated using the exchange rate prevailing on the date of the transaction.

Non-monetary items measured at fair value are translated using the exchange rate at the date on which the carrying values were measured.

The assets and liabilities of Group companies whose functional currency is not the euro are measured as follows:

- assets and liabilities are translated using the exchange rate prevailing at the reporting date;
- costs and revenues are translated using the average exchange rate for the period.

Exchange rate differences are recognised directly to a special equity reserve.

Should an investment in a foreign operation be sold, the accumulated exchange rate differences recognised in the equity reserve are reversed to the income statement.

3.v. Non-current assets held for sale (IFRS 5)

A non-current asset is held for sale if its carrying value will be recovered principally through a sale rather than through its use in the business. For this condition to be satisfied the asset must be immediately saleable in its present condition and a sale must be considered highly likely.

Assets or groups of discontinued assets that are classified as held for sale are valued at the lower of their carrying value and the expected realisable value, less costs to sell.

Individual assets or those that form part of a group classified as held for sale are not depreciated.

Presentation of these assets in the financial statements involves showing the after-tax income and losses resulting from the sale on a separate line in the income statement. Similarly, the assets and liabilities have to be shown on a separate line in the statement of financial position.

3.w. Earnings per share (IAS 33)

Basic earnings per share are determined by dividing net income attributable to the ordinary shareholders of the parent company by the weighted average number of ordinary shares in circulation during the period.

Diluted earnings per share are calculated by adjusting the weighted average number of ordinary shares in circulation to take into account all potential ordinary shares, for example deriving from the possible exercise of assigned stock options that could have a dilutive effect.

3.x. Business combinations and Goodwill

Business acquisitions are recognised using the purchase and acquisition method in compliance with IFRS 3, on the basis of which the acquisition cost is equal to the fair value on the date of exchange of the assets transferred and the liabilities incurred or assumed. Any transaction costs relating to business combinations are recognised to the income statement in the period they are incurred.

Contingent consideration is included as part of the transfer price of the net assets acquired and is measured at fair value at the acquisition date. Similarly, if the business combination agreement envisages the right to receive repayment of certain elements of the price if certain conditions are met, this right is classified as an asset by the acquirer.

Any subsequent changes in this fair value are recognised as an adjustment to the original accounting treatment only if they are the result of more or better fair value information and if this takes place within twelve months of the acquisition date; all other changes must be recognised to the income statement.

In the event of a step acquisition of a subsidiary, the minority interest previously held (recognised up to that point according to IAS 39 – *Financial Instruments: Recognition*, IAS 28 – *Investments in Associates* or IAS 31 – *Investments in Joint Ventures*) is treated as if it had been sold and repurchased at the date that control is acquired. The investment is therefore measured at its fair value on the date of “transfer” and any gains and losses resulting from this measurement are recognised to the income statement. Moreover, any amount previously recognised in equity as “Other comprehensive gains and losses”, is reclassified to the income statement following the sale of the asset to which it refers. The goodwill (or income in the case of badwill) arising on conclusion of the deal with subsequent acquisition is calculated as the sum of the price paid for the acquisition of control, the value of minority interests (measured using one of the methods permitted by the accounting standard) and the fair value of the minority interest previously held, net of the fair value of the identifiable net assets acquired.

The identifiable assets, liabilities and contingent liabilities of the acquired business which meet the conditions for recognition are accounted for at their fair value on the date of acquisition. Any positive difference between the acquisition cost and the fair value of the Group's share of net assets acquired is recognised as goodwill or, if negative, charged to the income statement. After initial recognition, goodwill is measured at cost less any accumulated impairment. Goodwill always refers to identified income-generating assets, whose ability to generate income and cash flows is constantly monitored for impairment.

The accounting treatment of the acquisition of any further investment in companies already controlled are considered transactions with shareholders and therefore any differences between acquisition costs and the carrying value of the minority interests acquired are recognised in Group equity. Likewise, sales of minority interests not involving loss of control do not generate gains/losses in the income statement, but rather changes in Group equity.

The initial allocation to assets and liabilities as mentioned above, using the option given in IFRS 3, can be performed on a provisional basis by the end of the year in which the transaction is completed; the values provisionally assigned on initial recognition can be adjusted within twelve months of the date on which control was acquired.

3.y. Use of estimates

The preparation of financial statements and explanatory notes in accordance with IFRS requires management to make estimates and assumptions which affect the values of the assets and liabilities shown in them, as well as the disclosures made regarding contingent assets and liabilities as of the reporting date.

The estimates and assumptions used are based on experience and other factors considered relevant. The actual results could differ from these estimates. Estimates and assumptions are revised periodically and the effects of any changes made to them are reflected in the income statement for the period in which the amendment is made if the revision only affects that period, or subsequent periods as well if the amendment affects both the current and future years.

The items mainly affected by this use of estimates are goodwill, deferred taxes, provisions for risks and losses and the fair value of financial instruments, stock options, phantom stock options and stock grants.

See the notes on these specific items for further details.

4. FINANCIAL INSTRUMENTS

Financial instruments take on a particular significance in the economic and financial structure of the CIR Group. For this reason, management felt that it would be useful to devote a special section to accounting standards IAS 32 and IAS 39, to help readers understand better the financial issues involved.

According to IAS 32 financial instruments are classified into four categories:

- a) Financial instruments at fair value through profit and loss (FVTPL) in application of the fair value option: either designated as such or held for trading;
- b) Investments held to maturity (HTM);
- c) Loans and receivables (L&R);
- d) Available-for-sale financial assets (AFS).

Classification depends on the intended use of the financial instrument within the context of the company's financial management and each involves a different type of measurement for accounting purposes. Financial transactions are recognised on the basis of their value date.

Financial instruments at fair value through profit and loss

Financial instruments are classified as such if they satisfy one of the following conditions:

- they are held for trading;
- they are designated as such under the fair value option, on the assumption that the fair value can be reliably determined.

Trading generally means frequent buying and selling with the aim of generating profit on short-term price fluctuations.

Derivatives are included in this category unless they are designated as hedge instruments.

The initial designation of financial instruments, other than derivatives and those held for trading, as instruments at fair value through profit and loss under the fair value option is limited to those that meet the following conditions:

- a) designation under the fair value option eliminates or significantly reduces an accounting mismatch;
- b) a group of financial assets, financial liabilities or both are managed and their performance is measured on a fair value basis in accordance with a documented investment risk strategy, and;
- c) an instrument contains an embedded derivative which meets particular conditions.

The designation of an individual instrument to this category is final, it is made at the time of initial recognition and cannot be modified.

Investments held to maturity

This category includes non-derivative instruments with fixed or determinable payments and a fixed maturity, which the company intends and is able to hold to maturity.

These instruments are measured at amortised cost and constitute an exception to the general principle of measurement at fair value.

Amortised cost is determined by applying the effective interest rate of the financial instrument, taking into account any discounts received or premiums paid at the time of purchase, and recognising them throughout the entire life of the instrument until its maturity.

Amortised cost represents the initial recognition value of a financial instrument, net of any capital repayments and any impairment, plus or minus cumulative differences between its initial value and its value at maturity calculated using the effective interest rate method.

The effective interest rate method is a way of calculating the financial charges to be assigned to a particular period.

The effective interest rate is the rate that gives a correct present value to expected future cash flows until maturity, so as to obtain the net present carrying value of the financial instrument.

If even only one instrument belonging to this category is sold before maturity, for a significant amount and where there is no special justification for its disposal, the so-called "tainting rule" gets applied: this requires that the whole portfolio of securities classified as Held To Maturity be reclassified and measured at fair value, after which this category cannot be used for the next two years.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and which are not held for trading. The category includes trade receivables (and payables).

Measurement of these instruments, except for those classified as current assets or liabilities (up to twelve months), is made by applying the amortised cost method, using the effective interest rate and taking into account any discounts received or premiums paid at the time of acquisition and recognising them throughout the entire life of the instrument until its maturity.

Available-for-sale financial assets

This is a "residual" category which includes non-derivative financial instruments that are designated as available for sale and not included in any of the previous categories.

Available-for-sale financial instruments are recognised at their fair value plus any transaction costs.

Gains and losses are recognised to a separate equity item until the financial instruments are sold or suffer impairment. In such cases, the gains and losses accrued to equity up to that point are released to the income statement.

Fair value is the price at which an asset can be traded or a liability settled between knowledgeable, willing parties in an arm's-length transaction.

In the case of securities listed on regulated markets, the fair value is the bid price at the close of trading on the last day of the reporting period.

Where no market prices are available, fair value is determined either on the basis of the fair value of a substantially similar financial instrument or by using appropriate financial techniques (e.g. discounted cash flow).

Investments in financial assets can only be derecognised (i.e. eliminated from the financial statements) when the contractual rights to receive their respective financial cash flows have expired or when the financial asset is transferred to third parties together with all associated risks and benefits.

5. ACCOUNTING STANDARDS, CHANGES IN ACCOUNTING ESTIMATES AND ERRORS

The criteria for making estimates and measurements are reviewed periodically, based on historical experience and other factors such as expectations of possible future events that are reasonably likely to take place.

If first-time application of a standard affects the current year or the previous one, the effect is shown by indicating the change caused by any transitional rules, the nature of the change, a description of the transitional rules, which may also affect future years, and the amount of any adjustments to years prior to those being presented.

If a voluntary change of a standard affects the current or previous year, the effect is shown by indicating the nature of the change, the reasons for adopting the new standard, and the amount of any adjustments to years prior to those being presented.

In the event of a new standard or interpretation issued but not yet in force, an indication is given of the fact, its potential impact, the name of the standard or interpretation, the date on which it will come into force and the date of its first-time application.

A change in accounting estimate involves giving an indication of the nature and impact of the change. Estimates are used mainly in the recognition of asset impairment, provisions for risks, employee benefits, taxes and other provisions and allowances. Estimates and assumptions are reviewed regularly and the effects of any such changes are reflected in the income statement.

Lastly, the treatment of accounting errors involves an indication of the nature of the error and the amount of the adjustments to be made at the beginning of the first reporting period after they were discovered.

6. ADOPTION OF NEW ACCOUNTING STANDARDS, INTERPRETATIONS AND AMENDMENTS

Accounting standards, amendments and interpretations of IFRS applied in 2012

The following accounting standards, amendments and interpretations were applied for the first time by the Group with effect from 1 January 2012:

On 7 October 2010, the IASB issued amendments to IFRS 7 - Financial Instruments: Disclosures. The amendments were issued to improve the information provided on the derecognition of financial assets. In fact, the amendments require greater transparency on the company's exposure to risks in the case of transactions in which a financial asset has been transferred, but the transferor retains some form of continuing involvement in the asset. The amendments also require further disclosure if a disproportionate amount of such transactions are executed towards the end of an accounting period. Adoption of this amendment did not have any impact on the Group's disclosures.

Accounting standards, amendments and interpretations effective from 1 January 2012 but not applicable to the Group

On 20 December 2010, the IASB issued a minor amendment to IAS 12 - Income Taxes, which requires entities to determine the deferred taxes resulting from investment property measured at fair value according to the way in which the carrying value of the asset will be recovered (through continued use or through sale). Specifically, the amendment establishes a rebuttable presumption that the carrying amount of an investment property measured at fair value in accordance with IAS 40 will be recovered entirely through sale and that the determination of deferred taxes in jurisdictions where the tax rates are different should reflect the rate on property sales.

Accounting standards, amendments and IFRS and IFRIC interpretations endorsed by the European Union, but not yet applicable and not adopted early by the Group

- On 12 May 2011, the IASB issued IFRS 10 - Consolidated Financial Statements, which will replace SIC-12 Consolidation - Special Purpose Entities and parts of IAS 27 - Consolidated and Separate Financial Statements, which will be renamed Separate Financial Statements and govern the accounting treatment of investments in separate financial statements. The principal changes introduced by the new standard are as follows:
 - According to IFRS 10 there is a single basic principle to consolidate all types of entities, and this principle is based on control. This change removes the perceived inconsistency between the previous IAS 27 (based on control) and SIC 12 (based on the transfer of risks and benefits);
 - A more solid definition of control than in the past has been introduced, based on three elements: (a) power over the company acquired; (b) exposure, or rights, to variable returns from involvement with the company; (c) the ability to use this power to influence the amount of such returns;
 - IFRS 10 requires an investor to assess whether it has control over the company acquired by focusing on the activities that significantly affect its returns;
 - When assessing whether control exists, the investor is required by IFRS 10 to consider only substantive rights, i.e. those that can be exercised when important decisions have to be taken regarding the company acquired;
 - IFRS 10 provides practical guidance to assist in assessing whether control exists in complex situations, such as de facto control, potential voting rights, situations in which it is necessary to determine whether the person who has the decision-making power is acting as an agent or principal, etc.

Generally speaking, the application of IFRS 10 requires a significant degree of judgement with regard to various aspects involved in its implementation.

The standard is applicable retrospectively from 1 January 2014. The Group has determined that the impact of this new standard on the scope of consolidation is not significant.

- On 12 May 2011, the IASB issued IFRS 11 - Joint Arrangements, due to replace IAS 31 - Interests in Joint Ventures and SIC-13 - Jointly Controlled Entities - Non-monetary contributions by venturers. Without prejudice to the criteria for identifying the presence of a jointly controlled entity, the new standard provides criteria for the accounting treatment of joint arrangements by focusing on the rights and obligations arising from such arrangements, rather than on their legal form; it also requires a single method of accounting for investments in joint ventures in the consolidated financial statements, i.e. the equity method. According to IFRS 11, the existence of a separate vehicle is not sufficient to classify a joint arrangement as a joint venture. The new standard is applicable retrospectively from 1 January 2014. Following the issuance of this standard, IAS 28 - Investments in Associates has been amended to include investments in joint ventures within its scope of application from the effective date of the standard. The Group has not yet carried out an analysis of the effects of this new standard on the scope of consolidation.

- On 12 May 2011, the IASB issued IFRS 12 - Disclosure of Interests in Other Entities, which is a new and comprehensive standard on the information to be provided in the consolidated financial statements on each type of investment, including those in subsidiaries, joint arrangements, associates, special purpose entities and other vehicle companies that are not consolidated. The standard is applicable retrospectively from 1 January 2014.
- On 12 May 2011, the IASB issued IFRS 13 - Fair Value Measurement, which explains how to determine fair value for accounting purposes and applies to all cases in which the standards that require or permit fair value measurement or presentation of information based on fair value, with limited exceptions. The standard also requires more detailed disclosures on certain aspects of fair value measurement, such as the fair value hierarchy, than is currently required by IFRS 7. The principle is applicable prospectively from 1 January 2013.
- On 16 December 2011, the IASB issued amendments to IAS 32 - Financial Instruments: Presentation to clarify the application of certain criteria for the offsetting of the financial assets and liabilities referred to in IAS 32, effectively making it more difficult. The amendments will apply retrospectively to accounting periods beginning on or after 1 January 2014.
- On 16 December 2011, the IASB issued amendments to IFRS 7 - Financial Instruments: Disclosures. The amendment requires information on the effects or potential effects of offsetting financial assets and liabilities on a company's statement of financial position. The amendments will apply to accounting periods beginning on or after 1 January 2013. The disclosures have to be provided retrospectively.
- On 16 June 2011, the IASB issued an amendment to IAS 1 - Presentation of Financial Statements requiring companies to group together all their components of "Other comprehensive income" (OCI) according to whether or not they can later be reclassified to the income statement. The amendment is applicable to accounting periods beginning on or after 1 July 2012.
- On 16 June 2011, the IASB issued an amendment to IAS 19 - Employee Benefits, which eliminates the option to defer the recognition of actuarial gains and losses under the corridor method, requiring that all actuarial gains and losses be recognised immediately in "Other comprehensive income" so that the full net amount of provisions for defined benefit plans (net of plan assets) must be included in the consolidated statement of financial position. The amendments also provide that changes in the defined benefit fund and plan assets between one year and the next have to be divided into three components: cost components related to work performed during the period have to be recorded in the income statement as "service costs"; net financial charges, calculated by applying an appropriate discount rate to the provision for defined benefit plans, net of plan assets, at the beginning of the year, have to be included in the income statement as such, and gains and losses arising from remeasurement of the assets and liabilities have to be included in "Other comprehensive income". In addition, the return on the assets included in net financial charges as indicated above has to be calculated on the discount rate of the liability rather than the expected return on the assets. The amendments also introduce new disclosures to be provided in the notes to the financial statements. The amendment is applicable retrospectively from the year beginning on or after 1 January 2013.

A reasonable estimate of the effects of these changes in accounting standard to the balances at 31 December 2012 amount of approximately € 21.8 milioni.

The Group has not yet completed its analysis of the impact of applying the new standard on the net result for the year.

- October 2011 saw the publication of IFRIC 20 Stripping Costs in the Production Phase of a Surface Mine, which applies to the costs of waste removal that are incurred in surface mining activities

during the production phase of the mine. This Interpretation applies to the accounting years beginning on or after 1 January 2013.

Accounting standards, amendments and interpretations of IFRS not yet endorsed by the European Union

At the date of these consolidated financial statements, the competent bodies of the European Union had not yet completed the endorsement process necessary for the adoption of the following amendments and standards.

- On 12 November 2009, the IASB published IFRS 9 - Financial Instruments: this standard was subsequently amended on 28 October 2010. The new standard, which is applicable retrospectively from 1 January 2015, represents the initial phase of a project designed to replace IAS 39. It introduces new criteria for classifying and measuring financial assets and liabilities. More specifically, the new standard uses a single approach based on how financial instruments are managed and on the characteristics of the contractual cash flows of financial assets to determine how they should be measured, replacing the various different rules envisaged in IAS 39. For financial liabilities, on the other hand, the main change concerns the accounting treatment of changes in the fair value of a financial liability designated at fair value through profit and loss, when they are due to a change in the credit rating of the said liability. According to the new standard such changes have to be recognised to "Other comprehensive income" and will no longer pass through the income statement.

Phases two and three of the project on financial instruments, which relate to impairment of financial assets and hedge accounting, are still in progress. The IASB is also considering minor improvements to IFRS 9 for the part relating to the classification and measurement of financial assets.

- On 17 May 2012, the IASB published its Annual Improvements to IFRSs: 2009-2011 Cycle, which includes changes to international accounting standards as part of their annual improvement, focusing on changes that are considered necessary, but not urgent. The following are those that will lead to a change in the presentation, recognition and measurement of financial statement items, excluding those that will only involve a change in terminology or editorial adjustments with a minimal impact on the accounts. Then there are those that affect standards or interpretations that are not applicable to the Group:
 - IAS 1 - Presentation of Financial Statements - Comparative information: this clarifies that if additional comparative information is provided, it has to be presented in accordance with IAS/IFRS. In addition, it clarifies that if a company changes an accounting policy or makes a retrospective adjustment or reclassification, it should also present a statement of financial position at the beginning of the comparative period (a "third statement of financial position" in the financial statements), whereas the notes do not have to include comparative disclosures also for this "third statement of financial position", apart from the specific items concerned.
 - IAS 16 Property, plant and equipment - Classification of servicing equipment: this clarifies that servicing equipment has to be classified as property, plant and equipment if it used for more than one year, otherwise as inventory.
 - IAS 32 Financial Instruments: Presentation - Tax effect on distributions to holders of equity instruments and transaction costs relating to equity instruments: this clarifies that the income taxes involved in these circumstances follow the rules of IAS 12.
 - IAS 34 Interim Financial Reporting - Total assets of a reportable segment: this clarifies that total assets only have to be reported if this information is regularly provided to the chief operating decision maker of the entity and there has been a material change in the total assets of the segment compared with the previous annual report.The effective date of the proposed changes is scheduled for the years beginning on or after 1 January 2013, with earlier application permitted.

- On 28 June 2012, the IASB published Consolidated Financial Statements, Joint Arrangements and Disclosure of Interests in Other Entities: Transition Guidance (Amendments to IFRS 10, IFRS 11 and IFRS 12). To start with, this document sets out to clarify the Board's intentions with reference to the transition rules of IFRS 10 Consolidated Financial Statements. The document explains that, for an entity with a fiscal year that coincides with the calendar year that intends to apply IFRS 10 for the first time in its financial statements for the year ended 31 December 2013, the date of initial application will be 1 January 2013.

In the event that the conclusions on the scope of consolidation according to IFRS 10 at the date of initial recognition are the same as they were according to IAS 27 and SIC 12, the entity will not have any obligation. Similarly, no obligation will arise if the investment was sold during the comparative period (and as such no longer exists at the date of initial application).

The document also aims to clarify how an investor might retrospectively adjust the comparative period(s) if the conclusions on the scope of consolidation according to IFRS 10 at the date of initial recognition are not the same as they were according to IAS 27 and SIC 12. In particular, when a retrospective adjustment as defined above is not feasible, an acquisition/disposal will be recorded at the beginning of the comparative period being presented, with a consequent adjustment recognised in retained earnings.

In addition, the Board amended IFRS 11 Joint Arrangements and IFRS 12 Disclosure of Interests in Other Entities to provide a similar concession for the presentation or amendment of comparative information for the "immediately preceding period" (i.e. the comparative period presented in the financial statements). Another amendment has been made to IFRS 12 limiting the requirement to present comparative information for disclosures relating to non-consolidated 'structured entities' in periods prior to the date of application of IFRS 12.

Intangible assets rose from € 1,500,545 thousand at 31 December 2011 to € 1,501,522 thousand at 31 December 2012

AMORTISATION RATES

<i>Description</i>	<i>%</i>
Capitalised development costs	20-33%
Industrial patents and intellectual property rights	4-20%
Concessions, licences, trademarks and similar rights	16-30%
DTV frequencies	5%
Other intangible assets	16-30%

GOODWILL, TRADEMARKS AND OTHER ASSETS WITH AN INDEFINITE USEFUL LIFE

A more detailed analysis of the main items making up intangible assets with an indefinite useful life is given in the following charts.

Titles and trademarks:

<i>(in thousands of euro)</i>	<i>31.12.2012</i>	<i>31.12.2011</i>
la Repubblica	229,952	229,952
Finegil Editoriale Nord-Est	114,121	114,121
Local newspapers	55,001	55,001
Deejay brand	1,171	1,171
Total	400,245	400,245

During 2012 the Espresso Group completed a number of important corporate transactions and organisational changes, which in recent years have led the Espresso Group towards a more marked divisional structure that principally involves the centralisation of strategic decisions relating to each area of activity. These transactions, which mainly concerned the area of local newspapers, led to various changes that meant changing the scope of some of the cash-generating units ("CGUs") for local publishing titles which previously constituted individual CGUs. To be precise, the figures for the "Alto Adige-Trentino" CGU have been considered together with those of the "Finegil Editoriale Nord-Ovest" CGU; the figures for the "Messaggero Veneto" and "Il Piccolo" CGUs have been considered together with those of the "Finegil Editoriale Nord-Est" CGU; and the figure for the "Free Press" CGU has been considered together with that of the "Finegil Centro-Sud" CGU. In the above table, "Local newspapers" includes the figures for the following CGUs which have been grouped together: Finegil Editoriale Nord-Ovest, Finegil Editoriale Centro-Sud, Finegil Editoriale Livorno and La Nuova Sardegna.

Frequencies:

<i>(in thousands of euro)</i>	<i>31.12.2012</i>	<i>31.12.2011</i>
Radio frequencies	83,728	83,728
Television frequencies	--	138,283
Total	83,728	222,011

During 2012, the DTV frequencies held by the Editoriale L'Espresso Group were reclassified to "Other intangible assets with a definite useful life", based on the consideration that the concession granted on 28 June 2012 to use certain DTV frequencies lasts for 20 years. The useful life of these assets was therefore set at 20 years.

Goodwill:

<i>(in thousands of euro)</i>	<i>31.12.2012</i>	<i>31.12.2011</i>
Energy sector (Sorgenia Group)	252,559	254,159
Media Sector (Editoriale L'Espresso Group)	140,337	140,337
Healthcare sector (Kos Group)	173,279	166,914
Automotive sector (Sogefi Group)	128,638	128,637
Total	694,813	690,047

Note that, in relation to the Sogefi Group, the balance at 31 December 2011 was restated on completion of the Purchase Price Allocation of Systèmes Moteurs S.A.S.

Goodwill has been allocated to the CGUs that were identified in the same way that management of the Parent Company operates and manages its assets, based on the Group's operating sectors. The above chart shows the allocation of goodwill by Group operating sector.

For the purpose of impairment testing of goodwill and other intangible assets with an indefinite useful life, the estimated recoverable value of each CGU, defined in accordance with IAS 36 and taking into consideration the guidelines contained in the paper issued by the OIV, was based on its value in use, i.e. fair value less costs to sell.

Value in use was calculated by discounting to present value future cash flows generated by the unit in the production phase and at the time of its disposal, using an appropriate discount rate (*discounted* cash flow or DCF method). More specifically, in accordance with what is required by international accounting standards, to test the value, cash flows were considered without taking into account inflows and outflows generated by financial management or any cash flows relating to tax management. The cash flows to be discounted are therefore distinctive, unlevered operating cash flows (as they refer to individual units).

The cash flows of the single operating units were extrapolated from the budgets and forecasts made by management. These plans were then processed on the basis of economic trends recorded in previous years and using the forecasts made by leading analysts on the outlook for the respective markets and more in general on the evolution of each business sector.

To give a fair estimate of a CGU's value in use, we had to assess its expected future cash flows, expected changes in the amount and timing of these flows, the discount rate to be used and any other risk factors affecting the unit.

In order to determine the discount rate to be used, we calculated the weighted average cost of capital (WACC) invested at sector level, regardless of the financial structure of the individual company or subgroup. More specifically, the discount rate used for the Media sector was determined gross of tax (pre-tax WACC), whereas for the other sectors the after-tax WACC was used, thereby expressing future cash flows on a consistent basis in these cases. The values used to calculate WACC (taken from leading financial sources) were the following:

- financial structure of the sector;
- unlevered beta for the sector;
- risk-free rate (average for the last calendar half-year on 10-year Italian government securities);
- risk premium: 5.5%.

The fair value less costs to sell of an asset or group of assets (e.g. a CGU) is best expressed in the price established by a "binding sale agreement in an arm's length transaction", net of any direct

disposal costs. If this information was not available, the fair value net of costs to sell was determined in relation to the following trading prices, in order of importance:

- the current price traded on an active market;
- prices for similar transactions executed previously;
- the estimated price based on information obtained by the company.

For estimating the recoverable value of each asset the higher of fair value less costs to sell and value in use was used.

The impairment tests carried out on goodwill and other intangible assets with an indefinite useful life using the cash flow method and other valuation methods ascertained that there were no impairment losses.

However, considering that the recoverable value is determined on the basis of estimates, the Group cannot guarantee that goodwill will not be impaired in future periods. Given the current context of market crisis, the various factors used to make the estimates could be revised if conditions prove not to be in line with those on which the forecasts were based.

The following is an explanation of the tests that we carried out.

Media Sector

The impairment test on the Media sector, which coincides with the Espresso Group's scope of consolidation, was applied to intangible assets with an indefinite useful life, i.e. titles and trademarks, with a carrying amount of € 400.2 million, radio frequencies, with a carrying amount of € 83.7 million, and the goodwill allocated to the sector for a total of € 140.3 million. This goodwill represents the higher value of acquisition costs compared with the Group's share of the relative assets and liabilities, measured at fair value. With regard to intangible assets with indefinite useful lives other than goodwill, impairment tests have been carried out by considering the respective carrying amount and recoverable value separately for each CGU.

In addition, as required by IAS 36, digital TV frequencies were subjected to impairment tests and reclassified to intangible assets with a definite useful life under "Concessions, licences, trademarks and similar rights" during 2012.

The following is the principal information used to prepare the impairment test for each CGU or group of CGUs with a significant value:

- for national (La Repubblica) and local newspapers, the value in use criterion was used;
- for radio frequencies and the DeeJay brand, the fair value criterion was used;
- for DTV frequencies and goodwill relating to the television sector, the fair value criterion was used.

More specifically, to determine the value in use of the CGUs, the procedure involved applying:

- the DCF model, discounting analytically the cash flows expected over the time frame of the business plans (2013-2017) and calculating the terminal value.

The discount rate used was the Espresso Group's pre-tax WACC, namely 11.34% (11.49% in 2011).

- fair value less costs to sell, determined using a different methodological approach for the publishing businesses as opposed to the radio/TV businesses. In the case of the publishing businesses, given that there is no active trading market, we used direct valuation multipliers (Enterprise Value/Sales, Enterprise Value/EBITDA, Enterprise Value/EBIT). For the radio/TV businesses, on the other hand, we used a price/users type of multiple (Enterprise

Value/Population reachable by the signal), observing transfer prices for similar frequencies in relation to the population potentially reachable by the signal.

In order to determine the possible "price" of the Publishing CGU, we used entity side multipliers, either in the trailing version (historical/current multipliers) or in the leading version (expected/average multipliers).

We estimated the fair value less costs to sell of the radio and television units on the basis of transfer prices for similar frequencies to those being tested in relation to the population potentially reachable by the signal. The use of this valuation approach makes it possible to estimate the fair value of radio and television frequencies, correlating the price that the market is prepared to pay for the frequency with the number of inhabitants reachable by the signal.

To determine the economic results and operating cash flows of the Espresso Group, we made reference to the business plans for the period 2013-2017 prepared by management on the basis of reasonable hypotheses in line with past evidence, in the absence of a multi-year plan formally approved by the Board of Directors.

These plans represent the best estimate of the economic conditions likely to exist in the period under consideration. The first year of the plans corresponds to the budget prepared for 2013, as approved by the Board of Directors of Gruppo Editoriale L'Espresso on 31 January 2013.

Compared with the previous year, the current situation of uncertainty in the short and medium term scenario led management to carefully reconsider the expected growth rates for revenues and margins.

As regards advertising revenues, a further 10.2% decline in the advertising market has been assumed for 2013, which takes into account the impact on the entire year of the cuts in advertising expenditure seen in the second half of 2012 and a further reduction in investment due to the persistence of the recession. Assuming that the share held by individual media moves in line with what we have seen in recent years, this is likely to result in the following trends: -16% for the press, -12% for radio, -10% for television and +8% for the Internet.

In this general context, for 2013 we have assumed a trend in advertising on the Espresso Group's media similar to what we have assumed for the specific market segments, with a slight increase in shares for newspapers and the Internet thanks to steps taken to relaunch or maintain products. For the remaining years of the plan, we have assumed a further decline in press advertising of around 3-5% per year on average; this decrease is partially offset by strong growth on the part of Internet advertising.

As regards circulation revenues, the 2013-2017 business plan takes on an inertial sales trend for the various newspapers in line with the trend that we have seen in the last three years; it also assumes a gradual increase in prices over the period in question.

Lastly, we expect a reduction in revenues from the sale of add-ons distributed together with newspapers, even though a good level of profitability should be maintained.

It should also be noted that, for prudence sake, we used a growth rate of zero to calculate the terminal value.

The impairment tests on titles, radio and television frequencies, trademarks and goodwill, confirmed that there are no impairment losses to be recognised in the financial statements. With regard to the titles that were affected by a revision of the scope of their CGUs in 2012, tests were carried out on both the previous and current scope and did not give rise to impairment.

For those CGUs which show titles or goodwill with a value that is material for the purposes of the consolidated financial statements and for which the results of the impairment test indicate a positive difference between their fair value less costs to sell or value in use compared with their carrying amount that is less than the threshold of 50%, we also performed a sensitivity analysis on the results to see how sensitive they were to changes in the basic assumptions.

For the publishing CGUs, the sensitivity analysis carried out on the "Finegil Editoriale Nord-Est" CGU indicated that, based on the evolution of the financial results foreseen in the 2013-2017 Plan, value in use would be equal to book value, assuming a discount rate of future cash flows (pre-tax WACC) of 14.10% instead of the 11.34% actually used.

Lastly, for the radio and television CGUs, note that in the determination of fair value less costs to sell for the radio frequencies, the price range used was between 1.5 and 3 times the number of inhabitants reachable by the FM signals of the Radio DeeJay, Radio Capital and m2o CGUs, whereas for the television frequencies a price range of between 3.4 and 3.8 times was used. In the latter case, the fair value of the "Rete A" CGU would be equal to its carrying amount with an average price multiplier 1.30 times the number of inhabitants reachable by the signal. Given the scarcity of recent transactions in Italy involving television frequencies, we also calculated the value in use of the television frequencies and this confirmed the recoverability of the values shown in the financial statements, assuming an increase in revenues from digital bandwidth rentals. Specifically, the business plan assumes an increase in channels rented to third parties from 6 in 2013 to 10 from 2017 onwards, with rental prices evolving according to the step-up scale of values already defined in existing contracts.

Automotive sector

The goodwill allocated to the Automotive sector, which coincides with the scope of consolidation of the Sogefi Group, is equal to € 129 million.

For the sole purpose of determining the value in use, the operating cash flows generated by the Sogefi Group have been considered, in line with the approach taken by management of the sub-holding company, relating to the three business units that came from acquisitions:

- fluid filters;
- air filters and cooling;
- car suspension components.

A test was carried out to check for any impairment of goodwill by comparing the carrying amount of the Automotive CGU with its value in use, which comes from the present value of its estimated future cash flows expected to arise from continuing use of the asset being tested for *impairment*.

The Unlevered DCF method was used, based on projections made in the budgets or multi-year business plans for the period 2013-2016, as approved by management and in line with the forecasts of the automotive sector (based on data from the most important sector sources), and a discount rate based on a WACC of 8% (8.8% in 2011).

The discount rate used for the cash flows was the same for all three business units. In fact, the risk is considered the same based on the fact that the divisions in question operate in the same sector and with the same type of customer.

Lastly, the terminal value was calculated using the perpetuity formula, assuming a growth rate of 2% and an operating cash flow based on the last year of the multi-year business plan (2016), adjusted to project a stable situation into perpetuity, using the following key assumptions:

- an overall balance between investments and amortisation (considering a level of investment necessary to "maintain" the business);
- a zero change in working capital (assuming that the benefits of the Group's working capital reduction plan would more or less come to an end in the medium term).

The average cost of capital is the result of calculating the weighted average of the cost of debt (based on benchmark rates plus a spread) and the cost of the company's own capital, based on parameters for a sample of companies operating in the European automotive components sector that are considered Sogefi's peers by the main financial analysts who follow this business sector. The figures used in calculating the average cost of capital were as follows:

- financial structure of the sector: 37.2%
- levered beta of the sector: 1.15
- risk-free rate: 4.25% (annual average for 10-year risk-free government securities of the countries in which the group operates, weighted on the basis of sales);
- risk premium: 5.5%
- spread on the cost of debt: 3.3% (estimated on the basis of the 2013 budget)

The test carried out on the present value of projected cash flows shows that the Sogefi CGU has a value in use that exceeds its carrying amount; no write-down was therefore made.

Sensitivity analyses were then carried out on two of the above variables assuming a zero growth rate in the terminal value or a rise of two percentage points in the calculation of the average cost of capital. In none of the projected scenarios did the need for any write-down emerge.

In terms of sensitivity analyses, we would point out that the impairment test reaches a level of breakeven with the following discount rates (leaving the growth rate of the terminal value at 2% and all the other assumptions of the plan unchanged): 18.08% for the Engine Systems Division (Fluid Filters), 20.72% for the Engine Systems Division (Air Filters and Cooling) and 10.66% for the Car Suspension Components Division.

Lastly, we would point out that, despite the current financial market conditions, the results obtained from the analyses carried out have also been widely confirmed by the fair value - expressed by the market value of Sogefi at 31 December 2012 - of the assets held by the Group in the automotive sector.

Energy sector

The goodwill allocated to the *Energy* sector, which coincides with the scope of consolidation of the Sorgenia Group, amounts to € 253 million.

For the CIR Group, the *Energy* sector represents a single CGU and the impairment test on goodwill allocated to this CGU was based on its value in use and therefore on the cash flows that are expected to be generated by the sub-holding company Sorgenia. In this regard, and for the sole purpose of determining the operating cash flows that will be generated by the Sorgenia Group, in line with the approach taken by management of the sub-holding company, the cash flows generated by the *Renewables*, *Energy Supply* and *Exploration & Production (E & P)*

These flows have been estimated by analysing in detail those that will be generated by the existing and plants and - where necessary - establishing a timetable for the construction and entry into operation of new plants based on certain assumptions, such as the progress being made on current projects and the expected time for completion of the authorisation process and preparation of the plants.

Projected financial flows were taken from the Sorgenia Group's Business Plan; in particular, the operating cash flows were determined as forecast in the Plan and considering the time horizon of the plants' residual useful life, estimated at 25 years for combined cycle plants (CCGT) and wind farms and 20 years for photovoltaic plants. Investments for the construction of new wind farms were taken to be as envisaged in the Business Plan.

The Business Plan was approved by the Board of Directors of the sub-holding company Sorgenia after verification by a leading consulting firm, which carried out sensitivity analyses on the assumptions underlying the Business Plan.

The main assumptions used in drawing up the Plan, in addition to those already mentioned in connection with the useful life of the plants, are represented by:

- the macroeconomic forecasts for the Single National Price, split between peak and off-peak hours, the dynamics of which reflect the trend in market scenarios for oil commodities and assumed to be rising over the period of the plan;
- forecasts of the hours that each plant will operate, with estimates for the CCGT plants rising slightly in 2013 and 2014 and then remaining essentially constant over the rest of their useful life;
- the amount and duration of incentive pricing systems in line with the forecasts of current regulations;
- estimates for the price of natural gas, which foresee a price reduction assumed to be in line with recent spot market prices; the price of natural gas is estimated in dollars and converted into euro on the basis of a EUR/USD exchange rate that is expected to remain constant over the period of the plan;
- estimates of revenues from ancillary services related to the thermoelectric market (e.g. dispatching); note, however, that no assumptions have been made for additional remuneration mechanisms of the plants provided by the regulatory system (e.g. capacity payments);
- estimated operating costs, the price of green certificates and CO2 quotas expected to decline over the period of the plan;
- an estimate of investments to be made, mainly in plant maintenance, and the amount of decommissioning and site restoration costs;
- forecasts about the business that assume that the customer base in the "business" market segment will be maintained and market share in the "retail" market (residential customers) will grow thanks to a "dual fuel" offer, i.e. joint supply of electricity and gas;
- the estimated effect of inflation over the period of the plan, equal to 2%.

The cash flows determined in this way were then discounted using the weighted average cost of capital after tax (after-tax WACC) at 31 December 2012. The WACC applied, net of tax, took into account the specific nature of the various initiatives included in the sub-holding company Sorgenia; the parameters used for to determine the discount rate were identified by looking separately at the various activities that generate cash flows and the geographical area involved. In particular, the WACC was set at 5.9% (5.84% in 2011) for the cash flows from Renewable plants, at 6.6% (7.08% in 2011) for the cash flows from CCGT plants and 8% (9.8% in 2011) for the cash flows from the investments in E&P.

The impairment test carried out in the manner described above did not show a loss in value as the recoverable amount of the assets belonging to the Energy sector - equal to the value in use determined on the basis of the methodology and parameters explained previously - was higher than their carrying amount in the balance sheet at 31 December 2012.

Sensitivity analyses were carried out on the results, assuming a +1% change in the average cost of capital. Also in such cases, the carrying amount of recognised assets does not exceed the value in use and no problem situations have been revealed, thereby confirming the results of the impairment test.

Lastly, the goodwill recognised in the financial statements of the sub-holding company is monitored for operating purposes by the management of Sorgenia following to an approach that leads to the identification of three separate CGUs, which coincide with the business areas mentioned above. As we said, this view is different from that of the CIR Group, which operates in a perspective of the

overall portfolio of investments in individual businesses; for these reasons the Energy CGU has always coincided with the entire scope of the sub-holding company Sorgenia, which is also in line with the Group's segment reporting.

Healthcare sector

The goodwill allocated to the healthcare sector, which corresponds to the scope of consolidation of the Kos Group, amounts to € 173 million. The Group therefore allocated all of the goodwill to a single "Healthcare" CGU and then, as part of the analyses carried out for impairment testing purposes, identified specific CGUs according to the approach taken by management of the Kos sub-holding company. In order to check for any impairment in the value of goodwill and other fixed assets shown in the financial statements, we calculated the value in use of the CGUs to which the goodwill had been allocated at Kos sub-holding level.

In application of the methodology set out in IAS 36, the Kos Group identified the CGUs which represent the smallest identifiable group of assets able to generate broadly independent cash flows in its own consolidated financial statements. To identify the CGUs we took into account the organisational structure, the type of business and the ways in which control is exercised over the operations of the CGUs.

Given that the Kos Group operates in four different sectors (care homes for the elderly, rehabilitation, acute medicine and hi-tech services), the CGUs and groups of CGUs identified by Kos management at sub-holding level are as follows:

- in the "care homes" sector, the CGUs were identified, at a first level, in the individual care homes, most of them operating under the "Anni Azzurri" brand. They were then grouped together at a second level by region. the third level of grouping includes the whole sector. From 2012, the "Care homes" sector includes the "Redancia" sub-group (psychiatric rehabilitation and management of psychiatric care communities) following the merger of Redancia S.r.l. with Residenze Anni Azzurri S.r.l. and the consequent change in the organisational structure;
- the "Rehabilitation" sector includes the CGUs that operate under the "S. Stefano Riabilitazione" brand (also referred to as "IRSS"). The CGUs were identified, at the first level, as the individual facilities (in "IRSS", one of the CGUs consists of the out-patient centres/day hospitals); subsequently, the individual CGUs are grouped together at a second level by region; the third level of grouping includes the whole sector. The Sanatrix group constitutes a single, first-level CGU. although Sanatrix's business relates to several business sectors (the elderly, rehabilitation and acute), because of the way in which operations are controlled, it is classified by management as belonging to the "Rehabilitation" sector and therefore follows the second and third level of grouping in the test on "IRSS";
- in the "Acute" sector, the only CGU to be identified is Ospedale di Suzzara;
- in the "Hi-tech Services" sector (under the Medipass brand) a first level grouping consists of the individual service contracts currently in progress, the structures of the Giordani group, which consists of a single CGU and the services abroad (UK and India, identified on a geographical basis); the second grouping level includes all current contracts of Medipass, the Giordani Group and the services abroad; the third level of grouping includes the whole sector.

We tested the recoverability of the carrying amounts by comparing the net book value assigned to the CGUs, including goodwill, with their recoverable value (value in use). The value in use is represented by the present value of estimated future cash flows generated by the continuous use of the assets making up the cash generating unit and of the terminal value that can be assigned to the same CGUs.

More specifically the chart shows the values of goodwill allocated to the operating sectors by the management of Kos and any other items of goodwill allocated to the Healthcare sector that constitute a single CGU at Group level. Although goodwill was also tested at a lower level, the level of allocation of the "Healthcare" CGU is considered significant because it confirms the strategic enterprise vision that CIR's Directors have with regard to the specific characteristics of the sector that the Kos Group belongs to.

<i>(in thousands of euro)</i>	<i>31.12.2012</i>	<i>%</i>
Goodwill allocated by Kos sub-holding		
Care homes	88,209	51
Rehabilitation	61,063	35
Hi-tech services	22,548	13
Additional goodwill allocated to the Healthcare CGU	1,459	1
Total	173,279	100

In developing the impairment test, we used management's latest budget forecasts for the economic and financial trend during the period 2013-2018, assuming that the assumptions come about and the targets are reached. In calculating the projections, management made various hypotheses based on past experience and expectations regarding the development of the sectors in which the Group operates.

To calculate the terminal value we used a growth rate of 1.5% (the same as in 2011) in line with the average long-term growth rate of production, the reference sector and the country in which the company operates. For prudence sake, the same rate of growth was used for the services abroad (India), even though this country's expected rate of growth is higher. As for the UK activities, no terminal value was calculated as the test period matched the duration of the service contract.

The discount rate used reflects the current market valuations of the cost of money and takes into account the specific risks of the business. In particular, for the purpose of calculating the WACC, the risk premium for the Kos Group was set at 5.8%. Net of tax, this gave us an after-tax WACC rate of 6.8% (7.3% in 2011) for Italy, 5% for the UK and 8.2% for India.

The test carried out on the present value of the projected cash flows shows that the Kos CGU has a value in use that exceeds its carrying amount.

Moreover, in line with the analyses carried out by the Kos sub-holding, the Group also set up sensitivity analyses considering changes in the basic assumptions of the impairment test, particularly in the variables which have most impact on recoverable values (discount rate, growth rate, terminal value).

This analysis, carried out at the testing levels mentioned previously (regions and operating sectors, and therefore at the level of the Healthcare CGU) did not reveal any problems or situations where the carrying value was significantly higher than the recoverable value, even using a growth rate of zero and a considerably higher WACC than the one used in the test.

The impairment test carried out on the investment held in Tirreno Power S.p.A. showed an impairment loss of € 44,323 thousand. In fact, taking into account the declining trend in dividends paid over the last three years as a result of the contraction in the subsidiary's results, the loss foreseen in the 2013 Budget approved by the company's Directors, also because of a staff rationalisation plan and, lastly, the negative performance of the sector in general, the Group carried out an impairment test to see if the investment had suffered a loss in value.

In the absence, at the date of preparing the Group's financial statements, of financial statements, of a multi-year plan and an impairment test of the company's assets approved by the Directors of Tirreno Power, the Directors have taken steps to determine the recoverable amount of the investment.

The recoverable amount was based on the value in use determined by the Directors of Sorigenia S.p.A. on the basis of the present value of expected cash flows, as provided for in the 2013-2017 Business Plan, updated with the forecasts contained in the 2013 Budget and considering the peculiarities of the sector, extended over the residual life of the plants, which reflects assumptions that are consistent with the multi-year plan of the Sorigenia Group and a business approach in line with the operations of Tirreno Power at 31 December 2012 (i.e. excluding additional investments).

The main assumptions used for calculating the value in use concern the discount rate, the scenario for energy and raw material prices, the estimated number of operating hours of the individual plants, the expected life of plants and expectations regarding the trend in investments, revenues and operating costs during the period covered by the calculation.

The main assumptions used in drawing up the Business Plan are represented by:

- the macroeconomic forecasts for the Single National Price, split between peak and off-peak hours, the dynamics of which reflect the trend in market scenarios for oil commodities and assumed to be rising over the period of the plan;
- forecasts of the hours that each plant will operate, with estimates rising in 2013 and 2014 and then remaining constant over the rest of their useful life;
- estimates for the price of raw materials (natural gas and coal) which, as regards natural gas, foresee a reduction in the prices assumed to be in line with recent spot market prices; the price of raw materials is estimated in dollars and converted into euro on the basis of a EUR/USD exchange rate that is expected to remain constant over the period of the plan;
- estimates of revenues from ancillary services related to the thermoelectric market (e.g. dispatching); note, however, that no assumptions have been made for additional remuneration mechanisms of the plants provided by the regulatory system (e.g. capacity payments);
- the estimated useful lives of the plants (assumed equal to 20 years for coal-fired plants and 25 years for combined cycle plants);
- estimated operating costs, the price of green certificates and CO2 quotas expected to decline over the period of the plan;
- an estimate of investments to be made, mainly in plant maintenance.

The after-tax WACC was estimated at 6.6%. This rate reflects current assessments and market expectations about the cost of money and specific country risk.

Moreover, in order to reflect the uncertainties caused by having to make assumptions about the main key variables of the impairment test and the outcome of renegotiating the shareholder agreements that expire in 2013, sensitivity analyses were also carried out. These led to the adoption of more prudent assumptions, on the basis of which an impairment loss arose for a total of € 44,323 thousand, as reported above.

Moreover, the impairment test carried out at the end of 2012 on the investments held by the Espresso Group in Editoriale Libertà and Altrimedia revealed the need to write down their carrying amount by a total of € 4,411 thousand to bring it into line with the recoverable value of these investments.

The recoverable amount of the investments was determined in accordance with IAS 36 as the higher of the fair value less costs to sell and the value in use, estimated using the same methods explained in Note 7.a.

7.e. Other investments

<i>(in thousands of euro)</i>	<i>%</i>	<i>31.12.2012</i>	<i>31.12.2011</i>
Ansa S. Coop. A.R.L.	18.48	2,209	2,209
Agriterra Ltd.	1.11	503	2,973
Emittenti Titoli S.p.A.	5.44	132	132
Swiss Education Group AG	--	--	14,035
Tecnoparco Valbasento	--	--	516
Other	--	2,736	3,038
Total		5,580	22,903

The carrying values correspond to the cost, reduced where necessary for impairment, and are essentially considered to be equivalent to their fair value.

Bear in mind that, for the first time, Swiss Education Group AG and Tecnoparco Valbasento S.p.A. are valued at equity in these consolidated financial statements.

7.f. Other receivables

"Other receivables" at 31 December 2012 had a balance of € 249,048 thousand, compared with € 247,079 thousand at 31 December 2011.

At 31 December 2012 this item included € 79,097 thousand (€ 93,008 thousand at 31 December 2011) of unsecured and mortgage-backed receivables of the securitisation companies Zeus Finance S.r.l. and Urania Finance S.A., € 85,846 thousand (€ 60,717 thousand at 31 December 2011) of tax credits in relation to CO₂ quotas that the Sorgenia Group should have been assigned. Since the national plan for the assignment of CO₂ quotas for the current year did not have enough capacity, for the new plants that started operating in 2010 it was not possible for them to credit the rights to their accounts. However, in order not to create differences in treatment between different market players, a legislative measure granted those operators a credit equal to the value of the CO₂ quotas not assigned to them. This item also includes € 8,681 thousand (€ 8,743 thousand at 31 December 2011) of security deposits paid by the Sorgenia Group as guarantees to suppliers of the wind farm equipment and as deposits paid to banks. This item includes € 12,878 thousand of receivables for charges to activate and operate maintenance services at the Lodi and Aprilia plants. It also includes the loan from CIR International S.A. in favour of Swiss Education Group AG for € 13,254 thousand and € 13,165 thousand of receivables claimed by Sorgenia S.p.A. from Sorgenia France Production S.A., a company consolidated at equity from September 2011.

7.g. Securities

"Securities" at 31 December 2012 amounted to € 111,244 thousand, compared with € 107,321 thousand at 31 December 2011, and refer mainly to investments in private equity funds and minority shareholdings. These investments were measured at fair value recognising to the fair value reserve an amount, net of tax, of € 5,129 thousand (€ 10,105 thousand at 31 December 2011). At 31 December 2012, the residual commitment for investment in private equity funds stood at € 10.6 million.

7.h. Deferred taxes

The amounts relate to taxes resulting from deductible temporary differences and from benefits deriving from tax losses carried forward, which are deemed to be recoverable.

The breakdown of "Deferred tax assets and liabilities" by type of temporary difference is as follows:

<i>(in thousands of euro)</i>	2012		2011	
	<i>Total temporary differences</i>	<i>Tax effect</i>	<i>Total temporary differences</i>	<i>Tax effect</i>
Deductible temporary differences from:				
- write-down of current assets	143,780	46,442	167,712	54,111
- write-down of fixed assets	55,665	17,034	43,808	14,761
- revaluation of current liabilities	40,565	11,047	16,134	5,198
- revaluation of personnel provisions	61,301	18,311	47,713	14,554
- revaluation of provisions for risks and losses	111,944	35,747	89,743	28,941
- revaluation of long-term borrowings	50,188	18,016	33,892	8,267
- write-down of financial instruments	101,846	31,834	96,083	30,330
- tax losses from previous years	275,337	81,738	351,998	75,176
Total deferred tax assets	840,626	260,169	847,083	231,338
Taxable temporary differences from:				
- revaluation of current assets	2,032	637	982	334
- revaluation of fixed assets	524,259	162,756	522,989	162,345
- write-down of current liabilities	28,478	8,651	21,019	6,313
- valuation of personnel provisions	23,146	5,780	22,639	5,991
- write-down of provisions for risks and losses	571	170	725	217
- revaluation of financial instruments	12,409	3,866	7,736	2,498
Total deferred tax liabilities	590,895	181,860	576,090	177,698
Net deferred taxes		78,309		53,640

Certain 2011 figures have been restated following the Sogefi Group's completion of the Purchase Price Allocation in connection with Systèmes Moteurs S.A.S.

Prior-year losses not used in the calculation of deferred taxes relate to CIR International for approximately € 430 million, which can be carried forward without any limit, and to other Group companies for € 67 million. It should be pointed out that no deferred tax assets were calculated for these losses because present conditions are such that there is no certainty that they can be recovered.

The changes in "Deferred tax assets and liabilities" during the year were as follows:

<i>2012</i>	<i>Balance at 31.12.2011</i>	<i>Use of deferred taxes from prior periods</i>	<i>Deferred taxes generated in the period</i>	<i>Exchange rate differences and other changes</i>	<i>Balance at 31.12.2012</i>
<i>(in thousands of euro)</i>					
Deferred tax assets:					
- income statement	203,842	(18,898)	18,250	19,589	222,783
- equity	27,496	(680)	10,780	(210)	37,386
Deferred tax liabilities:					
- income statement	(154,239)	9,289	(10,127)	525	(154,552)
- equity	(23,459)	498	(4,642)	295	(27,308)
Net deferred taxes	53,640				78,309

<i>2011</i>	<i>Balance at 31.12.2010</i>	<i>Use of deferred taxes from prior periods</i>	<i>Deferred taxes generated in the period</i>	<i>Exchange rate differences and other changes</i>	<i>Balance at 31.12.2011</i>
<i>(in thousands of euro)</i>					
Deferred tax assets:					
- income statement	212,067	(28,260)	35,851	(15,816)	203,842
- equity	6,318	(1,174)	23,152	(800)	27,496
Deferred tax liabilities:					
- income statement	(180,973)	9,012	(4,685)	22,407	(154,239)
- equity	(12,255)	(1,971)	(237)	(8,996)	(23,459)
Net deferred taxes	25,157				53,640

The amounts shown in "Exchange rate differences and other changes" include changes in the scope of consolidation.

Certain 2011 figures have been restated following the Sogefi Group's completion of the Purchase Price Allocation in connection with Systèmes Moteurs S.A.S.

8. CURRENT ASSETS

8.a. Inventories

Inventories can be broken down as follows:

<i>(in thousands of euro)</i>	<i>31.12.2012</i>	<i>31.12.2011</i>
Raw materials, secondary materials and consumables	67,550	93,184
Work in progress and semi-finished goods	12,136	13,162
Finished goods and goods for resale	90,875	77,745
Advance payments	196	439
Total	170,757	184,530

The value of inventories is shown net of any write-downs made either in past years or this year and takes into account the degree of obsolescence of finished goods, goods for resale and secondary materials.

8.b. Trade receivables

<i>(in thousands of euro)</i>	<i>31.12.2012</i>	<i>31.12.2011</i>
Receivables - customers	1,440,073	1,207,383
Receivables - subsidiaries and joint ventures	6,381	5,858
Receivables - associates	1,379	1,985
Total	1,447,833	1,215,226

"Receivables - customers" are interest-free and have an average maturity in line with market conditions.

Trade receivables are shown net of any write-downs that take credit risk into account. In 2012, provisions for write-downs were made for a total of € 29,123 thousand compared with € 21,516 thousand in 2011.

Note that during the year, in the Sorgenia Group, receivables relating to customers subject to insolvency proceedings for which the possibility of collection is remote and receivables relating to customers for whom the recovery procedures have proved unsuccessful were written off. These losses came to a total of € 27,091 thousand.

"Receivables - subsidiaries and joint ventures" represent intercompany receivables not eliminated as they refer to companies not fully consolidated line by line. The balance at 31 December 2012 refers mainly to receivables from Tirreno Power S.p.A..

8.c. Other receivables

<i>(in thousands of euro)</i>	<i>31.12.2012</i>	<i>31.12.2011</i>
Receivables - subsidiaries and joint ventures	496	2,565
Receivables - associates	64	38
Tax receivables	144,197	121,860
Other receivables	161,943	145,352
Total	306,700	269,815

Certain 2011 figures have been restated following the Sogefi Group's completion of the Purchase Price Allocation in connection with Systèmes Moteurs S.A.S.

"Other receivables" include € 71,878 thousand (€ 74,669 thousand at 31 December 2011) relating to the fair value measurement of Sorgenia Group commodity derivatives.

8.d. Financial receivables

"Financial receivables" rose from € 11,956 thousand at 31 December 2011 to € 35,489 thousand at 31 December 2012 and relate mainly for € 32,446 thousand to receivables due to the Sorgenia Group from Banca IMI, following the securitisation carried out at the end of the year. This item also includes € 1,825 thousand for the fair value measurement, regarding the Espresso Group, of an interest rate swap to partially hedge the bond for a notional amount of € 50 million and € 983 thousand relating to the fair value measurement and accrued interest for three credit default swaps taken out by Cir Investimenti S.p.A., for a notional amount of € 98 million.

8.e. Securities

This item consists of the following categories of securities:

<i>(in thousands of euro)</i>	<i>31.12.2012</i>	<i>31.12.2011</i>
Italian Government securities or similar securities	6,746	5,911
Investment funds and similar funds	102,351	193,143
Bonds	247,911	348,097
Certificates of deposit and other securities	53,335	66,726
Total	410,343	613,877

The decrease in this item is due to a different strategy for investing cash, which mainly consisted of short-term bank deposits.

The fair value measurement of "Securities" led to a positive adjustment to the income statement of € 13,658 thousand.

8.f. Available-for-sale financial assets

This item totals € 105,473 thousand and refers for € 84,197 thousand to shares in hedge funds and redeemable shares in asset management companies held by CIR International S.A. The degree of liquidity of the investment is a function of the time required for the redemption of the funds, which normally varies from one to three months.

The fair value measurement of these funds involved a total value adjustment of € 14,425 thousand (€ 7,291 thousand at 31 December 2011). The item also includes € 21,276 thousand of bonds held by the Espresso Group with maturities between 31 May 2013 and 7 October 2014. The positive effect of the change in these securities on the Group's share of CIR's equity, net of tax, came to € 42 thousand.

8.g. Cash and cash equivalents

Cash and cash equivalents rose from € 494,006 thousand at 31 December 2011 to € 666,153 thousand at 31 December 2012.

A breakdown of the changes is given in the statement of cash flows.

8.h. Assets and liabilities held for disposal

This item refers to assets held for disposal belonging to the Sorgenia Group, in particular the Orlando E&P licence. Its sale meets the requirements for it to be classified under this item. The balance at 31 December 2011 related to assets of the Kos and Sogefi Groups held for disposal.

Sales carried out by the Kos Group were completed during the year.

With reference to the Sogefi Group, the sale of the property is no longer considered probable in the next 12 months, so it has been reclassified to "tangible assets" and depreciation has recommenced.

9. EQUITY

9.a. Share capital

The share capital increased from € 396,665,733.50 at 31 December 2011 (made up of 793,331,467 shares) to € 396,670,233.50 (793,340,467 shares) at 31 December 2012 due to the issue of 9,000 shares as a result of options being exercised under stock option plans.

At 31 December 2012, the Company held 49,989,000 treasury shares (6.3% of capital) for a value of € 108,340 thousand, the same as at 31 December 2011.

In application of IAS 32, treasury shares held by the Parent Company are deducted from total equity.

The share capital is fully subscribed and paid up. None of the shares are subject to any rights, privileges or limitations on the distribution of dividends, with the exception of treasury shares.

Note that for a period of five years from 30 April 2009 the Board of Directors was authorised to increase the share capital once or more by a maximum of € 500 million (nominal value) and for a further maximum of € 20 million (nominal value) in favour of employees of the Company, its subsidiaries and parent companies.

Regarding stock option plans and stock grants, at 31 December 2012 there were 47,105,932 options outstanding, corresponding to an equivalent number of shares.

The "Stock option and stock grant reserve" refers to the notional value of the incentives assigned to employees and approved after 7 November 2002.

9.b. Reserves

The changes and breakdown of "Reserves" are as follows:

<i>(in thousands of euro)</i>	<i>Share premium reserve</i>	<i>Legal reserve</i>	<i>Fair value reserve</i>	<i>Translation reserve</i>	<i>Reserve for treasury shares</i>	<i>Stock option and stock grant reserve</i>	<i>Other reserves</i>	<i>Total reserves</i>

Currency translation differences	--	--	2	(8,990)	--	--	--	(8,988)
Balance at 31 December 2012	34,780	115,969	(22,664)	(6,450)	24,995	21,746	111,582	279,958

The "Fair value reserve", net of tax, was negative for € 22,664 thousand and referred (in positive) to the measurement of "Securities" in item 7.g. for € 5,129 thousand and of "Available-for-sale financial assets" in item 8.f. for € 14,467 thousand and (in negative) to the measurement of hedges for € 42,259 thousand and of "Securities" in item 8.e. for € 1 thousand.

The "Translation reserve" had a negative balance of € 6,450 thousand at 31 December 2012 with the following breakdown:

<i>(in thousands of euro)</i>	<i>31.12.2011</i>	<i>Increases</i>	<i>Decreases</i>	<i>31.12.2012</i>
Sogefi Group	2,159	--	(6,028)	(3,869)
KOS Group	(1)	4	--	3
CIR Ventures	(1,985)	--	(239)	(2,224)
CIR International	1,225	--	(3,112)	(1,887)
Sorgenia	1,022	407	--	1,429
Others	92	6	--	98
Total	2,512	417	(9,379)	(6,450)

The breakdown of "Other reserves" at 31 December 2012 was as follows:

<i>(in thousands of euro)</i>	
Reserve for capital increases	3
Statutory reserve	148
Reserve as per Art. 6 of D.Lgs no. 38 of 28/02/2005	(74)
Reserve for the difference between the carrying values of investee companies and the respective portions of consolidated equity	111,505
Total	111,582

The changes in treasury shares during the year were as follows:

<i>(in thousands of euro)</i>	<i>Number of shares</i>	<i>Value</i>
Balance at 31 December 2011	49,989,000	108,340
Increases	--	--
Balance at 31 December 2012	49,989,000	108,340

9.c. Retained earnings (losses)

The changes in Retained earnings (losses) are shown in the "Statement of Changes in Equity".

10. NON-CURRENT LIABILITIES

10.a. Bonds

The breakdown of "Bonds", net of intercompany eliminations, is as follows:

<i>(in thousands of euro)</i>	<i>Effective rate</i>	<i>31.12.2012</i>	<i>31.12.2011</i>
Bond Gruppo Editoriale L'Espresso S.p.A. 5.125% 2004/2014	4.82%	227,905	257,498
Bond CIR S.p.A. 5.75% 2004/2024	5.87%	268,474	268,304
Total		496,379	525,802

In application of IAS 32 and 39, the original values of bond issues were written down to take into account expenses incurred and issue discounts.

During 2012 a nominal amount of € 28,818 thousand of the Gruppo Editoriale L'Espresso Bond 2004/2014 was purchased and subsequently cancelled.

At 31 December 2012 CIR International held a nominal € 30,000 thousand (unchanged from 31 December 2011) of the CIR 5.75% Bond 2004/2024.

10.b. Other borrowings

<i>(in thousands of euro)</i>	<i>31.12.2012</i>	<i>31.12.2011</i>
Collateralised bank loans	77,199	117,414
Other bank loans	1,965,719	1,867,392
Leases	156,498	123,279
Other payables	104,420	89,252
Total	2,303,836	2,197,337

The item mainly consist of borrowing by the Sorgenia Group (€ 1,844,476 thousand), the Sogefi Group (€ 290,302 thousand) and the KOS Group (€ 131,982 thousand).

10.c. Personnel provisions

The details of this item are as follows:

<i>(in thousands of euro)</i>	<i>31.12.2012</i>	<i>31.12.2011</i>
Employee leaving indemnity (TFR)	90,473	88,614
Pension funds and similar obligations	38,050	35,152
Total	128,523	123,766

<i>(in thousands of euro)</i>	<i>31.12.2012</i>	<i>31.12.2011</i>
Opening balance	123,766	124,343
Provisions for service during the period	29,904	24,555
Increases for interest	5,032	5,540
Actuarial gains or losses	82	(17)
Benefits paid	(14,812)	(15,108)
Increases or decreases due to changes in the scope of consolidation	(28)	102
Other changes	(15,421)	(15,649)
Closing balance	128,523	123,766

Employee Leaving Indemnity and Defined Benefit Provision

Annual technical discount rate	2.4% - 2.72%
Annual inflation rate	2%
Annual rate of pay increases	0.5% - 1.5%
Annual rate of TFR increase	3%
Annual probability of advances	2% - 3%
Voluntary resignation rate	3% - 10% of the workforce

Pension funds

Annual technical discount rate	2.72% - 4.5%
Annual inflation rate	2% - 2.8%
Annual rate of pay increases	1% - 3.8%
Return on plan assets	2% - 7.0%
Retirement age	65

10.d. - 11.e. Provisions for risks and losses

The breakdown and changes in the non-current part of these provisions are as follows:

<i>(in thousands of euro)</i>	<i>Provision for disputes pending</i>	<i>Provision for restructuring charges</i>	<i>Provision for other risks</i>	<i>Total</i>
Balance at 31 December 2011	11,484	2,484	60,721	74,689
Provisions made during the period	5,625	6,945	16,101	28,671
Released for use	(1,275)	(1,666)	(14,998)	(17,939)
Exchange rate differences	--	(23)	(29)	(52)
Other changes	(1,591)	(20)	9,667	8,056
Balance at 31 December 2012	14,243	7,720	71,462	93,425

The breakdown and changes in the current part of these provisions are as follows:

<i>(in thousands of euro)</i>	<i>Provision for disputes pending</i>	<i>Provision for restructuring charges</i>	<i>Provision for other risks</i>	<i>Total</i>
Balance at 31 December 2011	9,412	19,030	56,945	85,387
Provisions made during the period	296	12,174	26,507	38,977
Used	(3,502)	(9,977)	(7,857)	(21,336)
Other changes	1,864	--	(175)	1,689
Balance at 31 December 2012	8,070	21,227	75,420	104,717

Apart from the libel disputes regarding the Espresso Group, which are typical of all publishing businesses, the provision for disputes pending also covers risks for litigation of a commercial nature and labour suits.

The provision for restructuring charges includes amounts set aside for restructuring plans that have been publicly announced and communicated to the parties concerned and refers in particular to the production reorganisation projects involving companies of the Sogefi and Espresso Groups.

The provision for other risks is mainly to cover tax disputes pending with local tax authorities.

11. CURRENT LIABILITIES

11.a. Bonds

This item refers to the current portion of the Gruppo Editoriale L'Espresso S.p.A. 5.125% Bond 2004/2014.

11.b. Other borrowings

<i>(in thousands of euro)</i>	<i>31.12.2012</i>	<i>31.12.2011</i>
Collateralised bank loans	40,983	27,684
Other bank loans	85,954	46,304
Leases	5,105	11,927
Other borrowings	619,454	625,685
Total	751,496	711,600

As regards "Other borrowings", bear in mind that on 9 July 2011, the Milan Court of Appeal pronounced on the civil case brought by CIR against Fininvest for compensation for damages resulting from bribery in the "Lodo Mondadori" case. The ruling sentenced Fininvest to pay CIR approximately € 540.1 million plus interest at the legal rate and costs, as compensation for the immediate and direct damage suffered. As a result of this sentence, on 26 July 2011 CIR provisionally received a total of around € 564.2 million from Fininvest.

As envisaged in international accounting standards (IAS 37), this amount has no effect on the Company's income statement until the final appeal has been decided. It has therefore been credited to this item, rather than to income.

The item also includes the effects of the change in fair value of hedging derivatives.

11.c. Trade payables

<i>(in thousands of euro)</i>	<i>31.12.2012</i>	<i>31.12.2011</i>
Payables - subsidiaries and joint ventures	39,904	34,626
Payables - associates	1,481	2,003
Payables - suppliers	1,141,261	937,152
Advance payments	9,790	6,642
Payables in the form of credit instruments	--	4
Total	1,192,436	980,427

Certain 2011 figures have been restated following the Sogefi Group's completion of the Purchase Price Allocation in connection with Systèmes Moteurs S.A.S..

The item "Payables - subsidiaries and joint ventures" mainly refers to Sorgenia S.p.A. trade payables to Tirreno Power S.p.A..

11.d. Other payables

<i>(in thousands of euro)</i>	<i>31.12.2012</i>	<i>31.12.2011</i>
Due to employees	79,890	80,700
Tax payables	58,168	57,402
Social security payables	54,078	53,849
Other payables	139,933	176,124
Total	332,069	368,075

Certain 2011 figures have been restated following the Sogefi Group's completion of the Purchase Price Allocation in connection with Systèmes Moteurs S.A.S..

"Other payables" include € 71,899 thousand (€ 93,134 thousand at 31 December 2011) relating to the fair value measurement of the Sorgenia Group's commodity derivatives.

Notes to Consolidated Income Statement

12. REVENUES

BREAKDOWN BY BUSINESS SECTOR

<i>(in millions of euro)</i>	2012		2011		Change %
	amount	%	amount	%	
Energy	2,572,3	50.8	2,120,3	46.9	21.3
Media	812,7	16.1	890,1	19.7	(8.7)
Automotive components	1,319,2	26.1	1,158,4	25.6	13.9
Healthcare	355,4	7.0	349,6	7.7	1.7
Other	3,4	--	4,3	0.1	--
Total consolidated revenues	5,063,0	100.0	4,522,7	100.0	11.9

BREAKDOWN BY GEOGRAPHICAL AREA

<i>(in millions of euro)</i> 2012	Total revenues	Italy	Other European countries	North America	South America	Asia	Other countries
Energy	2,572.3	2,223.7	348.6	--	--	--	--
Media	812.7	812.7	--	--	--	--	--
Automotive components	1,319.2	78.6	798.4	150.6	231.4	46.6	13.6
Healthcare	355.4	354.6	0.5	--	--	0.3	--
Other	3.4	--	3.4	--	--	--	--
Total consolidated revenues	5,063.0	3,469.6	1,150.9	150.6	231.4	46.9	13.6
Percentages	100.0%	68.5%	22.7%	3.0%	4.6%	0.9%	0.3%

<i>(in millions of euro)</i> 2011	Total revenues	Italy	Other European countries	North America	South America	Asia	Other countries
Energy	2,120.3	1,947.8	172.5	--	--	--	--
Media	890.1	890.1	--	--	--	--	--
Automotive components	1,158.4	79.4	725.5	72.5	240.5	34.5	6.0
Healthcare	349.6	349.6	--	--	--	--	--
Other	4.3	--	4.3	--	--	--	--
Total consolidated revenues	4,522.7	3,266.9	902.3	72.5	240.5	34.5	6.0
Percentages	100.0%	72.2%	20.0%	1.6%	5.3%	0.8%	0.1%

The types of products marketed by the Group and the nature of its business sectors mean that revenue flows are reasonably linear throughout the year and are not subject to any particular cyclical phenomena on a like-for-like basis.

13. OPERATING COSTS AND INCOME

13.a. Costs for the purchase of good

This item has risen from € 2,543,498 thousand in 2011 to € 3,073,901 thousand in 2012. The costs include € 328.8 million paid to related parties of which € 328 million attributable to dealings with Tirreno Power, an associate.

13.b. Costs for service

This item went from € 844,936 thousand in 2011 to € 827,502 thousand in 2012, as can be seen from the following breakdown:

<i>(in thousands of euro)</i>	<i>2012</i>	<i>2011</i>
Technical and professional consulting	107,071	120,588
Distribution and transport costs	43,380	42,744
Outsourcing	63,291	68,965
Other expenses	613,946	612,639
Total	827,688	844,936

13.c. Personnel costs

Personnel costs totalled € 744,942 thousand in 2012 (€ 720,032 thousand in 2011).

<i>(in thousands of euro)</i>	<i>2012</i>	<i>2011</i>
Salaries and wages	510,073	485,176
Social security contributions	165,638	157,604
Employee leaving indemnity	26,579	22,058
Pensions and similar benefits	3,331	2,521
Valuation of stock option plans	11,048	11,502
Other costs	28,273	41,171
Total	744,942	720,032

The Group had an average of 14,092 employees in 2012 (13,497 in 2011).

The increase is mainly due to the Systèmes Moteurs Group becoming part of the Sogefi Group.

13.d. Other operating income

This item can be broken down as follows:

<i>(in thousands of euro)</i>	<i>2012</i>	<i>2011</i>
State grants	4,805	3,041
Capital gains on asset disposals	9,216	14,070
Contingent assets and other income	158,479	210,595
Total	172,500	227,706

The decrease in “Contingent assets and other income” refers to the Sorgenia Group.

13.e. Other operating costs

This item can be broken down as follows:

<i>(in thousands of euro)</i>	<i>2012</i>	<i>2011</i>
Write-downs and losses on receivables	57,814	46,004
Allocation to provisions for risks and losses	18,020	16,535
Indirect taxes	34,253	29,213
Restructuring costs	12,242	8,426
Capital losses on asset disposals	4,324	2,031
Contingent liabilities and other costs	126,774	86,632
Total	253,427	188,841

14. FINANCIAL INCOME AND EXPENSE

14.a. Financial income

This item includes the following:

<i>(in thousands of euro)</i>	<i>2012</i>	<i>2011</i>
Interest income on bank accounts	10,697	6,737
Interest on securities	17,504	12,949
Other interest income	23,145	21,500
Interest rate derivatives	14,170	7,042
Exchange gains	2,550	10,669
Other financial income	126	617
Total	68,192	59,514

14.b. Financial expense

This item includes the following:

<i>(in thousands of euro)</i>	<i>2012</i>	<i>2011</i>
Interest expense on bank accounts	72,354	77,116
Interest expense on bonds	26,658	28,947
Other interest expense	35,393	25,127
Interest rate derivatives	37,558	22,821
Exchange losses	3,399	8,941
Other financial expenses	17,944	15,818
Total	193,306	178,770

14.c. Gains from trading securities

The breakdown of "Gains from trading securities" is as follows:

<i>(in thousands of euro)</i>	<i>2012</i>	<i>2011</i>
Shares and options - subsidiaries	141	1,950
Shares and options - other companies	1,405	2,573
Other securities and other gains	20,437	9,283
Total	21,983	13,806

"Shares and options - subsidiaries" relates to the capital gain on disposal of the subsidiary Devil Peak S.r.l. The prior year figure referred to gains on the disposal of Jupiter Asset Management, Jupiter Justitia and Resolution.

14.d. Losses from trading securities

The breakdown of "Losses from trading securities" is the following:

<i>(in thousands of euro)</i>	<i>2012</i>	<i>2011</i>
Shares and options - subsidiaries	4,751	--
Shares and options - other companies	1,514	2,871
Other securities and other losses	5,448	1,994
Total	11,713	4,865

"Shares and options - subsidiaries" refer to the capital loss on disposal of the 62% interest owned in the subsidiary Food Concepts Holdings S.A..

14.e. Adjustments to the value of financial assets

This item, amounting to € 8,925 thousand, refers (in positive) to the fair value measurement of the "Securities" shown under Current assets for € 13,658 thousand and (in negative) to the write-down of "Securities" and "Equity investments" shown in Non-current assets for € 4,733 thousand, of which € 1,447 thousand refers to the impairment of the residual investment in the company Food Concepts Holding.

15. INCOME TAXES

Income taxes can be broken down as follows:

<i>(in thousands of euro)</i>	2012	2011
Current taxes	42.340	68.667
Deferred taxes	(7.179)	(12.871)
Tax expense from prior periods	(5.458)	1.865
Total	29.703	57.661

It should be noted that some values for 2011 were restated following the completion by the Sogefi group of the Purchase Price Allocation process for Systèmes Moteurs S.A.S.

"Prior year taxes" include the positive effects introduced by Legislative Decree 201/2011, which allowed the recovery from IRES of the higher IRAP on the cost of labour for the period 2007-2011 for a total of € 17,299 thousand (€ 12,560 relating to the Espresso Group, € 4,048 thousand relating to the Kos Group and € 691 thousand relating to the Sogefi Group).

This item includes allowances for fiscal disputes of € 11,870 thousand, accounted for by the Espresso Group.

The following chart shows a reconciliation of the ordinary tax rate and the effective tax rate for 2012:

<i>(in thousands of euro)</i>	2012
Pre-tax income (loss) as per the financial statements	(45,181)
Theoretical income taxes	(12,425)
Tax effect of non-deductible costs	23,472
Tax effect of prior year losses which generate deferred tax assets in the current year	16,217
Tax effect of prior year losses which did not generate deferred tax assets	(6,058)
Tax effect on interest rate differentials of foreign companies	(1,308)
Non-taxable grants	..
Other	(4,380)
Income taxes	15,518
Average effective tax rate	34,35
Theoretical tax rate	27,50
IRAP and other taxes	19,643
Tax charges from prior periods	(5,458)
Total taxes as per the financial statements	29,703

16. EARNINGS PER SHARE

Basic earnings (loss) per share is calculated by dividing net result for the period attributable to the ordinary shareholders by the weighted average number of shares in circulation. Diluted earnings (loss) per share is calculated by dividing net result for the period attributable to the ordinary shareholders by the weighted average number of ordinary shares in circulation during the period, adjusted for the dilutive effect of outstanding options. Treasury shares are not included in the calculation.

The Company has only one category of potential ordinary shares, those deriving from stock option and stock grant plans assigned to employees.

The dilutive effect that these ordinary shares to be issued or assigned to stock option and stock grant plans will have on earnings (loss) per share is not significant.

In calculating the average number of options, the average fair value of the shares for each financial year was used. The average fair value of each CIR ordinary share in 2012 was € 0.9617 compared with an average fair value in 2011 of € 1.5012.

The following chart provides information on the shares used to calculate basic and diluted earnings per share.

Basic earnings (loss) per share

	2012	2011
Net income (loss) attributable to the Shareholders (in thousands of euro)	(33,065)	9,744
Weighted average number of ordinary shares in circulation	743,349,992	747,242,075
Basic earnings (loss) per share (euro)	(0.0445)	0.0130

	2012	2011
Net income (loss) from the statement of comprehensive income attributable to the Shareholders (in thousands of euro)	(52,257)	(36,502)
Weighted average number of ordinary shares in circulation	743,349,992	747,242,075
Basic earnings (loss) per share (euro)	(0.0703)	(0.0488)

Diluted earnings (loss) per share

	2012	2011
Net income (loss) attributable to the Shareholders (in thousands of euro)	(33,065)	9,744
Weighted average number of ordinary shares in circulation	743,349,992	747,242,075
Weighted average number of options	--	3,675,050
No. of shares that could have been issued at fair value	--	(2,695,771)
Adjusted weighted average number of shares in circulation	743,349,992	748,203,354
Diluted earnings (loss) per share (euro)	(0.0445)	0.0130

	2012	2011
Net income (loss) from the statement of comprehensive income attributable to the Shareholders (in thousands of euro)	(52,257)	(36,502)
Weighted average number of ordinary shares in circulation	743,349,992	747,242,075
Weighted average number of options	--	3,667,050
No. of shares that could have been issued at fair value	--	(2,695,771)
Adjusted weighted average number of shares in circulation	743,349,992	748,203,354
Diluted earnings (loss) per share (euro)	(0.0703)	(0.0488)

17. DIVIDENDS PAID

Dividends paid in 2012 totalled € 18,584 thousand, equal to € 0.025 per share.

18. FINANCIAL RISK MANAGEMENT: ADDITIONAL DISCLOSURES (IFRS 7)

The CIR Group operates in different sectors of industry and services both at national and international level and thus its business is exposed to various kinds of financial risk, including market risk (exchange rate risk and price risk), credit risk, liquidity risk and interest rate risk.

To minimise certain types of risks the Group uses hedging derivatives.

Risk management is carried out by the central finance and treasury function on the basis of policies approved by CIR Management and transmitted to the subsidiaries on 25 July 2003.

Market risk

Foreign currency risk

As the Group operates internationally, Sogefi in particular, it is exposed to the risk that fluctuations in exchange rates could affect the fair value of some of its assets and liabilities. The Sogefi Group produces and sells mainly in the Euro Area, but it is subject to foreign currency risk, especially versus the GB pound, Brazilian real, US dollar, Argentine peso, Chinese renminbi and Canadian dollar.

The Sorigenia Group is exposed to the risk of fluctuations in exchange rates when purchasing fuel, which tends to be priced in USD.

Sorigenia uses forward contracts to reduce the risk of fluctuations in the EUR/USD exchange rate. As explained in the note on price risk, in certain cases it hedges the purchase and sale formulae directly as the price partly depends on the EUR/USD exchange rate. By fixing its formulae in euro, the exchange rate is also indirectly hedged.

Regarding the foreign currency risk of translating the financial statements of international subsidiaries, the operating companies generally have a degree of convergence between their sourcing costs and their sales revenues and this kind of risk is also limited by the fact that the companies operate in their local currencies, are active in their own domestic markets and abroad and, if necessary, can arrange funding locally.

In order to show the potential effect in the financial statements of the exposure to exchange rate risk, sensitivity analysis was carried out. The analyses were conducted on the assumption of shifts in the exchange rate.

For the purposes of comparison, the results of the analysis at 31 December 2011 are also shown.

<i>Sensitivity Analysis EUR/USD exchange rate</i>	<i>31.12.2012</i>		<i>31.12.2011</i>	
Shift in EUR/USD exchange rate	-5%	+ 5%	-5%	+ 5%
Effect on income statement (EUR/thousands)	(2,256)	2,212	714	(634)
Effect on equity (EUR/thousands)	(2,256)	2,212	774	(711)

Price risk

Through the activity in the energy sector of the Sorigenia Group, the Group is exposed to the risk of fluctuations in energy commodity prices on the purchase of fuels for its power production plants and on its purchases and sales of gas and electricity (where contracts stipulate specific indexing to baskets of fuels). Moreover since almost all of the commodities in question are priced in USD, the Group is also exposed to fluctuations in the EUR/USD exchange rate (as said before).

Sorigenia continually monitors this exposure by breaking its contractual formulae down into the underlying risk factors and managing the exposure using a two-step procedure.

The first step involves the negotiation of gas and electricity purchase agreements and the definition of pricing policies. On both purchase and sales sides, price control enables the Group to guarantee a high level of natural hedging, minimising the impact on margins of the factors of uncertainty mentioned above not only at business line level but also at consolidated portfolio level.

The second step involves monitoring net remaining exposure after the action described above.

Sorgenia trades derivatives with leading banks in order to minimise counterparty risk. The derivatives in question are traded over the counter (OTC) directly with the counterparties and are mainly fixed vs. floating swaps or vice versa for commodity price hedges, and outright forwards for foreign currency risk hedges.

Since 2008, given the greater liquidity achieved by derivatives markets, in order to reduce basis risk on the hedges as far as possible, the Group has been negotiating contracts with its financial counterparties where the underlying is the whole formula for the purchase or sale of natural gas or electricity. These hedges make it possible to eliminate changes in costs and revenues caused by the commodity risk factor and the foreign currency risk factor through a single contract.

Since 2010 these commodity derivative contracts, being entered into exclusively for hedging purposes, are managed according to the IAS 39 rules on hedge accounting. Therefore the effects in terms of profit and loss of changes in their fair value are recognised directly to a special equity reserve (Cash flow hedge reserve). Should the effectiveness test show that the hedges ineffective to some degree, the ineffective part is recognised immediately to the income statement.

The fair value of derivative contracts is calculated using market forward prices as at the reporting date, when the underlying commodities are traded on markets with a forward price structure. Otherwise, fair value is calculated using internal models based on data and information available on the market, supplied by recognised and reliable third party sources.

Regarding the hierarchical form of classification reviewed by IFRS 7 which is based on three levels according to the method and the input used to determine fair value, it should be pointed out that the financial instruments used for managing commodity risk belong to level 2 of the fair value hierarchy.

The valuation techniques for derivatives outstanding at the end of the year were the same as those adopted in the previous year.

For commodities the maturity of the related swaps is generally less than 18 months. However, in certain exceptional cases hedges with longer maturities have been entered into with end customers for fixed price contracts or contracts with particular kinds of options involved. At 31 December there were open positions in liquid fuel derivatives with maturities in 2013.

In order to measure Group exposure to the risk of changes in commodity prices and gas and electricity price formulae, a sensitivity analysis was carried out based on revaluation of the fair value of derivative contracts outstanding at 31 December 2012 in the event of shifts in commodity prices.

In order to revalue these financial instruments and quantify the effect on the accounts of shifts in the price curve of liquid fuels, guaranteeing the highest possible degree of measurement accuracy, the same financial models were used as those used to produce the reports for management showing how exposure is constantly monitored.

The following chart shows the results of the sensitivity analysis for commodities:

<i>(amounts in thousands of euro)</i>	<i>31.12.2012</i>		<i>31.12.2011</i>	
Change	-5%	+5%	-5%	+5%
Effect on the income statement	(6,198)	6,355	956	(960)
Effect on equity	(4,956)	4,956	14,382	(14,382)

As in previous years, the Sorgenia Group minimised its exposure to changes in commodity price risk hedges through increased opportunities for defining sales formulae consistent with its sourcing formulae, through hedging strategies using financial instruments trading and also through the new use of more structured instruments with a short-term horizon.

Commodity derivative contracts, in fact, are entered into only for hedging purposes, therefore changes in the results of the commodity derivative positions are offset by changes in the results of the underlying physical positions with an impact on the income statement essentially limited to the basis risk in all cases where there is a discrepancy between the commodities of the underlying physical contracts and the liquid commodities traded on the markets, both regulated and OTC, on which the derivatives are based. This activity is segregated to a special portfolio with transactions completed on the power, commodities and foreign exchange markets. This portfolio is monitored on a daily basis by a special company department, has strict limits on risk levels (calculated through VaR) and profit and loss (calculated as a stop-loss limit through P&L).

In 2010 operations in this area began with a daily VaR of 95%. The average percentage of use of the VAR limit has been 40%, closing at 31 December with a value of approximately € 275 thousands while the stop loss limit has so far never been activated.

In order to reliably calculate VaR, the Risk Management Department of Sorgenia S.p.A. developed a mixed benchmark-simulation approach based on which the price scenarios generated are consistent with benchmarks describing time series observations. The Value at Risk is daily and has a confidence level of 95%. The VaR value is a function of statistical price distribution and market returns, and also of time series correlations of different products and markets.

Credit risk

Credit risk can be valued both in commercial terms relating to customer type, contractual terms and sales concentration, and in financial terms in connection with the type of counterparty involved in financial transactions. Within the Group there is no significant concentration of credit risk.

Some time ago adequate policies were put in place to ensure that sales are made to customers of good standing. The counterparties for derivative products and cash transactions are exclusively financial institutions with a high credit rating. The Group has policies that limit credit exposure to individual financial institutions.

Credit risk is different depending on the business sector concerned. In the utilities sector, for example, the assessment of credit risk exposure is made using internal processes and aided by companies with sector expertise in both credit facility assessment and allocation and in credit collection management. The customer base and its diversification make exposure to a concentration of credit risk immaterial.

In the "Automotive components" sector there is no excessive concentration of risk since the Original Equipment and After-market distribution channels of operation are car manufacturers or large purchasing groups without any particular concentration of risk.

The "Media" sector has no areas of risk for trade receivables of a significant entity and in any event the Group adopts operating procedures that prevent the sale of products or services to customers without an adequate credit profile or collateral.

The "Healthcare" sector does not present any concentration of credit risk because credit exposure is spread over a large number of customers and counterparties especially in the residential care homes sector. The hospital sector, however, has a higher concentration of risk because most counterparties are local health authorities.

Since 2006 the CIR Group has been acquiring and managing non-performing loans and has put in place procedures for measuring and establishing the fair value of its portfolios.

The following pages include a chart showing the breakdown of credit risk and changes in the provision for write-down of receivables.

Liquidity risk

Prudent management of liquidity risk implies maintaining sufficient liquidity and tradeable securities and ensuring an adequate supply of credit facilities to ensure sufficient funding.

The Group systematically meets its maturities and commitments, and such conduct enables it to operate on the market with the necessary flexibility and reliability to maintain a correct balance between funding and deployment of its financial resources.

The companies heading the four major business sectors manage their liquidity risk directly and independently. Tight control is exercised over the net financial position and its short, medium and long term developments. In general the CIR Group follows an extremely prudent financial policy using mainly medium/long-term funding structures. The operating Groups' treasuries are centrally managed.

The following pages include a chart showing the breakdown of liquidity risk by operating group.

Interest rate risk (fair value and cash flow)

Interest rate risk depends on fluctuations in market rates which can cause changes in the fair value of cash flows of financial assets or liabilities.

Interest rate risk mainly concerns long-term bond issued at a fixed rate, thereby exposing the Group to the risk of fair value changes in the loans themselves as interest rates change.

Following risk management policies, the Parent Company and the subsidiaries have entered into various IRS contracts over the years in order to hedge interest rate risk on their bond loan issues and on loan agreements.

Sensitivity analysis

A parallel shift of one percentage point in the 3-month Euribor curve would have the following effect on the floating rate assets and liabilities of the Group:

<i>(amounts in thousands of euro)</i>	<i>31.12.2012</i>		<i>31.12.2011</i>	
Change	-1%	+1%	-1%	+1%
Effect on the income statement	(4,012)	4,944	6,157	(4,715)
Effect on equity	(52,040)	50.115	(52,897)	52,138

(*) Note that for the Sogefi Group at 31 December 2012, the sensitivity of interest rate hedges was tested using the "Kirk Approach", which has replaced the "Full Revaluation" approach used in previous years; the figures at 31 December 2011 have been recalculated using the new approach.

(**) Note that for the KOS Group, given that interest rates in 2012 reached low levels tending to zero, it was decided only to evaluate the effect of a +1% change in interest rates on the income statement and balance sheet.

Derivatives

Derivatives are recognised at their fair value.

For accounting purposes hedging transactions are classified as:

- *fair value hedges* if they are subject to price changes in the market value of the underlying asset or liability;
- *cash flow hedges* if they are entered into against the risk of changing cash flows from an existing asset and liability, or from a future transaction.
- *hedges of net investments in foreign operations* if they are entered into to protect against foreign currency risk from the translation of subsidiaries' equity denominated in a currency other than the Group's functional currency.

For derivatives classified as fair value hedges, gains and losses resulting from both the determination of their market value and the adjustment to fair value of the element underlying the hedge are recognised to the income statement.

For derivatives classified as cash flow hedges (e.g. interest rate swaps) gains and losses on their mark-to-market are recognised directly to equity for the part "effectively" hedging the risk concerned, while any "ineffective" part is recognised to the income statement.

For hedges of net investments in foreign operations, gains and losses on their mark-to-market are recognised directly to equity for the part "effectively" hedging the risk in questions, while any "ineffective" part is recognised in the income statement.

On initial hedge accounting recognition, derivatives are accompanied by a hedging relationship which designates the individual derivative as a hedge and specifies the hedge effectiveness parameters in relation to the financial instrument hedged.

Hedge effectiveness is tested at regular intervals, the effective part of the relationship recognised to equity and any ineffective part recognised to the income statement. More specifically, the hedge is considered effective when the change in fair value or in the financial flows of the instrument hedged is almost entirely offset by the change in fair value or cash flows of the hedging instrument and when the results achieved are in a range of 80%-125%.

The Group also enters into derivative financial instruments for hedging purposes, as part of the optimisation of investment management.

At 31 December 2012 the Group recognised the following derivatives as hedges at their notional value:

a Interest rate hedges:

interest rate hedge on the Gruppo Editoriale L'Espresso fixed to floating bond (notional value € 50 million);

hedging of Sogefi bank borrowings, notional value € 200.4 million maturing in 2013 (€ 80 million), maturing in 2016 (€ 30.4 million) and maturing in 2018 (€ 90 million);

hedging of Sorgenia Group bank borrowings, notional value € 1.733,2 million;

hedging of Kos Group bank borrowings, notional value € 103.2 million;

b Foreign currency hedges:

forward sales for a total of USD 111 million to hedge investments in hedge funds maturing in March 2013;

forward sale of USD 7.2 million against EUR maturing in 2013;

forward purchase of EUR 3.1 million against GBP maturing in 2013;

forward purchase of USD 0.9 million to hedge borrowings maturing in 2013;

forward purchase of CAD 17 million against GBP maturing in 2013;

forward purchase of USD 0.7 million against EUR maturing in 2013;

forward sale of USD 0.9 million million to hedge borrowings maturing in April 2012;

forward sale of CHF 23.3 million to hedge investments in bonds maturing in 2013;

forward sale of USD 5.4 million to hedge investments in bonds maturing in 2013;

Capital ratios

Management regulates the use of leverage to guarantee solidity and flexibility in the asset and liability structure of CIR and its financial holding companies, measuring the ratio of funding sources to investment activity.

Leverage is calculated as the ratio between net debt (represented by bonds issued net of cash and cash equivalents and investments in liquid financial instruments, according to parameters agreed with the rating agency) and the total investments measured at fair value (including equity investments and remaining investments in financial instruments).

Management's objective is to maintain a solid and flexible financial structure to keep this ratio below restricted percentages. Currently it stands at 11%.

Contractual clauses of borrowings

Certain agreements regarding Group borrowings contain special clauses which, in the event of failure to comply with certain economic and financial covenants, envisage the lending banks' option to claim repayment if the company involved does not immediately remedy the infringement of such covenants as required under the terms and conditions of the agreements.

At 31 December 2012 all the contractual clauses relating to medium and long term financial liabilities were fully complied with by the Group.

Below is a description of the main covenants relating to the borrowings of the operating sub-holding companies outstanding at year end.

Sogefi Group

Sogefi S.p.A., the parent company of the group's sub-holding operating in the automotive sector, has undertaken to comply with a series of "covenants" as summarised below:

- syndicated loan of € 200 million: ratio of consolidated net financial position to consolidated EBITDA of 3.5; ratio of consolidated normalised EBITDA to consolidated net financial expenses of not less than 4;
- loan of € 100 million: ratio of consolidated net financial position to consolidated EBITDA lower than 4;
- loan of € 60 million: ratio of consolidated net financial position to consolidated EBITDA lower than 3.5;
- loans for a total of € 115 million; ratio of consolidated net financial position to consolidated normalised EBITDA of less than or equal to 3.5; ratio of consolidated normalised EBITDA to consolidated net financial expenses of not less than 4.

At 31 December 2012 the covenants were fully complied with by the Group.

Sorgenia Group

The Sorgenia Group, through a number of its subsidiaries, has undertaken to respect financial covenants in relation to loans for the construction of power plants and wind farms.

These covenants measure the relationship between operating cash flow net of tax and the cost of servicing debt, given by the sum of the principal and interest payments made during the reference period (known as the "Debt Service Coverage Ratio" or DSCR).

The main contractual agreements in connection with the DSCR concern:

- the distribution of dividends: possible only if the ratios mentioned in the covenants exceed the thresholds laid down in the contract; or
- the extent to which the project is able to repay the debt: if the ratios mentioned in the covenants are lower than the minimum thresholds, the banks can ask the company to implement a series of remedies established in the contract.

The measurement of these covenant ratios is carried out either half-yearly or annually, as laid down in the contract, calculated as of 30 June and/or 31 December each year. We can confirm that the covenants were complied with at the end of the year.

KOS Group

The KOS Group has undertaken to comply with a series of covenants in relation to a number of loans, details of which are as follows:

- a revolving line of credit obtained by KOS, the sub-holding company, with a residual balance of € 16 million at 31 December 2012: ratio of consolidated net financial position to consolidated shareholders' equity of less than 2.5;
- syndicated loan for a total remaining at 31 December 2012 of approximately € 18.9 million obtained by Residenze Anni Azzurri S.r.l.: ratio of net financial position to EBITDA lower than 3.88 and ratio of consolidated net financial position to consolidated equity lower than 2.19;
- syndicated loan for a total remaining at 31 December 2012 of approximately € 28.7 million obtained by Istituto di Riabilitazione Santo Stefano S.r.l.: ratio of net financial position to EBITDA lower than 5.4, ratio of consolidated net financial position to consolidated equity below 1.4, and a debt service coverage ratio of above 1;
- a loan obtained by Medipass S.p.A. with a residual balance of € 3.9 million at 31 December 2012: ratio of net financial position to EBITDA of less than 3.3 and ratio of consolidated net financial position to consolidated shareholders' equity of less than 3.2 and a Debt Service Coverage Ratio of more than 1.

Measurement of financial assets and liabilities and fair value hierarchy

The fair value of financial assets and liabilities is calculated as follows:

- the fair value of financial assets with standard terms and conditions listed on an active market is measured on the basis of prices published on the active market;
- the fair value of other financial assets and liabilities (except derivatives) is measured using commonly accepted methods and based on analytical models using discounted cash flows, which as variables use prices observable in recent market transactions and from broker listed prices for similar instruments;
- for derivatives listed on an active market the fair value is measured on market prices; if these prices are not published, different approaches are used for the various types of instruments.

In particular, for the measurement of certain investments in bond instruments with no regular market, i.e. where there is an insufficient number of frequent transactions with a bid-ask spread and a sufficiently limited volatility, then the fair value of these instruments is mainly measured according to prices provided by leading international brokers at the request of the company, which are then validated through comparison with market prices, albeit of a limited number, or with prices observable for other instruments with similar characteristics.

In measuring investments in private equity funds, fair value is determined on the basis of the NAV disclosed by the respective fund administrators at the reporting date. Where such information is not available at the reporting date, the last official disclosure is used, which must not however be more than three months old at the reporting date and if necessary validated against information made available to investors by the fund managers at a later date.

The chart below shows the breakdown of financial assets and liabilities measured at fair value with an indication of whether all or part of the fair value is determined with direct reference to prices listed on an active market ("Level 1") or whether it is estimated using prices that can be inferred from market prices for similar assets or through valuation techniques for which all significant factors are inferred from data observable on the market ("Level 2") or from valuation techniques based mostly on input not observable on the market which therefore involve estimates and assumptions being made by management ("Level 3")

During 2012 no transfers were made between the different levels of fair value in the hierarchy. As far as the financial assets classified as level 3 are concerned, these are investments in venture capital which are measured using some market information that is not observable. They are held by the Group through CIR Ventures and where they refer to investments in companies operating in the information technology and communication sector (for a total amount of approximately € 10.1 million), and through Noventi Ventures, where they are investments in companies operating in the sector of innovative generation technologies and energy efficiency (for a total amount of approximately € 8.4 million).

19. GUARANTEES AND COMMITMENTS

At 31 December 2012 the guarantees and commitments position was as follows:

CIR and financial holding companies

For the incentive plans for directors and employees, CIR has a joint commitment with Verbund to buy back any shares of Sorgenia S.p.A. resulting from the exercise of options by employees who are beneficiaries of stock option plans outstanding as of 31 December 2012.

Other guarantees and commitments of CIR are as follows:

- commitments for private equity fund investments by CIR International for € 10.6 million;

Sorgenia Group

1. Guarantees issued

As collateral for loans obtained by subsidiaries, shares representing the capital of the borrowing companies have been pledged in favour of the lending banks for a total of € 455,320 thousand (€ 473,822 thousand at 31 December 2011).

2. Sureties

Within the Group sureties have been granted to third parties for a total of € 329,255 thousand (€ 326,281 at 31 December 2011). These are mainly bonds issued to guarantee payments linked to the purchase and transmission of electricity and gas and commitments to the Tax Authority for VAT reimbursement claims. This category also includes sureties requested for power plant constructions and land purchases.

3. Commitments

The commitments outstanding at the reporting date refer mainly to guarantees issued by Sorgenia S.p.A. in favour of the banks financing Sorgenia Power S.p.A. for € 195,800 thousand for the Termoli power plant and € 660,000 thousand for the Aprilia and Bertinico-Turano Lodigiano plants. Sorgenia S.p.A. signed a commitment to capitalise Sorgenia Power by up to € 47,537 thousand and to fund the company by up to € 100,000 thousand. There is also a commitment to contribute a maximum of USD 30,000 to the subsidiary Sorgenia USA, of which USD 23,587 already paid in leaving a residual commitment outstanding of € 4,861 thousand.

Sorgenia and the other equal-interest shareholders of Gica S.A., following an agreement signed on 8 April 2008, undertook to pay in up to a maximum of € 7.5 million each as a financial commitment. In December 2012 the agreement was amended and the commitment for each shareholders was reduced to € 1.625 million. During the year no payments were requested of the shareholders and thus Sorgenia's commitment at the end of the year was for € 135 thousand.

Sorgenia E&P Colombia BV and Sorgenia International BV have taken a commitment for € 10,319 thousand euro for the investments in the Cerrero and Balay licences, as well as the Polish shale gas licence. Sorgenia E&P UK Ltd and MPX Energy Ltd have taken a commitment for € 14,769 thousand euro in connection with the investment in the 25th Bidding Round licences.

For natural gas purchases and sales only, the supply contract includes the standard take or pay clause which makes it compulsory for the buyer to pay for any shortfall in the amount withdrawn

compared to the annual minimum envisaged in the contract with reference to this clause CIR has issued a guarantee.

As a result of leasing transactions carried out by Sorgenia Minervino S.p.A., Sorgenia San Gregorio Magno, Sorgenia Castelnuovo di Conza and Sorgenia Campagna, a commitment has been taken not to relinquish direct and/or indirect control over the investments held in the companies that have entered into these leases. Sorgenia S.p.A. has also undertaken to guarantee a debt service coverage ratio established by the company with which the lease contract has been stipulated by Sorgenia San Gregorio Magno, Sorgenia Castelnuovo di Conza and Sorgenia Campagna, under which it agrees to refinance or recapitalise the subsidiary.

Espresso Group

Apart from liens on printing plants and rotary presses arranged through banks to cover loans agreed in 2005, at 31 December 2012 the Group had commitments outstanding for € 2,088 thousand in relation to contracts for the purchase of plants and other printing equipment (€ 330 thousand) mainly for La Repubblica, for the North-West divisions of Fin.E.Gi.L. Editoriale and for La Nuova Sardegna.

Guarantees issued amounted to € 1,758 thousand and referred mainly to guarantees given by the Parent Company and the subsidiaries Elemedia and A. Manzoni & C. for the lease of their respective premises, and also to the payment obligation undertaken by the Parent Company to the Tax Authorities to guarantee excess credit positions created in the last three years.

Sogefi Group

Operating leases

For accounting purposes, leases and rental contracts are classified as operating leases when the following conditions apply:

- a significant part of the risks and benefits of ownership are retained by the lessor;
- there are no buy-back options on the leased property at a price that does not represent its presumed market value at period end;
- the duration of the contract does not extend over most of the useful life of the asset leased or rented.

The rental payments for operating leases are recognised to the income statement in line with the underlying contracts.

The main operating leases outstanding at 31 December 2011 refer to the following subsidiaries:

- Shanghai (Suzhou) Auto Parts Co. Ltd for the lease of two production site located in Wujiang, which contract terminates in March 2033. At 31 December 2012 the remaining instalments amounted to € 13,207 thousand, of which € 626 thousand due within one year. The Group has not given any form of guarantee on this contract;
- Alleward Federn GmbH for the lease of the Volklingen production site. In May 2010 the company renewed the lease of its production site until May 2020. The remaining instalments at 31 December 2012 totalled € 2,839 thousand, of which € 366 thousand due within one year. The Group has not given any form of guarantee on this contract;
- Filtrauto S.A. for the lease of the Guyancourt production site. The contract terminates in March 2020 and at 31 December 2012 the remaining instalments amounted to € 4,432 thousand, of which € 751 thousand within one year. The Group has not given any form of guarantee on this contract.

- Sogefi Engine Systems Canada Corp. for the lease of the Montreal production site. The contract terminates in December 2015 and at 31 December 2012 the remaining instalments amounted to € 2,350 thousand, of which € 772 thousand within one year. The Group has not given any form of guarantee on this contract.
- Shanghai Sogefi Auto Parts Co., Ltd. for the lease of a production site, located in Shanghai which contract terminates in August 2023. At 31 December 2012 the remaining instalments amount to € 2,094 thousand, of which € 197 thousand within one year. The Group has not given any form of guarantee on these contracts.
- Allevard Sogefi U.S.A. Inc. for the lease of the production site in Prichard (West Virginia). The contract terminates in May 2019 and the remaining instalments at 31 December 2012 total € 1,929 thousand, of which € 301 thousand within one year. Against this contract Sogefi S.p.A. has issued a guarantee for approximately 59% of remaining lease instalments. The guarantee is renewed at the end of each year based on the residual amount outstanding. There are no restrictions of any kind connected with this kind of leasing and, at the end of the contract, the US company will have the right to buy the property at market price.

Future lease payments in relation to the operating lease contracts of the Sogefi Group at 31 December 2012 are as follow:

<i>(in thousands of euro)</i>	<i>2012</i>	<i>2011</i>
Within 1 year	6,698	6,336
1-5 years	18,746	14,796
Over 5 years	14,029	4,139
Total	39,473	25,271

Investment commitments

At 31 December 2012 there were commitments for investments for a total of € 480 thousand.

Guarantees issued

The details of these guarantees are as follows:

<i>(in thousands of euro)</i>	<i>2012</i>	<i>2011</i>
Guarantees to third parties	1,232	1,340
Other personal guarantees to third parties	9,714	9,714
Collateral provided for recognised borrowings	13,237	1,738

Guarantees issued refer to operating lease contracts and guarantees given to certain clients and are recognised at the value of the commitment outstanding as of the reporting date.

The item "Other personal guarantees to third parties" refers to the LPDN GmbH commitment to the employee pension fund of the two business divisions at the time of the acquisition completed in 1996. This commitment is covered by contractual obligations on the part of the vendor, a leading German market operator.

Collateral refers exclusively to the subsidiaries Systèmes Moteurs S.A.S., Sogefi Engine Systems Canada Corp. and Allevard IAI Suspensions Private Ltd. which provided collateral to lending banks on their tangible assets, inventories and trade receivables.

Other risks

At 31 December 2012 the Sogefi Group held assets belonging to third parties on its group company premises for € 6,064 thousand.

KOS Group

Below is a breakdown of the bank guarantees and other guarantees issued by Kos S.p.A. for a total of approximately €2,422 thousand:

- a guarantee in favour of the Sanremo Town Council as a security deposit for urbanisation works, for € 226 thousand;
- a guarantee on behalf of Residenze Anni Azzurri S.r.l. for the lease of Santegidio S.r.l. (Scarnafigi), for € 100 thousand;
- a guarantee on behalf of Residenze Anni Azzurri S.r.l. for the Rivarolo property lease, for € 75 thousand;
- a guarantee on behalf of Residenze Anni Azzurri S.r.l. for the Rivarolo business unit lease, for € 35 thousand;
- a guarantee on behalf of Residenze Anni Azzurri S.r.l. for the care home due to be built in Montanaro to guarantee signing of the future lease agreement for € 550 thousand;
- a guarantee on behalf of Residenze Anni Azzurri S.r.l. for the Peveragno property lease, for € 235 thousand;
- a guarantee on behalf of Residenze Anni Azzurri S.r.l. for the Dorzano property lease, for € 121 thousand;
- a guarantee on behalf of Residenze Anni Azzurri S.r.l. for the Dormelletto property lease, for € 200 thousand;
- a guarantee on behalf of Residenze Anni Azzurri S.r.l. for a property lease, for € 180 thousand;
- an omnibus guarantee on behalf of Medipass S.p.A. in its relations with the Venice Health Authority, for € 700 thousand.

Bank guarantees given by other group companies for € 9,511 thousand, with the following breakdown:

- a guarantee given by Residenze Anni Azzurri S.r.l. to guarantee care home lease payments, for € 8,374 thousand;
- a guarantee given by Residenze Anni Azzurri S.r.l. in favour of HSS Real Estate S.p.A. to guarantee the security deposit policy for urbanisation works regarding the care home to be built in the municipality of Monza, for € 184 thousand;
- guarantee policies issued by Ospedale di Suzzara in favour of F.Ili Montecchi, for € 953 thousand.

At 31 December 2012 the other commitments and risks amounted to € 6,124 thousand and mainly referred to:

- assets on free loan for € 2,292 thousand
- commitments relating to the refurbishment of the Suzzara hospital, for contracts already signed at 31 December 2012, for € 76 thousand;
- contractual commitments for technology upgrades to equipment, where this proves necessary, for approximately € 692 thousand. Given the current status of the contracts, there is no reason to assume that such commitments will arise;
- third party commitments to sell for approximately € 173 thousand;
- counter-guarantee commitments for the successful completion of structural works for around € 2,891 thousand.

The Group carries out its business activities in owned and leased properties. In particular, the duration of leases varies from 3 to 9 years and is generally renewable. Of the 41 care homes for the elderly in operation at the reporting date, 7 properties are owned, while 10 of the 22 functional and psychiatric rehabilitation facilities are owned (including two residential care homes for the elderly). The remaining facilities (day hospitals, psychiatric treatment communities, diagnostics departments) are generally leased.

The chart below shows the lease payment maturities. The amounts given are net of VAT.

<i>(in thousands of euro)</i>	<i>Reporting period</i>	<i>< 1 year</i>	<i>> 1 < 2 years</i>	<i>> 2 < 3 years</i>	<i>> 3 < 4 years</i>	<i>> 4 < 5 years</i>	<i>> 5 years</i>
Property lease payments due	31/12/2011	15,231	15,145	15,290	15,123	15,145	133,163
Property lease payments due	31/12/2012	19,059	18,857	17,903	17,861	18,002	145,174

20. INFORMATION ON THE BUSINESS SECTOR

The business sectors coincide with the Groups of companies over which CIR S.p.A. has control. These are specifically:

- the Sorgenia Group: utilities;
- the Espresso Group: media;
- the Sogefi Group: automotive components;
- the KOS Group: healthcare.

Geographically, with the exception of the Sogefi group, the business is carried out almost exclusively in Italy.

A chart showing the breakdown of income components and balance sheet information of the primary sector is shown in the Report on Operations, while details regarding revenues by geographical area (secondary sector) are given in the Notes to the Financial Statements in the section regarding revenues (note 12).

The breakdown by geographical area of assets, investments and depreciation/ write-downs is shown in the following chart:

<i>(in thousands of euro)</i>	<i>Assets</i>	<i>Investments</i>	<i>Depreciation/ Write-downs</i>
Italy	8,785,487	189,318	216,313
Other European countries	1,365,316	76,291	63,369
North America	126,402	10,910	6,657
South America	147,365	29,217	22,314
Asia	77,050	13,094	3,422
Consolidation adjustments	(2,411,370)	(1,882)	(64,325)
Total assets	8,090,250	316,948	247,750

21. JOINT VENTURES

The main joint ventures at 31 December 2012 were Tirreno Power and Sorgenia France Production.

International accounting standards envisage two methods for consolidating investments in joint ventures:

- the standard method, which involves proportional consolidation;
- the alternative method which involves use of the equity method.

The Group has adopted the equity method for the sake of consistency with accounts presented to date.

The chart below shows the key financial figures of Tirreno Power:

<i>(in millions of euro)</i>	<i>Financial year 2012</i>	<i>Financial year 2011</i>	<i>Change absolute</i>	<i>Change %</i>
Income statement				
Electricity sold (TWh)	15.9	15.4	0.5	3.6
Revenues from sales and services	1,413.6	1,359.4	54.2	4.0
EBITDA	155.0	212.8	(57.8)	(27.2)
Net result	11.3	43.3	(32.0)	(73.8)

	<i>31.12.2012</i>	<i>31.12.2011</i>	<i>Change absolute</i>
Statement of financial position			
Net invested capital	1,237.3	1,417.5	(180.2)
Net financial debt	719.0	895.3	(176.3)
Equity	518.3	522.2	(3.9)
No. of employees	536	535	1

The share of net income of Tirreno Power, consolidated by the equity method on the basis of values determined by applying IAS/IFRS standards, was € 5.7 million in 2012 compared with € 21.6 million in 2011.

Note that as mentioned in item 7.d. "Investments in companies consolidated at equity", this investment was written down for a total of € 44.3 million as a result of the impairment test.

The main figures relating to Sorgenia France Production are as follows:

Sorgenia France Production

<i>(in millions of euro)</i>	<i>Financial year 2012</i>	<i>Financial year 2011</i>	<i>Change absolute</i>
Income statement			
Sales revenues	28.0	24.1	3.9
EBITDA	20.3	13.5	6.8
Operating income	10.6	6.3	4.3
Net result for the year	3.4	0.1	3.3

	<i>31.12.2012</i>	<i>31.12.2011</i>	<i>Change absolute</i>
Statement of financial position			
Net invested capital	165.6	128.1	37.5
Total shareholders' equity	20.6	19.0	1.6
Net financial position	145.0	109.1	35.9

In accordance with IAS/IFRS, the value of the investment in Sorgenia France Production was tested for impairment at 31 December 2012.

22. NET FINANCIAL POSITION

The net financial position, in accordance with Consob Resolution no. 6064293 of 28 July 2006, can be broken down as follows:

<i>(in thousands of euro)</i>		<i>31.12.2012</i>	<i>31.12.2011</i>
A. Cash and bank deposits		666,153	494,006
B. Other cash and cash equivalents		105,473	126,495
C. Securities held for trading		410,343	613,877
D. Cash and cash equivalents (A) + (B) + (C)		1,181,969	1,234,378
E. Current financial receivables		35,489	11,956
F. Current bank payables	(*)	(292,787)	(216,473)
G. Bonds issued		(4,354)	(4,243)
H. Current portion of non-current borrowings		(624,546)	(637,610)
I. Other current financial payables		(13)	(2)
J. Current financial debt (F) + (G) + (H) + (I)		(921,700)	(858,328)
K. Net current financial position (J) + (E) + (D)		295,758	388,006
L. Non-current bank payables	(**)	(2,042,918)	(1,984,806)
M. Bonds issued		(496,379)	(525,802)
N. Other non-current payables	(**)	(260,918)	(212,531)
O. Non-current financial debt (L) + (M) + (N)		(2,800,215)	(2,723,139)
P. Net financial position (K) + (O)		(2,504,457)	(2,335,133)

(*) € 126,937 thousand (€ 292,787- € 165,850) is classified in the Statement of Financial Position under "Other borrowings".

(**) Classified under "Other borrowings" – Non-current liabilities

23. DISCLOSURES REGARDING SHARE-BASED INCENTIVE PLANS

Stock Grant Plans

The Stock Grant Plans involve the assignment free of charge of Units, not transferable to third parties or other beneficiaries, each of which offering the right of assignment of one CIR S.p.A. share. The Plans envisage two classes of rights: time-based units, which vest subject to the passing of a certain period of time, and performance units, which vest subject to the passing of a certain period of time and the achievement of certain objectives in terms of the "normal market value" of the stock (determined according to Art. 9, paragraph 4.a of the Consolidated Income Tax Act) as established in the Plan Regulations.

The regulations envisage a minimum holding of the shares covered by the Plan.

Shares assigned in implementation of the Plans will be made available exclusively from treasury shares held by CIR S.p.A. The regulations state that an essential condition for assignment of the shares is continued service or directorship with the Company or its subsidiaries during the vesting period of the rights and at the date that they are exercised.

- On 29 April 2011 the Shareholders' Meeting approved the 2011 Stock Grant Plan reserved for the Chief Executive Officer and executives of the Company, the parent company and subsidiaries, for a maximum of 4,500,000 Units assignable during the year. The Stock Grant Plan involves the free assignment of Units, not transferable to third parties or other beneficiaries, each providing the right to assignment of one CIR share, with effect from the specified deadlines and subject to satisfaction of the conditions envisaged in the Plan. The Units will mature in tranches equal to 12.5% of the related total, each of which maturing quarterly from 30 April 2013 to 31 January 2015. The shares assigned in execution of the Plan will be made available only from treasury shares held by the Company.

A total of 1,377,800 time units were assigned in the year 2011, whose maturity is subject to continued service, and 1,921,600 performance units, which mature provided that the "normal market value" of the shares at each vesting date is at least equal to a certain percentage of the initial value indicated for each vesting date. The initial value of the performance units is € 1.6391.

- On 27 April 2012 the Shareholders' Meeting approved the 2012 Stock Grant Plan reserved for the Chief Executive Officer and executives of the Company, the parent company and subsidiaries, for a maximum of 6,000,000 Units assignable during the year. The Stock Grant Plan involves the free assignment of Units, not transferable to third parties or other beneficiaries, each providing the right to assignment of one CIR share, with effect from the specified deadlines and subject to satisfaction of the conditions envisaged in the Plan. The Units will mature in tranches equal to 12.5% of the related total, each of which maturing quarterly from 30 April 2014 to 31 January 2016. The shares assigned in execution of the Plan will be made available only from treasury shares held by the Company.

A total of 2,305,047 time units were assigned during the year, whose maturity is subject to continued service, and 3,394,953 performance units, whose maturity is subject to the shares achieving certain stock market performance objectives linked to the FTSE Italia Mid Cap Index. The initial value of the performance units amounts is € 1.0263.

The notional cost of the Plans for the period was € 2,591 thousand, recognised under "Personnel costs" in the income statement.

SOGEFI

Sogefi S.p.A. implements incentive plans based on Sogefi S.p.A. shares reserved for the Chief Executive Officer of the Company and for executives of the Company and its subsidiaries who hold strategic positions in the Group, with the aim of rewarding their loyalty to the Group and giving them an incentive to increase their commitment to improving company performance and creating long-term value.

The incentive plans based on Sogefi S.p.A. shares are approved in advance by the Shareholders' Meeting.

Except for those indicated under "Stock grant plans, stock option plans and phantom stock option plans" below, the Group has not entered into any other transaction that envisages the purchase of goods or services using share-based payments or payments based on any other equity instrument, so it is not necessary to provide the fair value of such goods or services.

According to IFRS 2, only plans assigned after 7 November 2002 should be taken into consideration (note that the Company does not have any plans outstanding from before that date), so in addition to the plan issued in 2012, the ones issued from 2004 to 2011, the main characteristics of which are shown below.

Stock Grant Plans

The Stock Grant Plans involve the assignment free of charge of Units, not transferable to third parties or other beneficiaries, each of which offering the right of assignment free of charge of one Sogefi S.p.A. share. The Plan envisages two classes of rights: time-based units, which vest subject to the passing of a certain period of time, and performance units, which vest subject to the passing of a certain period of time and the achievement of certain objectives in terms of the "normal market value" of the stock (determined according to Art. 9, paragraph 4.a of the Consolidated Income Tax Act) as established in the Plan Regulations.

The regulation envisages a minimum holding of the shares covered by the Plan.

Shares assigned in implementation of the Plans will be made available exclusively from treasury shares held by Sogefi S.p.A. The regulation states that an essential condition for assignment of the shares is continued service or directorship with the company or its subsidiaries during the vesting period of the rights.

On 19 April 2012, at the end of the Shareholders' Meeting that approved the 2012 Stock Grant Plan for a maximum of 1,600,000 units, the Board of Directors implemented the 2012 Stock Grant Plan reserved for the Chief Executive Officer and executives of Sogefi S.p.A. and its subsidiaries by assigning them a total of 1,152,436 units (of which 480,011 time-based units and 672,425 performance units).

The time-based units will mature in quarterly tranches, i.e. 12.5% of the related total, from 20 April 2014 to 31 January 2016.

The performance units will mature on the same maturity dates envisaged for the time-based units, but only on condition that the normal market value of the shares of Sogefi S.p.A. at each vesting date exceeds the increase in the Sector Index (as defined in the Regulations) as of the same date.

The fair value of rights assigned in 2012, calculated at the time of assignment in accordance with the Cox Ross Rubinstein binomial option pricing model for American options, totalled € 2,153 thousand.

The input data used for the evaluation of stock grants are summarised below:

- curve of EUR/GBP/SEK/CHF risk-free interest rates on 19 April 2012;
- prices of the underlying asset (i.e. the price of the Sogefi S.p.A. share on 19 April 2012, namely € 2.144) and of the securities in the benchmark basket, again posted on 19 April 2012;

- normal market prices of the Sogefi S.p.A. share and of the securities in the benchmark basket from 12 March 2012 to 19 April 2012, to calculate the threshold for the performance units of the stock grant;
- historical volatility at 260 days of the securities and exchange rates observed at 19 April 2012;
- zero dividend yield for evaluation of the stock grant.

The main characteristics of the stock grant plans approved in previous years and still outstanding are reported below:

2011 Stock Grant Plan for a maximum of 1,250,000 conditional rights, reserved for the Chief Executive Officer of the Company and executives of the Company and its subsidiaries, by assigning them a total of 757,500 units (of which 320,400 time-based units and 437,100 performance units).

The time-based units will mature in quarterly tranches, i.e. 12.5% of the related total, from 20 April 2013 to 20 January 2015.

The performance units will mature on the same maturity dates envisaged for the time-based units, but only on condition that the "normal market value" of the shares at each vesting date is at least equal to the percentage of the initial value laid down in the Regulations.

The notional cost of the plans for 2012 is € 1,130 thousand.

The following table shows the total number of existing rights with respect to the plans for the period 2011-2012:

	2012	2011
Not exercised/not exercisable at the start of the year	757,500	--
Assigned during the year	1,152,436	757,500
Cancelled during the year	(55,318)	--
Exercised during the year	--	--
Not exercised/not exercisable at the end of the year	1,854,618	757,500
Exercisable at the end of the year	--	--

Stock Option Plans

The stock option plans offer beneficiaries the right to exercise an option to subscribe to a new issue of Sogefi shares at a given price and within a predefined period of time. The Regulations also say that an essential condition for assignment of the shares is continued service or directorship with the company or its subsidiaries during the vesting period of the rights.

The main characteristics of the stock option plans approved in previous years and still outstanding are as follows:

- Stock Option Plan 2004 reserved for employees of Sogefi S.p.A. and its subsidiaries for a maximum of 1,880,000 ordinary shares (1.61% of the share capital at 31 December 2012) at Euro 2.64 each, exercisable every four months from 30 September 2004 to 30 September 2014;
- Stock Option Plan 2005 reserved for employees of Sogefi S.p.A. and its subsidiaries for a maximum of 1,930,000 shares (1.65% of share capital at 31 December 2012) with a strike price of Euro 3.87, exercisable from 30 September 2005 to 30 September 2015;
- Stock Option Plan 2006 reserved for employees of Sogefi S.p.A. and its subsidiaries for a maximum of 1,770,000 shares (1.52% of share capital at 31 December 2012) with a strike price of Euro 5.87, exercisable from 30 September 2006 to 30 September 2016;
- Stock Option Plan 2007 reserved for employees of the foreign subsidiaries of Sogefi S.p.A. for a maximum of 715,000 shares (0.61% of share capital at 31 December 2012) with a strike price of

Euro 6.96, exercisable from 30 September 2007 to 30 September 2017. On 22 April 2008, on the strength of powers assigned by the Shareholders' Meeting, the Board of Directors amended the strike price from Euro 6.96 to Euro 5.78 to take into account the extraordinary part of the dividend distributed by the Shareholders' Meeting held on that same date;

- Stock Option Plan 2008 reserved for employees of the foreign subsidiaries of Sogefi S.p.A. for a maximum of 875,000 shares (0.75% of share capital at 31 December 2012) with a strike price of Euro 2.1045, exercisable from 30 September 2008 to 30 September 2018;
- Stock Option Plan 2009 reserved for employees of Sogefi S.p.A. and its subsidiaries for a maximum of 2,335,000 shares (2% of share capital at 31 December 2012) with a strike price of Euro 1.0371, exercisable from 30 September 2009 to 30 September 2019;
- Extraordinary Stock Option Plan 2009 reserved for individuals who were already beneficiaries of Phantom Stock Option Plans 2007 and 2008, who are still employees of Sogefi S.p.A. or of its subsidiaries, provided they renounce the rights resulting from the above-mentioned phantom stock option plans, for a maximum of 1,015,000 shares (equal to 0.87% of the share capital at 31 December 2012), of which 475,000 (Tranche I options) with a strike price of Euro 5.9054, exercisable from 30 June 2009 to 30 September 2017 and 540,000 (Tranche II options) with a strike price of Euro 2.1045, exercisable from 30 June 2009 to 30 September 2018;
- Stock Option Plan 2010 reserved for the Chief Executive Officer and executives of Sogefi S.p.A. and its subsidiaries for a maximum of 2,440,000 shares (2.09% of the share capital at 31 December 2012) with a strike price of Euro 2.3012, exercisable between 30 September 2010 and 30 September 2020.

The notional cost of the plans for 2012 is € 103 thousand.

The following chart shows the total number of options outstanding and refers to the plans of the period 2004-2010 with their average strike price:

	2012		2011	
	<i>No. of options</i>	<i>Average strike price</i>	<i>No. of options</i>	<i>Average strike price</i>
Not exercised/not exercisable at the start of the year	7,767,400	3.02	8,244,400	2.99
Assigned during the year	--	--	--	--
Cancelled during the year	(498,600)	4.19	(249,000)	3.70
Exercised during the year	(90,400)	1.04	(228,000)	1.35
Not exercised/not exercisable at the end of the year	7,178,400	2.96	7,767,400	3.02
Exercisable at the end of the year	5,760,400	3.22	5,094,200	3.63

The line “Not exercised/not exercisable at the end of the year” refers to the total amount of the options net of those exercised or cancelled during the current or prior years.

The line “Exercisable at the end of the year” refers to the total amount of the options vested at the end of the year but not yet exercised.

The following chart shows the breakdown of the number of options exercisable at 31 December 2012:

No. of options outstanding and exercisable at 31 December 2011	5,094,200
Options vested during the year	1,375,000
Options exercised during the year	(618,400)
Options cancelled during the year	(90,400)
No. of options outstanding and exercisable at 31 December 2012	5,760,400

Phantom stock option plans

Phantom stock option plans, unlike traditional stock option plans, do not involve assignment of a right to subscribe or purchase a share, but involve paying the beneficiaries an extraordinary amount in cash of a variable nature equal to the difference between the value of the Sogefi share in the vesting period of the option and the value of the Sogefi share at the time the option is assigned.

In 2009, as explained in the paragraph “Stock option plans”, Sogefi S.p.A. gave the beneficiaries of Phantom Stock Option plans 2007 and 2008 the right to waive the options under these plans and to take part in the Extraordinary Stock Option Plan 2009.

The main characteristics of the plans currently outstanding are as follows:

- Phantom Stock Option Plan 2007 reserved for the Chief Executive Officer, executives and staff of Sogefi S.p.A., as well as executives of the Italian subsidiaries, for a maximum of 1,760,000 options with an initial assignment value of Euro 7.0854 adjusted in 2008 to Euro 5.9054, exercisable from 30 September 2007 to 30 September 2017. Following the subscription of the extraordinary stock option plan 2009, 475,000 options were waived;
- Phantom Stock Option Plan 2008 reserved for the Chief Executive Officer, executives and staff of Sogefi S.p.A., as well as executives of the Italian subsidiaries, for a maximum of 1,700,000 options with an assignment value of Euro 2.1045 exercisable from 30 September 2008 to 30 September 2018. Following the subscription of the extraordinary stock option plan 2009, 540,000 options were waived.

The following chart gives a breakdown of the number of phantom stock options at 31 December 2012:

	2012
Not exercised/not exercisable at the start of the year	1,830,000
Assigned during the year	..
Cancelled during the year	..
Exercised during the year	..
Not exercised/not exercisable at the end of the year	1,830,000
Exercisable at the end of the year	1,830,000

24. *LEGAL DISPUTES*

Certain Group companies have legal disputes pending, against which their Boards have set aside risk provisions for amounts that are considered appropriate, taking into account the opinion of their consultants regarding the likelihood that significant liabilities will actually occur.

In particular, the Rome Regional Tax Commission filed its judgment no. 64/9/12 on 18 May 2012, on its resumption, with regard to the investigations into 1991 IRPEG and ILOR; these investigations gave rise to the following main findings:

- the Tax Authorities challenged the tax benefits resulting from the reorganisation of the Editoriale L'Espresso Group that followed the break-up of the Mondadori Group (in particular, the benefits arising from the merger of Editoriale La Repubblica SpA with Cartiera di Ascoli SpA, which then adopted its name);
- they also challenged the benefits relating to transactions involving beneficial interests in shares with foreign entities, especially those relating to the tax credit on dividends and related withholding taxes, as well as the accrued interest.

As regards the beneficial interest in shares, the Group has been making provisions since 2008, considering that, according to the evolution of the related jurisprudence, the additional taxes assessed and related interest charged were to be considered a "probable risk" (the provisions did not only involve 1991, but also the next three tax years, for which the Tax Authorities challenged the same types of benefits), unlike the penalties for which the risk was considered "possible".

On the first matter, which only concerns 1991, the risk has always been considered "remote", in light of the technical evaluation of items in dispute and the outcome of the various levels of justice. Bear in mind that:

- the facts were first being evaluated by the criminal court for alleged tax fraud and the proceedings were concluded with a judgment of nonsuit by the GUP (the magistrate who presides over the preliminary hearing). This was definitively confirmed by the Court of Appeal on 9 December 1999, fully acquitting all of the directors and statutory auditors;
- the tax assessments of first and second instance were both favourable to the Group, in 1998 and 2000 respectively; subsequently, in 2007 the Supreme Court cancelled the judgment of second instance, referring it to the Regional Tax Commission, though it only decided on procedural matters without affecting the merits of the case in any way.

With this judgment, the Regional Tax Commission upheld the position of the Tax Authorities in relation to the most important item in dispute from an economic point of view, which concerned the corporate restructuring, whereas it dismissed the contestation concerning the beneficial interests. Re-evaluating the situation as of 31 December 2012, this judgment indicates a maximum amount at risk of € 357.3 million (of which additional taxes assessed of € 121.4 million, interest of € 114.4 million and penalties of € 121.4 million): this value comes from the fact that the Tax Authorities did not just deny the tax benefits (deemed not due) based on the higher values recorded on allocation of the "cancellation deficit" as part of the merger process, but - unexpectedly - demanded the immediate and full liability to taxation of this deficit as being devoid of any income value, treating it as though it were a capital gain that had been "realized".

On 27 June 2012 the Company filed an appeal against the judgment of second degree with the Supreme Court and on 28 June 2012 it applied to the Rome Regional Tax Commission for a suspension of the effects of the judgment pursuant to article 373 of the Code of Civil Procedure; the application has been accepted by the Rome Regional Tax Commission by order filed on 19 July 2012.

Being well aware of the fiscal and statutory legitimacy of the transactions being challenged by the Tax Authorities, also on the basis of technical evaluations obtained from independent professionals, the Group has confirmed its assessment of the degree of risk involved in the treatment of beneficial interests in shares as regards taxes and penalties (even if it has been successful on this point, for procedural reasons, before the Regional Tax Commission). However, as a result of the recent and established positions of the Supreme Court, the same level of risk has been extended to the penalties, and for the corporate restructuring operations, where the Group has been unsuccessful, the risk is described as merely "possible".

For matters relating to the beneficial interests in shares, up to 31 December 2011 the Group had set aside an amount of € 30.5 million (to cover the risks related to the amortisation of the cost incurred for the purchase of the beneficial interest, the tax credit on the dividends, the withholding taxes incurred and the related accrued interest), with reference to all four tax periods assessed. Following a recent ruling of the European Court of Justice, with a judgment dated 24 April 2012, the Supreme Court has declared extinct the lawsuit that saw the CIR Group opposed to the Tax Authorities in relation to the dispute about beneficial interests for the year 1992; as a result, no amount is due to the Tax Authorities for that purpose. The provision previously set aside in relation to 1992, € 7,970 thousand, was therefore released. As mentioned previously, following the recent judgments of the Supreme Court, the Group has decided to extend the degree of probable risk also to the penalties applied to the beneficial interest transactions, setting aside a provision of € 11,523 thousand, which, together with the amount of € 347 thousand to take account of accrued interest, results in a total risk provision at 31 December 2012 of € 34,178 thousand.

It should be remembered that on 9 July 2011, the Milan Court of Appeal pronounced on the civil case brought by CIR against Fininvest for compensation for damages resulting from bribery in the "Lodo Mondadori" case. The ruling sentenced Fininvest to pay CIR approximately € 540.1 million plus interest at the legal rate and costs from 3 October 2009, as compensation for the immediate and direct damage suffered. As a result of this sentence, on 26 July 2011 CIR received a total of around € 564.2 million from Fininvest, including legal costs and interest. Under international accounting standards (IAS 37), this amount will not have any impact on the Group's income statement until the appeal of last resort has been decided. On 3 November 2011, Fininvest informed CIR that it was appealing to the Supreme Court. CIR joined the proceedings of the Supreme Court by depositing its defence on 20 December 2011 and, to date, the case has been assigned to the Third Section of the Supreme Court.

25. CORPORATE ACQUISITIONS

As already explained in paragraph 2.d "Changes in the scope of consolidation", in November 2012 the KOS Group completed the acquisition of HTI Leeds Ltd and HTI Ireland Ltd, which hold important contracts for the management of the technology park at two leading hospitals: the St. James Institute of Oncology (Leeds) and Belfast City Hospital Cancer Centre (Belfast). The companies acquired were included in the consolidated financial statements on the date when the risks and benefits were transferred to the Group, which generally coincides with the acquisition date.

HTI Leeds Ltd and HTI Ireland Ltd have both been consolidated from 1 December 2012. Associated expenses relating to acquisitions have been recognised in the income statement for the period following the application of IFRS 3 (revised), i.e. from 1 January 2010.

Note that the cost of the business combination has to be allocated to the assets, liabilities and intangible assets not recorded in the financial statements of the acquired companies, within the limits of their fair value. Any residual balance after this allocation has to be recorded as goodwill.

Considering the complexity of this process, which involves assessments of the numerous and diversified assets and liabilities of the various units that make up the acquired companies, international accounting standards (IFRS 3) allow the final purchase price allocation to be made within twelve months from the date of acquisition. The KOS Group has made use of this possibility, provisionally recognising the following values in its consolidated financial statements at 31 December 2012:

Amounts in thousands of euro		31/12/2012
Fixed assets (*)	G	4

**CERTIFICATION OF THE CONSOLIDATED FINANCIAL STATEMENTS
IN ACCORDANCE WITH ART. 154 BIS OF D.LGS 58/98**

1. The undersigned Rodolfo De Benedetti, as Chief Executive Officer, and Giuseppe Gianoglio, as Officer responsible for the preparation of the accounting and corporate documents of CIR S.p.A., do hereby certify, taking into account even the terms of Art. 154-*bis*, paragraphs 3 and 4, of Legislative Decree no. 58 of 24 February 1998:
 - that the administrative and accounting procedures for the preparation of the Financial Statements during financial year 2012 were adequate in relation to the size and nature of the business and
 - that they were effectively applied.
2. On this subject no aspects emerged that needed to be notified.
3. It is also certified that the Consolidated Financial Statements:
 - were prepared in conformity with the international accounting standards recognized by the European Union according to the terms of Regulation (EC) No. 1606/2002 of the European Parliament and of the Council, of 19 July 2002;
 - correspond to the results of the books and the general ledger;
 - are suitable to give a true and fair representation of the equity, economic and financial position of the issuer and of all the companies included in the consolidation.

The Report on Operations includes a reliable analysis of performance and of the result of operations as well as the position of the issuer and of all the companies included in the consolidation, together with a description of the principal risks and uncertainties to which they are exposed.

Milan, 11 March 2013

Signed by
Rodolfo De Benedetti
Chief Executive Officer

1. *STRUCTURE OF THE FINANCIAL STATEMENTS AND ACCOUNTING PRINCIPLES APPLIED*

These financial statements, which represent the separate financial statements of the Parent Company CIR S.p.A., have been prepared in accordance with international accounting standards (IAS/IFRS) published by the International Accounting Standards Board ("IASB") and endorsed by the European Union, together with all the measures issued in implementation of Art. 9 of D. Lgs. no. 38/2005, including all the interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"), previously known as the Standing Interpretations Committee ("SIC").

The financial statements are based on the principle of historical cost, modified as required for the measurement of certain financial instruments, in compliance with the accrual basis of accounting and the going concern assumption. In spite of the difficult economic and financial context, the Company has established that there are no significant uncertainties regarding going concern, as defined in paragraph 24 of IAS 1.

The presentation criteria adopted are as follows:

The statement of financial position is organised by matching items on the basis of current and non-current assets and liabilities;

The income statement is shown by type of expenditure;

The statement of comprehensive income shows the income items that are suspended in equity;

The statement of cash flows has been prepared using the indirect method;

The statement of changes in equity gives a breakdown of the changes that took place in the year and in the previous year.

These financial statements are expressed in euro as far as the actual statements are concerned, whereas the explanatory notes are expressed in thousands of euro. The euro is the functional and presentation currency of CIR S.p.A. according to the terms of IAS 21, except where stated otherwise.

Events which occurred after the reporting date

No important events took place after the end of the year which could have had a significant effect on the Company's financial position, equity or results.

See point 6 of the Report on Operations for an explanation of significant events that have taken place since the close of the year.

Publication of the financial statements was authorised by the Company's Board of Directors on 11 March 2013 (as required by paragraph 17 of IAS 10).

Below is a description of the accounting standards adopted in the preparation of these financial statements as of 31 December 2012 in relation to the main items of the statement of financial position and income statement.

1.a. Intangible assets (IAS 38)

Intangible assets are recognised only if they can be separately identified, if it is likely that they will generate future economic benefits and if the cost can be measured reliably.

Intangible assets with a finite useful life are valued at purchase or production cost, net of amortisation and accumulated impairment.

Intangible assets are initially recognised at purchase or production cost. Purchase cost is represented by the fair value of the means of payment used to purchase the asset and any additional direct cost incurred to prepare the asset for use. The purchase cost is the equivalent price in cash at the date of recognition; where payment is deferred beyond normal terms of credit, the difference compared with the cash price is recognised as interest for the whole period of deferment.

Amortisation is calculated on a straight-line basis over the expected useful life of the asset and starts when the asset is ready for use.

Intangible assets with *an indefinite useful life* are not amortised, but monitored constantly for impairment.

The carrying value of intangible assets is maintained to the extent that there is evidence that this value can be recovered through use; to this end, an impairment test is carried out at least once a year to check that the intangible asset is able to generate future cash flows.

Development costs are recognised as intangible assets when their cost can be measured reliably, when there is a reasonable assumption that the asset can be made available for use or for sale and that it is able to generate future benefits. Once a year or any time it appears to be justified, capitalised costs are impairment tested.

Research costs are charged to the income statement as and when they are incurred.

Trademarks and licences, which are initially recognised at cost, are subsequently accounted for net of amortisation and accumulated impairment. The period of amortisation is defined as the lower of the contractual duration for use of the licence and the useful life of the asset.

Software licences, including associated costs, are recognised at cost and are recorded net of amortisation and any accumulated impairment.

1.b. Tangible assets (IAS 16)

Tangible assets are measured at purchase price or at production cost and are recognised net of accumulated depreciation.

Cost includes associated expenses and any direct and indirect costs incurred at the time of acquisition and needed to make the asset ready for use.

Fixed assets are depreciated each year on a straight-line basis over the residual useful life of the assets.

Land, assets under construction and advance payments are not depreciated.

Land and buildings not used for corporate operating purposes are classified under a separate asset item and accounted for on the basis of IAS 40 "Investment property" (see paragraph 1.c. below).

In the event of circumstances that suggest that an asset has been impaired, its carrying value is checked against its recoverable value (i.e. fair value or value in use, whichever is the higher).

Fair value can be established on the basis of values expressed by an active market, recent transactions or the best information available at the time with a view to determining the potential proceeds of selling the asset.

Value in use is determined by discounting the cash flows expected from using the asset, applying best estimates of its residual useful life and a rate that takes into account the implicit risk of the specific business sectors in which the Company operates. This valuation is carried out for each individual asset or for the smallest identifiable cash generating unit (CGU).

If there is a negative difference between these values and the carrying value, the asset gets written down; if subsequently the reasons for the impairment no longer apply, the write-down is reversed. Write-downs and reversals are posted to the income statement.

1.c. Investment property (IAS 40)

Investment property is property (land or a building or part of a building or both) held (by the owner or by the lessee under a finance lease) to earn rentals or for capital appreciation or both, rather than for use in the production or supply of goods or services or for administrative purposes, or for sale in the ordinary course of business.

The cost of an investment property is represented by its purchase price, as well as any improvements, replacements and extraordinary maintenance. Under the cost method, the value is measured net of depreciation and any impairment losses.

On disposal or when the asset is permanently withdrawn from use, all related income and expenses must be charged to the income statement.

1.d. Impairment of assets (IAS 36)

At least once a year the Company verifies the recoverability of the carrying value of intangible assets, tangible assets and investments in subsidiaries and associates in order to determine whether these assets have suffered any impairment. If there is evidence of such a loss, the carrying value of the asset is reduced to its recoverable value.

The recoverable value of an asset is the higher of fair value less costs to sell and its value in use.

In detail, during impairment testing of the value of investments in subsidiaries and associates, since these are investments for which a market value (i.e. fair value less costs to sell) is in some cases unreliable, the recoverable value was defined as its value in use, i.e. the present value of estimated cash flows in relation to the expected results of investee companies and to the estimated value of a hypothetical ultimate disposal in line with IAS 28 (paragraph 33).

When at a later date the impairment ceases to exist or is reduced, the carrying value of the assets is reversed by up to the new estimated recoverable value, but cannot exceed the value which would have been determined if no impairment loss had been recognised. The reversal of an impairment loss is recognised immediately in the income statement.

1.e. Investments in subsidiaries and associates (IAS 27 and IAS 28)

Investments in subsidiaries and associates are recognised at cost adjusted for any impairment.

Any positive difference, arising on acquisition, between the acquisition cost and the acquirer's share of equity of the investee company at current values is therefore included in the carrying value of the investment.

Investments in subsidiaries and associates are tested for impairment every year, or more frequently if necessary. Where there is evidence of impairment of the investments, the impairment loss is recognised in the income statement as a write-down. In the event of the Company's share of the losses of the investee company exceeding the carrying value of the investment, and when the Company is liable or accepts liability, then the value of the investment is reduced to zero and the

Company's share of any further losses is recognised as a provision under liabilities. Should the impairment subsequently cease to exist or reduce, the value is reversed to the income statement up to the limit of its cost.

1.f. Other equity investments

Investments in other companies, classified as non-current financial assets which are not held for trading, are initially classified as available-for-sale financial assets and are recognised at fair value. Subsequently, gains and losses from changes in fair value as indicated in market prices are recognised directly to equity until the assets are sold or suffer impairment. When the asset is sold, all of the gains and losses previously recognised to equity are recognised to the income statement in that period.

When an asset is written down, the accumulated losses are included in the income statement. Investments in other minor companies, which do not have a market price, are recognised at cost which may be written down in the event of impairment. At each reporting date, the situation is checked for impairment and any write-down is recognised to the income statement. The write-down is reversed if the reasons for the impairment cease to apply.

1.g. Receivables and payables (IAS 32 and 39)

Receivables are recognised at amortised cost and measured at their estimated realisable value, whereas payables are recognised at amortised cost.

Receivables and payables in foreign currencies are initially accounted for at the rates of exchange in force on the transaction date. They are then adjusted to the period-end exchange rates and any exchange gains and losses are recognised to the income statement.

1.h. Securities (IAS 32 and 39)

In accordance with IAS 32 and IAS 39, investments in companies other than subsidiaries and associates are classified as available-for-sale financial assets and measured at fair value.

Gains and losses resulting from fair value adjustments are recorded in a special equity reserve. In the event of impairment losses or when the assets are sold, the gains and losses previously recognised to equity are transferred to the income statement.

Note that purchases and sales are recognised on the trade date.

This category also includes financial assets bought or issued and then classified either as held for trading or at fair value through profit and loss according to the fair value option.

For a more complete description of the treatment of financial instruments we would refer readers to the specific note on this subject.

1.i. Income taxes (IAS 12)

Current taxes are provided for on the basis of a realistic estimate of taxable income under current tax regulations, taking into account any exemptions that may apply.

Deferred taxes are calculated on the basis of any temporary differences (taxable or deductible) between the carrying values of assets and liabilities and their tax bases. They are classified as non-current assets and liabilities.

A deferred tax asset is recognised to the extent that taxable income will probably be available in the future to offset deductible temporary differences.

The carrying value of deferred tax assets is subject to periodic analysis and is reduced to the extent that it is no longer probable that there will be sufficient taxable income to take advantage of the deferred tax asset.

1.l. Cash and cash equivalents (IAS 32 and 39)

Cash comprises cash on hand and demand deposits. Cash equivalents are short-term, highly liquid investments that are readily convertible into cash and which have an insignificant risk of price changes.

1.m. Equity

Ordinary shares are recorded at their nominal value. Costs directly attributable to the issuance of new shares are deducted from equity reserves, net of any related tax benefit.

Treasury shares are shown separately as a deduction from reserves; any subsequent sale, reissuance or cancellation will not have any impact on the income statement, only on equity.

Unrealised gains and losses on financial assets classified as “available for sale” are recognised, net of tax, under equity in the fair value reserve. The reserve is reversed to the income statement when the financial asset is realised or when impairment is recognised.

“Retained earnings (losses)” include accumulated earnings and balances transferred from other reserves when these are released from any previous limitations. This item also shows the cumulative effect of changes in accounting standards and/or the correction of errors accounted for in accordance with IAS 8.

1.n. Borrowings (IAS 32 and 39)

Loans are initially recognised at cost, represented by their fair value net of any transaction costs incurred. Subsequently, borrowings are measured at amortised cost calculated by applying the effective interest rate method, taking into consideration any issuance costs incurred and any premium or discount applied at the time the instrument is settled.

1.o. Provisions for risks and losses (IAS 37)

Provisions for risks and losses refer to liabilities which are probable, but where the amount and/or maturity is uncertain. They are the result of past events which will cause a future cash outflow. Provisions are recognised exclusively in the presence of a current obligation to third parties, whether legal or implicit, which implies an outflow and when a reliable estimate of the amount involved can be made. The amount recognised as a provision is the best estimate of the disbursement required to settle the obligation as at the reporting date. The provisions recognised are reviewed at the close of each accounting period and adjusted to represent the best current estimate. Changes in the estimate are recognised to the income statement.

When the estimated outflow relating to the obligation is expected in a time horizon longer than normal payment terms and the discount factor is significant, the provision represents the present value, discounted at a nominal risk-free rate, of the expected future outflows to settle the obligation.

Contingent assets and liabilities (potential assets and liabilities, or those not recognised because no reliable estimate can be made) are not recognised. However, adequate disclosure on such items is provided.

1.p. Revenues and income (IAS 18)

Service revenues are recognised at the time the service is provided, based on its stage of completion at the reporting date.

Dividend and interest income are recognised as follows:

- dividends, in the year in which they are collected;
- interest, using the effective interest rate method (IAS 39).

1.q. Employee benefits (IAS 19)

Benefits to be paid to employees on termination of their employment and other long term benefits are subject to actuarial valuation.

Following this methodology, liabilities recognised represent the present value of the obligation adjusted for any actuarial gains or losses not accounted for.

Italian Financial Law no. 296/2006 made important changes to employee leaving indemnity (TFR) regulations, introducing the option for workers to transfer their indemnity maturing after 1 January 2007 to selected pension schemes.

Accounting standard IFRS 2 "Share-based payment" issued in February 2005 with validity as from 1 January 2005 requires in its transitional instructions that application should be retrospective in all cases where stock options were assigned after 7 November 2002 and where, as at its effective date, the vesting conditions of the plans had not yet matured.

In accordance with this standard, the Company now measures and recognises the notional cost of stock options to the income statement under personnel costs and apportions them throughout the vesting period of the benefit, with a balancing entry in the appropriate equity reserve.

The cost of the option is determined at the award date of the plan, applying special models and multiplying by the number of options exercisable over the reference period, assessed with the aid of appropriate actuarial variables.

Stock Grant Plans

The 2012 Stock Grant Plan involves the assignment free of charge of Units, not transferable to third parties or other beneficiaries, each of which offering the right of assignment of one CIR S.p.A. share. The Plan envisages two classes of rights: time-based units, which vest subject to the passing of a certain period of time, and performance units, which vest subject to the passing of a certain period of time and the achievement of certain objectives in terms of the "normal market value" of the stock (determined according to Art. 9, paragraph 4.a of the Consolidated Income Tax Act) as established in the Plan Regulations.

The regulation envisages a minimum holding of the shares covered by the Plan.

Shares assigned in implementation of the 2012 Plan will be made available exclusively from treasury shares held by CIR S.p.A. The regulation states that an essential condition for assignment of the shares is continued service or directorship with the Company or its subsidiaries during the vesting period of the rights and at the date that they are exercised.

On 27 April 2012, at the end of the Shareholders' Meeting that approved the 2012 Stock Grant Plan for a maximum of 6,000,000 units, the Board of Directors implemented the 2012 Stock Grant Plan reserved for executives and/or directors of the Company, the parent company and subsidiaries by assigning a total of 5,700,000 units (of which 2,305,047 time-based units and 3,394,953 performance units).

The time-based units will mature in quarterly tranches, i.e. 12.5% of the related total, from 30 April 2014 to 31 January 2016.

The performance units will mature on the same maturity dates envisaged for the time-based units, providing the shares achieve certain stock market performance objectives linked to the FTSE Italia Mid Cap Index. The initial value of the performance units amounts to € 1.0263.

The fair value of rights assigned in 2012, calculated at the time of assignment in accordance with the Cox Ross Rubinstein binomial option pricing model for American options, totalled € 4,870 thousand. The notional cost of the 2012 Plan for the period was € 1,145 thousand, recognised under “Personnel costs” in the income statement.

1.r. Derivatives (IAS 32 and 39)

Derivatives are measured at fair value. Non-hedging derivatives are classified as financial instruments at fair value through profit and loss (FVTPL). Classification of a derivative as a hedge has to be formally documented, stating the effectiveness of the hedge.

For accounting purposes hedging transactions can be classified as:

- *fair value hedges* – where the effects of the hedge are recognised to the income statement;
- *cash flow hedges* – where the fair value change of the effective portion of the hedge is recognised directly to equity, while the non-effective part is recognised to the income statement;
- *hedges of a net investment in a foreign operation* – where the fair value change of the effective portion of the hedge is recognised directly to equity, while the non-effective part is recognised to the income statement.

Specifically, for instruments classified as cash flow hedges (interest rate swaps), gains and losses from marking them to market are recognised directly to equity for the part which “effectively” hedges the underlying risk, while any “non-effective” part is recognised to the income statement.

1.s. Foreign currency translation (IAS 21)

The Company’s functional currency is the euro and this is the currency in which its financial statements are prepared. Transactions carried out in foreign currencies are initially recognised at the exchange rate on the date of the transaction. At the reporting date monetary assets and liabilities denominated in foreign currencies are translated at the exchange rate prevailing on that date. Non-monetary items measured at historical cost in a foreign currency are translated using the exchange rate prevailing on the date of the transaction. Non-monetary items measured at fair value are translated using the exchange rate at the date on which the carrying values were measured.

1.t. Use of estimates

The preparation of financial statements and explanatory notes in accordance with IFRS requires management to make estimates and assumptions which affect the values of the assets and liabilities shown in them, as well as the disclosures made regarding contingent assets and liabilities as of the reporting date.

The estimates and assumptions used are based on experience and other factors considered relevant. The actual results could differ from these estimates. Estimates and assumptions are reviewed periodically and the effects of any changes are reflected in the income statement in the period in which the amendment is made if the review only affects that period, or in subsequent periods if the amendment affects both the current and future years.

The items mainly affected by this use of estimates are the valuation of subsidiaries and associates, deferred taxes, provisions for risks and losses and the fair value of financial instruments, stock options and stock grants.

See the notes on these specific items for further details.

1.u. Earnings per share (IAS 33)

Basic earnings per share are determined by dividing the net income attributable to ordinary shareholders by the weighted average number of ordinary shares in circulation during the period.

Diluted earnings per share are calculated by adjusting the weighted average number of ordinary shares in circulation to take into account the effect of all potential ordinary shares.

Adoption of new accounting standards, interpretations and amendments

See point 6 of the Notes to the Consolidated Financial Statements.

2. *FINANCIAL INSTRUMENTS*

Financial instruments take on a particular significance in CIR's economic and financial structure. For this reason, management felt that it would be useful to devote a special section to accounting standards IAS 32, IAS 39 and IFRS 7, to help readers understand better the financial issues involved.

According to IAS 32 financial instruments are classified into four categories:

- a) financial instruments measured at fair value through profit and loss (FVTPL) in application of the fair value option: either designated as such or held for trading;
- b) investments held to maturity (HTM);
- c) loans and receivables (L&R);
- d) available-for-sale financial assets (AFS).

Classification depends on the intended use of the financial instrument within the context of the Company's financial management and each involves a different type of measurement for accounting purposes. Financial transactions are recognised on the basis of their value date.

Financial instruments at fair value through profit and loss

Financial instruments are classified as such if they satisfy one of the following conditions:

- they are held for trading;
- they are designated as such under the fair value option, on the assumption that the fair value can be reliably determined.

Trading generally means frequent buying and selling with the aim of generating profit on short-term price fluctuations.

Derivatives are included in this category unless they are designated as hedge instruments.

The initial designation of financial instruments, other than derivatives and those held for trading, as instruments at fair value through profit and loss under the fair value option is limited to those that meet the following conditions:

- a) designation under the fair value option eliminates or significantly reduces an accounting mismatch;
- b) a group of financial assets, financial liabilities or both are managed and their performance is measured on a fair value basis in accordance with a documented investment risk strategy, and
- c) an instrument contains an embedded derivative which meets particular conditions.

The designation of an individual instrument to this category is final, it is made at the time of initial recognition and cannot be modified.

Investments held to maturity

This category includes non-derivative instruments with fixed or determinable payments and a fixed maturity, which the Company intends and is able to hold to maturity.

These instruments are measured at amortised cost and constitute an exception to the general principle of measurement at fair value.

Amortised cost is determined by applying the effective interest rate of the financial instrument, taking into account any discounts received or premiums paid at the time of purchase, and recognising them throughout the entire life of the instrument until its maturity.

Amortised cost represents the initial recognition value of a financial instrument, net of any capital repayments and any impairment, plus or minus cumulative differences between its initial value and its value at maturity calculated using the effective interest rate method.

The effective interest rate method is a way of calculating the financial charges to be assigned to a particular period.

The effective interest rate is the rate that gives a correct present value to expected future cash flows until maturity, so as to obtain the net present carrying value of the financial instrument.

If even only one instrument belonging to this category is sold before maturity, for a significant amount and where there is no special justification for its disposal, the so-called "tainting rule" gets applied: this requires that the whole portfolio of securities classified as Held To Maturity be reclassified and measured at fair value, after which this category cannot be used for the next two years.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and which are not held for trading.

The category includes trade receivables (and payables).

Measurement of these instruments, except for those classified as current assets or liabilities (within twelve months), is made by applying the amortised cost method, using the effective interest rate and taking into account any discounts received or premiums paid at the time of acquisition and recognising them throughout the entire life of the instrument until its maturity.

Available-for-sale financial assets

This is a "residual" category which includes non-derivative financial instruments that are designated as available for sale and not included in any of the previous categories.

Financial instruments held for trading are recognised at their fair value plus any transaction costs.

Gains and losses are recognised to a separate equity item until the financial instruments are sold or suffer impairment. In such cases, the gains and losses accrued to equity up to that point are released to the income statement.

Fair value is the price at which an asset can be traded or a liability settled between knowledgeable, willing parties in an arm's-length transaction.

In the case of securities listed on regulated markets, the fair value is the bid price at the close of trading on the last day of the reporting period.

Where no market prices are available, fair value is determined either on the basis of the fair value of a substantially similar financial instrument or by using appropriate financial techniques (e.g. discounted cash flow).

Investments in financial assets can only be derecognised (i.e. eliminated from the financial statements) when the contractual rights to receive their respective financial cash flows have expired or when the financial asset is transferred to third parties together with all associated risks and benefits.

3. *ACCOUNTING STANDARDS, CHANGES IN ACCOUNTING ESTIMATES AND ERRORS*

The criteria for making estimates and measurements are reviewed periodically, based on historical experience and other factors such as expectations of possible future events that are reasonably likely to take place.

If first-time application of a standard affects the current year or the previous one, the effect is shown by indicating the change caused by any transitional rules, the nature of the change, a description of the transitional rules, which may also affect future years, and the amount of any adjustments to years prior to those being presented.

If a voluntary change of a standard affects the current or previous year, the effect is shown by indicating the nature of the change, the reasons for adopting the new standard, and the amount of any adjustments to years prior to those being presented.

In the event of a new standard or interpretation issued but not yet in force, an indication is given of the fact, its potential impact, the name of the standard or interpretation, the date on which it will come into force and the date of its first-time application.

A change in accounting estimate involves giving an indication of the nature and impact of the change. Estimates are used mainly in the recognition of asset impairment, provisions for risks, employee benefits, taxes and other provisions and allowances. Estimates and assumptions are reviewed regularly and the effects of any such changes are reflected in the income statement.

Lastly, the treatment of accounting errors involves an indication of the nature of the error and the amount of the adjustments to be made at the beginning of the first reporting period after they were discovered.

IFRS 7 - Additional disclosures: it should be noted that this information is given only for the investments in other companies.

The increase in this item refers essentially to the increase in capital with share premium in the subsidiary Dry Products S.p.A., which took place in the second half of 2011. Dry Products S.p.A. is the company tasked with making investments in medium-term debt securities, primarily corporate bonds, in order to expand its scope of activities, which were previously limited substantially to structured securities and trading equities.

(*) 55.85% of voting rights

(**) 58.35% of voting rights

(***) Financial statements at 31 July 2012

As required by IFRS the investments were subjected to an impairment test to see whether there was objective evidence that their carrying value could not be fully recovered.

For the purposes of carrying out the impairment test for the separate financial statements, the individual investments held by CIR were divided into those that act as a holding company for their sector, which given the nature of the sub-group are not significant individually but are part of the impairment test of CGUs carried out at consolidated level, and the other investments.

Regarding the controlling interests in the sector holding companies, the impairment tests carried out at consolidated level did not result in the need for any value adjustments to the assets.

As for the other investments, the impairment tests did show that there was a need for value adjustments to a number of the investee companies, in particular Nexenti S.r.l. (€ 689 thousand), Nexenti Advisory S.r.l. (€ 593 thousand) and LLIS – Lake Lemman Int. School S.A. (for a total of € 1,430 thousand).

4.e. Other receivables

The balance at 31 December 2012 of € 320,045 thousand (€ 311,238 at 31 December 2011) refers for € 298,721 thousand (€ 299,883 thousand at 31 December 2011) to the loan made to the subsidiary CIR International S.A. The rate applied to this loan is 2.937% (12m Euribor + spread). Repayments were made during the year for € 10,000 thousand. This item includes the loan of € 11,300 thousand (€ 11,331 thousand at 31 December 2011) made to the subsidiary Nexenti S.r.l. The rate applied to this loan is 1.972% (3m Euribor + spread). It also includes the subscription of € 10,000 thousand Mandatory Redeemable Preferred Shares (MRPS) issued during the year by the subsidiary CIR International S.A.

4.f. Deferred taxes

The breakdown of "Deferred tax assets and liabilities" by type of temporary difference is as follows:

<i>(in thousands of euro)</i>	<i>31.12.2012</i>		<i>31.12.2011</i>	
	<i>Total temporary differences</i>	<i>Tax effect</i>	<i>Total temporary differences</i>	<i>Tax effect</i>
Deferred tax assets:				
Provisions for risks and other	18,532	5,096	3,924	1,079
Total deferred tax assets		5,096		1,079

The changes in "Deferred tax assets and liabilities" during the year were as follows:

<i>(in thousands of euro)</i>	<i>Balance at 31.12.2011</i>	<i>Use of deferred taxes from prior periods</i>	<i>Deferred taxes generated in the period</i>	<i>Balance at 31.12.2012</i>
Deferred tax assets:				
- income statement	1,079	(58)	4,075	5,096
- equity	--	--	--	--

There are no prior fiscal losses for which the Company has set aside deferred taxes.

5. CURRENT ASSETS

5.a. Other receivables

<i>(in thousands of euro)</i>	<i>31.12.2012</i>	<i>31.12.2011</i>
Tax receivables	28,163	2,643
Other receivables with related parties	9,730	22,582
Receivables - others	2,221	2,276
Total	40,114	27,501

The item "Other receivables with related parties" refers to the receivables with companies that took part in the tax consolidation (€ 7,390 thousand to companies of the Espresso group, € 1,711 thousand to companies of the KOS group, € 597 thousand to companies of the Sogefi group and € 32 thousand to Nexenti S.r.l.).

IFRS7 - Additional disclosures: note that the information required does not include the item "Tax receivables".

5.b. Financial receivables

The balance at 31 December 2012, € 186 thousand, includes € 102 thousand for the fair value measurement of forward sale contracts in foreign currency and € 84 thousand for the receivable with Cir Investimenti S.p.A. for the fair value measurement of forward purchase contracts in foreign currency.

5.c. Securities

The item "Securities" includes the following classes of securities:

<i>(in thousands of euro)</i>	<i>31.12.2012</i>	<i>31.12.2011</i>
Investment funds and similar funds	2,522	169,424
Total	2,522	169,424

The decrease in this item of € 166,902 thousand is due to a different strategy for investing cash, which mainly consisted of short-term bank deposits at 31 December 2012.

The measurement at fair value of the item "Securities" involved a positive adjustment to the income statement of € 3 thousand.

The following chart shows the breakdown of the item "Securities" and "Other financial assets" measured at fair value, determined whether with direct reference to prices quoted on an active market ("Level 1"), estimated using prices that can be inferred from market prices for similar assets or through valuation techniques for which all significant factors are inferred from data observable on the market ("Level 2") or from valuation techniques based mainly on input not observable on the market, which therefore involve estimates and assumptions being made by management ("Level 3"). The following chart shows the breakdown of the items "Securities" and "Other financial assets" measured at fair value:

2011

Financial statement items	<i>Level 1</i>	<i>Level 2</i>	<i>Level 3</i>	<i>Total recognised</i>
Securities – 5.c.				
(measured at fair value through profit and loss)				
- Investment funds and similar funds	169,424	--	--	169,424
Total securities	169,424	--	--	169,424

2012

Financial statement items	<i>Level 1</i>	<i>Level 2</i>	<i>Level 3</i>	<i>Total recognised</i>
Securities – 5.c.				
(measured at fair value through profit and loss)				
- Investment funds and similar funds	2,522	--	--	2,522
Total securities	2,522	--	--	2,522

5.d. Cash and cash equivalents

Cash and cash equivalents increased by € 153,555 thousand from € 137,289 thousand at 31 December 2011 to € 290,844 thousand at 31 December 2012. A breakdown of the changes is shown in the statement of cash flows.

6. *EQUITY*

6.a. *Share capital*

The share capital increased from € 396,665,733.50 at 31 December 2011 (made up of 793,331,467 shares with a nominal value of € 0.50 each) to € 396,670,233.50 (793,340,467 shares) at 31 December 2012 due to the issue of 9,000 shares resulting from the exercise of stock options.

At 31 December 2012 the Company held 49,989,000 treasury shares (6.30% of capital) for a value of € 108,340 thousand, the same as at 31 December 2011.

In application of IAS 32, treasury shares held by the Parent Company are deducted from total equity.

The share capital is fully subscribed and paid up. None of the shares are subject to any rights, privileges or limitations on the distribution of dividends, with the exception of treasury shares.

Note that for a period of five years from 30 April 2009 the Board of Directors was authorised to increase the share capital once or more by a maximum of € 500 million (nominal value) and for a further maximum of € 20 million (nominal value) in favour of employees of the Company, its subsidiaries and parent companies.

The Board of Directors also has the right for a period of five years from 30 April 2009 to issue, on one or more occasions, convertible bonds or bonds with warrants attached, up to an amount which shall not exceed the maximum limits laid down in current regulations at the time the resolution is adopted by the Board, taking into account the bonds in circulation at the date on which the issuance is approved.

6.b. Reserves

The breakdown of "Reserves" is as follows:

<i>(in thousands of euro)</i>	<i>Share premium reserve</i>	<i>Legal reserve</i>	<i>Statutory reserve</i>	<i>Reserve for treasury shares held</i>	<i>Reserve art. 6 Leg. Decree no. 38 of 28/02/2005</i>	<i>Fair value reserve</i>	<i>"FTA of IFRS"</i>	<i>Stock option and stock grant reserve</i>	<i>Reserve for future capital increases</i>	<i>Total reserves</i>
Balance at 31 December 2010	34,130	115,969	119	21,537	(74)	--	162,210	15,007	3	348,901
Capital increases	645	--	--	--	--	--	--	--	--	645
Unclaimed dividends as per Art. 23 of the Articles of Association	--	--	14	--	--	--	--	--	--	14
Adjustment for own share transactions	--	--	--	3,458	--	--	--	--	--	3,458
Notional cost of stock options credited	--	--	--	--	--	--	--	4,370	--	4,370
Movements between reserves	--	--	--	--	--	--	--	(1,072)	--	(1,072)
Balance at 31 December 2011	34,775	115,969	133	24,995	(74)	--	162,210	18,305	3	356,316
Capital increases	5	--	--	--	--	--	--	--	--	5
Unclaimed dividends as per Art. 23 of the Articles of Association	--	--	15	--	--	--	--	--	--	15
Adjustment for treasury share transactions	--	--	--	--	--	--	--	--	--	--
Notional cost of stock options credited	--	--	--	--	--	--	--	3,465	--	3,465
Movements between reserves	--	--	--	--	--	--	--	(24)	--	(24)
Balance at 31 December 2012	34,780	115,969	148	24,995	(74)	--	162,210	21,746	3	359,777

It should be remembered that on 27 April 2012 the Ordinary Shareholders' Meeting voted to cancel the previous resolution of 29 April 2011 to buy back own shares and to give a new authorisation for eighteen months from that date to buy back a maximum of 30,000,000 own shares for a nominal value of € 15,000,000, which shall not in any case exceed one fifth of the share capital of CIR and with a maximum outlay of € 50,000,000.

The "Stock option and stock grant reserve" refers to the notional value of the incentives assigned to employees and agreed after 7 November 2002.

6.c. Retained earnings (losses)

The changes in Retained earnings (losses) are shown in the "Statement of Changes in Equity".

INFORMATION AS PER ART. 2427 - 7 BIS - ITALIAN CIVIL CODE

The following chart gives a breakdown of equity items according to how they can be utilised:

(in thousands of euro)

	Amount at 31 December 2012	Possible uses	Amount available	Summary of uses made in the last three years (*)		
				To cover losses	For distribution of dividends	Other

TOTAL	930,942		534,346	(16,706)	(37,310)	(9,683)

Key = A: for capital increases; B: as loss cover; C: for distribution to shareholders

(*) The uses shown are those that led to a decrease in equity

7. NON-CURRENT LIABILITIES

7.a. Bonds

At 31 December 2012 the item "Bonds" had a balance of € 297,732 thousand, compared with € 297,562 thousand at 31 December 2011 and refers to the bond issued by the Company in December 2004 for a nominal € 300 million, maturing in 2024 and at a 5.75% fixed rate. Using the amortised cost method this bond was recognised by including the accrued interest for the period, deducting markdowns and issuance costs and including the fair value of the related hedging derivative settled in the first half of 2010. The effective interest rate is 5.87%. The bonds are listed on the Luxembourg Stock Exchange.

7.b. Personnel provisions

Changes in the "Employee Leaving Indemnity (TFR)" provision are shown in the following chart:

<i>(in thousands of euro)</i>	<i>31.12.2012</i>	<i>31.12.2011</i>
Opening balance	1,545	1,545
Amount accrued	267	310
Benefits paid	(360)	(310)
Total	1,452	1,545

8. CURRENT LIABILITIES

8.a. Borrowings

On 9 July 2011, the Milan Court of Appeal pronounced on the civil case brought by CIR against Fininvest for compensation for damages resulting from bribery in the "Lodo Mondadori" case. The ruling sentenced Fininvest to pay CIR approximately € 540.1 million plus interest at the legal rate and costs, as compensation for the immediate and direct damage suffered. As a result of this sentence, on 26 July 2011 CIR received a total of around € 564.2 million from Fininvest. As envisaged in international accounting standards (IAS 37), this amount has no effect on the Company's income statement until the final appeal has been decided. It has therefore been accounted for in this item.

8.b. Other payables

<i>(in thousands of euro)</i>	<i>31.12.2012</i>	<i>31.12.2011</i>
Tax payables	386	6,763
Payables - related parties	31,489	7,622
Payables - suppliers	405	451
Other payables	3,463	7,536
Total	35,743	22,372

The item "Payables - related parties" refers for € 31,481 to payables to companies which took part in the tax consolidation (€ 4,179 thousand to companies of the Sogefi group, € 577 thousand to companies of the Sorgenia group, € 23,537 thousand to companies of the Espresso group, € 2,994 thousand to companies of the KOS group, € 58 thousand to Nexenti Advisory S.p.A. and € 136 thousand to Nexenti S.r.l.) and for € 8 thousand to trade payables due to Nexenti Advisory S.p.A..

IFRS 7 - Additional disclosures: note that the information required refers to the items "Payables - related parties" and "Payables - suppliers".

8.c. Provisions for risks and losses

The breakdown of these provisions and the changes during the year are as follows:

<i>(in thousands of euro)</i>	<i>Balance at 31.12.2011</i>	<i>Provisions</i>	<i>Used</i>	<i>Balance at 31.12.2012</i>
Other	17,454	14,625	..	32,079
Total	17,454	14,625	..	32,079

There are various disputes outstanding for which CIR has set aside specific risk provisions for an amount deemed appropriate, in agreement with its legal counsel, to cover the likely emergence of significant potential liabilities.

The balance at 31 December 2012 also includes a prudent provision of € 18,056 thousand (€ 3,715 thousand at 31 December 2011) for legal interest on the payment received from Fininvest, calculated from the date of receipt, as reported under item 8.a. "Borrowings".

Income Statement

9. SUNDRY REVENUES AND INCOME

This item includes the following:

<i>(in thousands of euro)</i>	<i>2012</i>	<i>2011</i>
Services to subsidiaries	4,685	4,690
Services to parent company	384	378
Services to affiliated companies	--	20
Real estate income	200	262
Real estate income from subsidiaries	224	218
Real estate income from related parties	329	304
Other income and recovery of costs	327	210
Other non-recurring income	--	5
Total	6,149	6,087

Revenues from services provided to subsidiaries and affiliated companies are the chargeback of fees for strategic and management support and special administrative, financial and tax assistance provided to them. The services provided to the parent company were mainly of an administrative and financial nature.

Revenues from services to Group companies in 2012 can be broken down as follows:

<i>(in thousands of euro)</i>	<i>2012</i>	<i>2011</i>
COFIDE S.p.A.	384	378
Gruppo Editoriale L'Espresso S.p.A.	1,850	1,850
Sorgenia S.p.A.	850	850
Sogefi S.p.A.	1,820	1,820
KOS S.p.A.	150	150
Nexenti Advisory S.r.l.	15	20
Euvis S.p.A. (subsidiary)	--	20
Total	5,069	5,088

Revenues for real estate income from subsidiaries refers to KOS S.p.A..

The real estate income from related parties refers to lease contracts signed with individuals who hold strategic positions in the Company.

10. COSTS FOR SERVICES

This item can be broken down as follows:

	2012	2011
Administrative, tax, legal and corporate consulting	3,051	12,425
Services provided by the parent company COFIDE S.p.A.	1,074	1,110
Services provided by the subsidiary Cir Investimenti S.p.A. (ex Dry Products S.p.A.)	--	310
Fees to administrative bodies	1,557	1,575
Other expenses	1,955	2,154
Total	7,637	17,574

"Costs for services" decreased from the previous year, mainly as a result of lower expenses for legal consulting, which last year were primarily related to the civil proceedings brought by CIR against Fininvest ("Lodo Mondadori").

11. PERSONNEL COSTS

Personnel costs went down from € 9,201 thousand in 2011 to € 9,025 thousand in 2012 with a decrease of € 176 thousand. The item includes the notional cost of € 3,465 thousand (€ 4,369 thousand in 2011) of the valuation of the stock options and stock grants of the plans currently in issue, approved after 7 November 2002. This item includes € 38 thousand of costs relating to the personnel of Nexenti Advisory S.p.A. on secondment to CIR S.p.A..

The following chart shows the changes in the number of employees in the different categories during the year:

	31.12.2011	Recruitments	Resignations	31.12.2012	Average For the year
Executives	11	--	2	9	10
Managers and Office Staff	16	1	2	15	15
Total	27	1	4	24	25

12. OTHER OPERATING COSTS

<i>(in thousands of euro)</i>	2012	2011
Non-deductible VAT and other taxes	1,387	1,080
Other costs and contingent liabilities	1,266	1,346
Total	2,653	2,426

13. FINANCIAL INCOME

This item includes the following:

<i>(in thousands of euro)</i>	<i>2012</i>	<i>2011</i>
Interest income from securities	47	1,866
Interest income on deposits	5,901	745
Interest income from subsidiaries	9,129	7,735
Interest rate derivatives	53	50
Foreign exchange gains	--	189
Other interest income	33	22
Total	15,163	10,607

The breakdown of the interest income from subsidiaries is as follows:

<i>(in thousands of euro)</i>	<i>2012</i>	<i>2011</i>
CIR International S.A.	8,837	7,695
Nexenti S.r.l.	292	40
Total	9,129	7,735

14. FINANCIAL EXPENSE

This item includes the following:

<i>(in thousands of euro)</i>	<i>2012</i>	<i>2011</i>
Interest expense on bonds	17,399	17,387
Foreign exchange losses	1	120
Other interest expense and bank charges	14,767	3,889
Total	32,167	21,396

The item "Other interest expense and bank charges" refers mainly to the provision of € 14,341 thousand for interest expense (€ 3,715 thousand in 2011) reported under item 8.c. "Provisions for risks and losses".

15. DIVIDENDS

This item includes the following:

<i>(in thousands of euro)</i>	<i>2012</i>	<i>2011</i>
<i>Dividends from related parties:</i>		
Gruppo Editoriale l'Espresso S.p.A.	13,887	16,337
Sogefi S.p.A.	8,554	8,546
Cir investimenti S.p.A. (ex Dry Products S.p.A.)	6,337	4,399
Kos S.p.A.	2,371	..
Ciga Luxembourg S.à.r.l.	3,000	..
<i>Total dividends from related parties</i>	<i>34,149</i>	<i>29,282</i>
Dividends from other companies	35	25
Total dividends	34,184	29,307

16. GAINS FROM TRADING SECURITIES

These amounted to € 233 thousand (€ 898 thousand in 2011) and refer to investment fund trading and similar.

17. LOSSES FROM TRADING SECURITIES

These amounted to € 2,192 thousand in 2011 and referred to bond trading; the disposals made during the year did not result in any losses.

18. ADJUSTMENTS TO FINANCIAL ASSETS

This item includes the following:

<i>(in thousands of euro)</i>	<i>2012</i>	<i>2011</i>
Write-down of investments in subsidiaries	(2,097)	(1,328)
Write-down of investments in associates	(615)	..
Revaluation of investment funds and similar funds	3	85
Total	(2,709)	(1,243)

For details of the item "Write-down of investments in subsidiaries", please refer to item 4.d "2012 Equity investments".

19. INCOME TAXES

This item includes the following:

<i>(in thousands of euro)</i>	2012	2011
Current taxes	3,291	7,894
Deferred taxes	4,017	1,079
Income (charges) from participation in tax consolidation	(229)	(682)
Charge from previous years	29	--
Total	7,108	8,291

RECONCILIATION OF THE THEORETICAL AND EFFECTIVE TAX LIABILITY

	<i>Taxable income</i>	<i>Tax rate %</i>	<i>Amount of tax</i>
INCOME (LOSS) BEFORE TAXES	784	27.5	215
<i>Effect of increases (decreases) compared to ordinary tax rate</i>			
- Dividends	(32,574)	27.5	(8,958)
- Temporary differences deductible in subsequent periods	352	27.5	97
- Deductible temporary differences from prior periods	(419)	27.5	(115)
- Non-deductible costs	22,271	27.5	6,124
Other sundry permanent differences	--	27.5	--
SUB-TOTAL	(9,586)	27.5	(2,637)
Adjustments to taxable income for participation in national tax consolidation	(2,378)	27.5	(654)
Taxable income / Income tax for the year	(11,964)	27.5	(3,291)

Note: Because of its specific characteristics, IRAP has not been considered in this chart, as CIR does not have any taxable income for IRAP purposes at 31 December 2012. This chart therefore refers only to IRES.

20. EARNINGS PER SHARE

Basic earnings per share is calculated by dividing net income for the period attributable to the ordinary shareholders by the weighted average number of shares in circulation. Diluted earnings per share is calculated by dividing net income for the period attributable to the ordinary shareholders by the weighted average number of ordinary shares in circulation during the period, adjusted for the dilutive effect of outstanding options. Treasury shares are not included in the calculation.

The Company has only one category of potential ordinary shares, those deriving from stock option plans assigned to employees.

The dilutive effect that these ordinary shares to be issued or assigned to stock option plans will have on earnings per share is not significant.

In calculating the average number of options, the average fair value of the shares for each financial year was used. The average fair value of each CIR ordinary share in 2012 was € 0.9617 compared with an average fair value of € 1.5012 in 2011.

The following chart shows the information on the shares used to calculate basic and diluted earnings per share.

Basic earnings per share

	2012	2011
Net income attributable to the Shareholders (in euro)	7,891,685	269,144
Weighted average number of ordinary shares in circulation	743,349,992	747,242,075
Basic earnings per share (euro)	0.0106	0.0004

	2012	2011
Net income from the statement of comprehensive income attributable to the Shareholders (euro)	7,891,685	269,144
Weighted average number of ordinary shares in circulation	743,349,992	747,242,075
Basic earnings per share (euro)	0.0106	0.0004

Diluted earnings per share

	2012	2011
Net income attributable to the Shareholders (in euro)	7,891,685	269,144
Weighted average number of ordinary shares in circulation	743,349,992	747,242,075
Weighted average number of options	--	3,657,050
No. of shares that could have been issued at fair value	--	(2,695,771)
Adjusted weighted average number of shares in circulation	743,349,992	748,203,354
Diluted earnings per share (euro)	0.0106	0.0004

	2012	2011
Net income from the statement of comprehensive income attributable to the Shareholders (euro)	7,891,685	269,144
Weighted average number of ordinary shares in circulation	743,349,992	747,242,075
Weighted average number of options	--	3,657,050
No. of shares that could have been issued at fair value	--	(2,695,771)
Adjusted weighted average number of shares in circulation	743,349,992	748,203,354
Diluted earnings per share (euro)	0.0106	0.0004

21. GUARANTEES AND COMMITMENTS

For the incentive plans for directors and employees, CIR has a joint commitment with Verbund to buy back any shares of Sorgenia S.p.A. resulting from the exercise of options by employees who are beneficiaries of stock option plans outstanding as of 31 December 2012.

22. RELATED PARTY TRANSACTIONS

Information regarding the impact that related party transactions have on the financial and equity situation and on the result for the year are provided in the comment on the individual items of the financial statements.

Note that during 2012 the following amounts were accrued to the income statement in favour of:

- Boards of Directors € 4,047 thousand (including € 2.050 thousand as the notional cost of equity-based compensation);
- Boards of Statutory Auditors € 175 thousand;
- General Managers € 826 thousand (of which € 475 thousand relating to termination indemnities);
- Strategic executives € 332 thousand (including € 145 thousand as the notional cost of equity-based compensation).

For further details, please refer to the "Remuneration Report" available in the Governance section of the corporate website (www.cirgroup.it).

23. NET FINANCIAL POSITION

The net financial position, in accordance with Consob Resolution no. 6064293 of 28 July 2006, can be broken down as follows:

<i>(in thousands of euro)</i>	<i>31.12.2012</i>	<i>31.12.2011</i>
A. Cash and bank deposits	290,844	137,289
B. Other cash equivalents	--	--
C. Securities held for trading	2,522	169,424
D. Cash and cash equivalents (A) + (B) + (C)	293,366	306,713
E. Current financial receivables	186	186
F. Current bank payables	--	--
G. Current portion of non-current debt	(564,248)	(564,573)
H. Other current borrowings from related parties	--	--
I. Current financial debt (F) + (G) + (H)	(564,248)	(564,573)
J. Net current financial position (I) + (E) + (D)	(270,696)	(257,674)
K. Non-current bank payables	--	--
L. Bonds	(297,732)	(297,562)
M. Other non-current payables	--	--
N. Non-current financial debt (K) + (L) + (M)	(297,732)	(297,562)
O. Net financial position (J) + (N)	(568,428)	(555,236)

24. OTHER INFORMATION

IFRS7 – FINANCIAL RISK MANAGEMENT: ADDITIONAL DISCLOSURES

With regard to business risks, the main financial risks identified, monitored and actively managed by the Company are the following:

- a) interest rate risk resulting from exposure to fluctuations in interest rates;
- b) credit risk resulting from the potential default of a counterparty;
- c) liquidity risk resulting from a lack of financial resources to meet short term commitments.

Interest rate risk

Fluctuations in interest rates affect the market value of financial assets and the level of net financial expenses.

The Company continuously monitors its exposure to interest rate risk and manages this risk by investing in financial instruments that are consistent with its long term funding through the CIR 5.75% 2004/2024 bond.

Sensitivity analysis

A one percent parallel shift in the 3-month Euribor curve on floating rate assets would have the following effects:

<i>(in thousands of euro)</i>	<i>31.12.2012</i>		<i>31.12.2011</i>	
Change	-1%	+1%	-1%	+1%
Change in Income Statement	(1,087)	(1,087)	(850)	850
Change in Equity	(1,087)	(1,087)	(850)	850

Credit risk

Credit risk represents the Company's exposure to potential losses resulting from the failure of counterparties to meet their obligations. In relation in particular to financial counterparty risk resulting from the investment of liquidity and from derivative positions, counterparties are selected according to guidelines which set out the characteristics of the counterparties suitable for financial transactions. The list of possible counterparties includes both national and international companies with a high credit rating.

The Company has not encountered any cases of default by counterparties.

At 31 December 2012 there was no significant concentration of credit risk.

Measurement of financial assets and liabilities

The fair value of financial assets and liabilities is calculated as follows:

- the fair value of financial assets and liabilities with standard terms and conditions listed on an active market is measured on the basis of prices published on the active market;
- the fair value of other financial assets and liabilities (except for derivatives) is measured using commonly accepted valuation techniques based on analytical models using discounted cash flows, which as variables use prices observable in recent market transactions and broker listed prices for similar instruments.

Liquidity risk

Liquidity risk is the risk that financial resources may not be available or may be available only at a monetary cost. The Company's long term borrowings, represented by the bond issued in December 2004 for a nominal € 300 million with maturity in 2024, was given a rating of BBB- by Standard & Poor's. As things stand today, based on its cash and cash equivalents and expected future cash inflows, the Company believes that it will be able to meet its foreseeable financial needs. The objective of liquidity risk management is not only that of guaranteeing sufficient available financial resources to cover short term commitments, but also to ensure where necessary a sufficient level of operating flexibility for development programmes within the Group.

In compliance with the requirements of accounting standard IFRS 7, the following charts give information regarding the various categories of financial assets and liabilities and the risk categories of financial instruments.

STOCK OPTION AND STOCK GRANT PLANS

As required to be disclosed by Consob Resolution no. 11971 of 14 May 1999 and subsequent amendments and additions, CIR has stock option and stock grant plans for employees of the Group.

At 31 December 2012 stock option and stock grant plans issued from 2003 onwards were still valid for a total of 47,105,932 options, as can be seen from the chart in note 23 of the Notes to the Consolidated Financial Statements.

With reference to plans issued in the last three years, note that:

- On 30 April 2010 the Shareholders' Meeting voted to assign options to the Chief Executive Officer and executives of the Company, the parent company and the subsidiaries for the subscription of shares according to the terms and conditions set out in the Regulations of the "Stock Option Plan 2010", which were approved at the same time. The plan gives beneficiaries the right to exercise options at a set price and within a predefined time frame to subscribe a total of 7,790,000 newly issued shares, split into various tranches. The first tranche is of 3,895,000 options, the second of 3,895,000 options. The Regulations also stipulate that the essential condition for exercise of the options is that the assignee must still be employed by the Company, its parent company or a subsidiary as of the date of exercise of the options, except in cases of retirement, permanent invalidity or death. The subscription price was set at € 1.6208 per share for the first tranche options and at € 1.4982 per share for the second tranche options. The first tranche options can be exercised quarterly by each beneficiary from 30 September 2010 up to the final deadline of 30 September 2020, whereas the second tranche options can be exercised quarterly by each beneficiary from 28 February 2011 up to the final deadline of 28 February 2021.
- On 29 April 2011 the Shareholders' Meeting approved the 2011 Stock Grant Plan reserved for the Chief Executive Officer and executives of the Company, the parent company and subsidiaries, for a maximum of 4,500,000 Units assignable during the year. The Stock Grant Plan involves the free assignment of Units, not transferable to third parties or other beneficiaries, each providing the right to assignment of one CIR share, with effect from the specified deadlines and subject to satisfaction of the conditions envisaged in the Plan. The Units will mature in tranches equal to 12.5% of the related total, each of which maturing quarterly from 30 April 2013 to 31 January 2015. The shares assigned in execution of units the Plan will be made available only from treasury shares held by the Company.
A total of 1,377,800 time were assigned during the year, whose maturity is subject to continued service, and 1,921,600 performance units, which mature provided that the normal value of the shares at each vesting date is at least equal to a certain percentage of the initial value indicated for each vesting date. The initial value of the performance units is € 1.6391.
- On 27 April 2012 the Shareholders' Meeting approved the 2012 Stock Grant Plan reserved for the Chief Executive Officer and executives of the Company, the parent company and subsidiaries, for a maximum of 6,000,000 Units assignable during the year. The Stock Grant Plan involves the free assignment of Units, not transferable to third parties or other beneficiaries, each providing the right to assignment of one CIR share, with effect from the specified deadlines and subject to satisfaction of the conditions envisaged in the Plan. The Units will mature in tranches equal to 12.5% of the related total, each of which maturing quarterly from 30 April 2014 to 31 January 2016. The shares assigned in execution of the Plan will be made available only from treasury shares held by the Company.
A total of 2,305,047 time units were assigned during the year, whose maturity is subject to continued service, and 3,394,953 performance units, whose maturity is subject to the shares achieving certain stock market performance objectives linked to the FTSE Italia Mid Cap Index. The initial value of the performance units amounts is € 1.0263.

CERTIFICATION OF THE SEPARATE FINANCIAL STATEMENTS
IN ACCORDANCE WITH ART. 154 BIS OF D.LGS 58/98

1. The undersigned Rodolfo De Benedetti, as Chief Executive Officer, and Giuseppe Gianoglio, as Officer responsible for the preparation of the accounting and corporate documents of CIR S.p.A., do hereby certify, taking into account even the terms of Art. 154-*bis*, paragraphs 3 and 4, of Legislative Decree no. 58 of 24 February 1998:
 - that the administrative and accounting procedures for the preparation of the Statutory Financial Statements during financial 2012 were adequate in relation to the size and nature of the business and
 - that they were effectively applied.
2. On this subject no aspects emerged that needed to be notified.
3. It is also certified that the Statutory Financial Statements:
 - were prepared in conformity with the international accounting standards recognized by the European Union according to the terms of Regulation (EC) No. 1606/2002 of the European Parliament and of the Council, of 19 July 2002;
 - correspond to the results of the books and the general ledger;
 - are suitable to give a true and fair representation of the equity, economic and financial position of the issuer.

The Report on Operations includes a reliable analysis of performance and of the result of operations as well as the position of the issuer together with a description of the principal risks and uncertainties to which it is exposed.

Milan, 11 March 2013

Signed by
Rodolfo De Benedetti
Chief Executive Officer

REPORT OF THE BOARD OF STATUTORY AUDITORS

CIR S.p.A.

REPORT OF THE BOARD OF STATUTORY AUDITORS IN ACCORDANCE WITH ARTICLE 153 OF LEGISLATIVE DECREE NO. 58/1998

To the Shareholders of CIR S.p.A.

During the year ended 31 December 2012 we performed the surveillance activities required of us by law and by the articles of association, according to the Principles of Conduct for Statutory Auditors recommended by the National Council of Business Consultants and Accountants and the guidelines of the Code of Conduct issued by the Corporate Governance Committee of Borsa Italiana S.p.A. In preparing this report, we took into account of the above and of the recommendations made by Consob in its Communiqué no. 1025564 of 6 April 2001 and subsequent updates.

Considering the ways in which we carried out our duties during the year, we can hereby attest that:

- we attended all Meetings held during the year of the Shareholders, Board of Directors and, through our Chairman or one of the Auditors designated by him, the Internal Control Committee (now known as the Audit and Risk Committee). We obtained from the Directors full and timely information on the Company's results of operations and the outlook for the future, as well as on the more significant transactions from an economic and financial point of view entered into by the Company and its subsidiaries, in accordance with the law and the articles of association. We also examined the minutes of meetings of the Compensation Committee and the Related Party Transactions Committee held during the year;
- we obtained the knowledge required to carry out our duties regarding compliance with the law and the articles of association, respect for the principles of sound administration and the adequacy of the Company's organisational structure through direct investigation, collecting data and information from the heads of department involved and from an exchange of key data and information with the

Executive responsible for the preparation of the company's financial statements and with Deloitte & Touche S.p.A., the firm of auditors appointed to carry out the legal audit of the annual and consolidated accounts;

- we monitored the effectiveness of the internal control system and the adequacy of the instructions given to subsidiaries, also in terms of art. 114, paragraph 2, of Legislative Decree no. 58/1998;
- we acquired adequate information from the supervisory bodies of the subsidiaries of CIR S.p.A. on certain issues identified in the performance of their duties and considered significant;
- we verified that the testing procedure set up to check whether any assets had suffered impairment were adequate from a methodological viewpoint, particularly with reference to the energy sector;
- we checked that the provisions of current law and regulations were being complied with in the preparation and format of the separate and consolidated financial statements, including all accompanying documents. We also verified that the reports on operations complied with current laws and regulations and that they were consistent with the resolutions of the Board of Directors;
- we carried out, pursuant to art. 19 of Legislative Decree no. 39/2010 as the Internal Control and Audit Committee, the supervisory activities envisaged in it with reference to: a) the process of financial disclosure; b) the effectiveness of the systems of internal control, internal audit and risk management; c) the legal audit of the annual and consolidated accounts; d) the independence of the firm carrying out the legal audit, Deloitte & Touche S.p.A., by means of direct investigation, obtaining information from the heads of department, and analysing the results of the work carried out by the auditors;
- we received the results of the auditors' quarterly checks that the accounts were being kept correctly;
- we received from Deloitte & Touche S.p.A. the Reports envisaged in arts. 14 and 19, paragraph 3, of Legislative Decree no. 39/2010;

- we received from the auditors, pursuant to art. 17, paragraph 9, letter a) of Legislative Decree no. 39/2010, the annual confirmation of their independence and the disclosure of non-audit services provided to CIR S.p.A. by the auditors and any other entities belonging to its network;
- in accordance with art. 17, paragraph 9, letter b) of Legislative Decree no. 39/2010, we analysed the risks relating to the independence of the audit firm and the measures taken by it to limit such risks;
- we checked that the rules of corporate governance foreseen in the Code of Conduct for Listed Companies issued by Borsa Italiana were being put into practice by the Company. In this regard, we can confirm that we monitored the process of compliance by CIR and the CIR Group's corporate governance with the new provisions of the Code introduced in December 2011 and in force since 1 January of the current year, which were implemented in accordance with the terms and conditions prescribed;
- we checked that the maintenance of the Organisation, Management and Control Model pursuant to Legislative Decree no. 231/2001 and subsequent amendments is consistent, taking into account the new offences introduced by the regulations;
- pursuant to art. 4, paragraph 6 of the Regulations approved by Consob with resolution no. 17221 of 12 March 2010 and subsequent amendments, we supervised compliance with the procedure for transactions with related parties, approved by the Board of Directors of the Company on 28 October 2010;
- based on the declarations made by the individual directors and the opinions expressed by the Board as a whole, we noted that the criteria and procedures for the assessment of the independence of its members have been properly applied by the Board.

During the course of our surveillance activity, carried out as explained above, no significant facts emerged requiring notification to the Supervisory Bodies nor do we have any proposals to make regarding the financial statements, their approval or any other matters relating to our mandate.

* * *

The specific indications that this report has to provide are listed below, in accordance with Consob Communiqué no. 1025564 of 6 April 2001 and subsequent updates.

1. We obtained sufficient information on the more significant transactions from an economic and financial viewpoint entered into by CIR S.p.A. and its subsidiaries, checking that they were in accordance with the law and the articles of association; the Directors have made adequate disclosures about these transactions in the report on operations; we also obtained information and ensured that the transactions approved and/or put in place were not clearly imprudent, rash, in contrast with resolutions adopted or in potential conflict of interest or in any way such as to compromise the integrity of the Company's assets.

2. Adequate information was given to us regarding intercompany and related-party transactions. Based on the information gathered, we ascertained that these transactions complied with the law and with the articles of association, were in the interests of the Company and did not give rise to any doubts as to the correctness and completeness of the information given in the financial statements, the existence of situations of conflict of interest, the protection of the Company's assets and safeguarding minority shareholders; the periodic checks and controls carried out in the Company offices did not reveal that any atypical and/or unusual transactions had been carried out;

3. In the report on operations and the notes, the Directors have given adequate information on the main transactions entered into between CIR S.p.A., the companies belonging to the Group and/or related parties, stating that these transactions took place at "arm's-length" (i.e. normal market) conditions, also considering the quality and type of services provided; the transactions in question in favour of subsidiaries and associated companies, primarily related to the provision of administrative and financial services, the purchase and sale of financial assets and the granting of loans, whereas relations with the Parent Company consisted of providing administrative and financial services and making use of support services in connection with operations and

communications; in this regard, the documents accompanying the separate financial statements for 2012 give the appropriate balance sheet details and economic effects.

4. Today, Deloitte & Touche S.p.A. issued its audit reports as per Art. 14 of Legislative Decree no. 39/2010 on the separate and consolidated financial statements for the year ended 31 December 2012, including their opinion regarding their consistency as required by art. 14, paragraph 2, letter e) of Legislative Decree no. 39/2010 and art. 123-*bis*, paragraph 4, of Legislative Decree no. 58/1998, without any objections or highlighting any particular matters.

5. In 2012, we received a complaint pursuant to art. 2408 of the Civil Code, presented at the time of the Shareholders' Meeting called to approve the financial statements at 31 December 2011 and explained in the related minutes, concerning the methods and procedures for participating in the AGM as per art. 125-*bis*, paragraph 4, letter b), no. 1), of Legislative Decree no. 58/1998. After making the necessary investigations, we came to the conclusion that the complaint was unfounded.

6. No other complaints were received during the period.

7. - 8. In 2012, CIR S.p.A. appointed Deloitte & Touche S.p.A. to carry out non-audit services for fees totalling Euro 6,500 and other entities belonging to its network for fees totalling Euro 19,500. During the same year, the subsidiaries of CIR S.p.A. appointed Deloitte & Touche S.p.A. to carry out non-audit services involving: *i*) verification activities with a view to issuing certificates, for fees totalling Euro 197,000 and *ii*) other services, for fees totalling Euro 78,000. The subsidiaries of CIR S.p.A. also appointed entities belonging to the Deloitte network to perform other services for fees totalling Euro 585,000. These fees are appropriate for the size and complexity of the work performed and do not appear to be of such a size as to affect the independence and autonomy of the auditors in carrying out their audit functions.

9. During the year, we issued opinions in accordance with art. 2389 of the Civil Code; in January 2013, we also issued an opinion in connection with the appointment of the Executive responsible for the preparation of the company's financial statements pursuant to art. 154 -*bis*, paragraph 1 of Legislative Decree no. 58/1998.

10. During 2012, the Board of Directors met 8 times, the Internal Control Committee (now the Audit and Risk Committee) met 5 times, the Compensation Committee met twice and the Related Party Transactions Committee met once; the Board of Statutory Auditors met 9 times during the year.

11. - 12. We have no particular observations to make either concerning compliance with the principles of correct administration, because these appear to have been constantly observed, nor concerning the adequacy of the organisational structure, which we found to be suitable to meet the operating, managerial and control needs of the Company.

13. The system of internal control appeared to be adequate for the size and type of operations of the Company, as we also ascertained at meetings of the Internal Control Committee which, on the basis of the corporate governance rules adopted by CIR, are attended by the Chairman of the Board of Statutory Auditors (or another Auditor designated by him). Moreover, the Group Internal Audit Manager made sure that there was the necessary functional and information link regarding the way in which their institutional control duties were carried out and the outcome of the checks carried out, also by attending meetings of the Board of Statutory Auditors.

14. We have no observations to make regarding the adequacy of the administrative and accounting system or its reliability to represent operating events correctly. As regards the accounting information contained in the separate and consolidated financial statements at 31 December 2012, it has been certified without any exceptions by the Chief Executive Officer and by the Executive responsible for the preparation of the company's financial statements in accordance with art. 154-*bis*, paragraph 5 of Legislative Decree no. 58/1998 and art. 81-*ter* of Consob Regulation no. 11971 of 14 May 1999 and subsequent amendments and additions.

15. We have no observations to make regarding the adequacy of information flows from the subsidiaries to the Parent Company to ensure the timely fulfillment of communication obligations required by law.

16. During the regular exchanges of information and data between the Board of Statutory Auditors and the Independent Auditors, also in accordance with art. 150,

paragraph 3, of Legislative Decree no. 58/1998, no aspects emerged that need to be highlighted in this report.

17. The Company has substantially adhered to the recommendations contained in the Code of Conduct prepared by the Committee for the Corporate Governance of Listed Companies of Borsa Italiana S.p.A., and has illustrated its corporate governance model in the Report on this subject, also prepared in accordance with art. 123-*bis* of Legislative Decree no. 58/1998. To the extent of our responsibilities, we have monitored the way in which the rules of corporate governance required by the Code of Conduct adopted by the Company are actually being implemented, ensuring among other things that the Corporate Governance Report of CIR S.p.A. contained the results of the regular check that the Board of Statutory Auditors has the necessary requisites of independence, which are determined on the same basis as for Independent Directors. We also monitored the process of compliance with internal regulations and procedures for the implementation of the new provisions introduced by the update version of the Code, which came into force on 1 January 2013. In relation to the matters laid down in Legislative Decree no. 231/2001, the Company adopts and maintains an "Organisational Model" of behaviour and regulation of the activity, and its implementation is continuously monitored by the Supervisory Body as provided for by this regulation. The Company has also adopted a Code of Ethics.

18. Our surveillance activity was carried out on a routine basis during 2012 and did not reveal any omissions, facts that could be censured or any irregularities worthy of note.

19. On completion of the surveillance activity that we carried out during the year, we do not have any proposals to make as per art. 153, paragraph 2, of Legislative Decree no. 58/1998 regarding the separate financial statements of CIR S.p.A. at 31 December 2012, on their approval or on any other matter within our area of responsibility, just as we have no observations to make on the allocation of the net profit for the year proposed by the Board of Directors.

Milan, 5 April 2013

THE BOARD OF STATUTORY AUDITORS

Pietro Manzonetto – Chairman of the Board of Statutory Auditors

Riccardo Zingales – Statutory Auditor

Luigi Nani – Statutory Auditor

REPORT OF THE INDEPENDENT AUDITORS

AUDITORS' REPORT PURSUANT TO ART. 14 AND 16 OF LEGISLATIVE DECREE No. 39 OF JANUARY 27, 2010

To the Shareholders of CIR S.p.A.

1. We have audited the consolidated financial statements of CIR S.p.A. and subsidiaries (the "CIR Group"), which comprise the statement of financial position as of December 31, 2012, and the income statement, statement of comprehensive income, statement of changes in equity and cash flow statement for the year then ended, and the related explanatory notes. These consolidated financial statements prepared in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n. 38/2005 are the responsibility of the Company's Directors. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.
2. We conducted our audit in accordance with the Auditing Standards recommended by Consob, the Italian Commission for listed Companies and the Stock Exchange. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the Directors, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The consolidated financial statements present for comparative purposes prior year data. As explained in the notes to the consolidated financial statements, the Directors have reclassified certain comparative data related to the prior year's consolidated financial statements with respect to the data previously reported and audited by us, on which we issued auditors' reports dated April 4, 2012. These revisions to reclassifications of comparative data and related disclosures included in the notes to the consolidated financial statements have been audited by us for the purpose of expressing our opinion on the consolidated financial statements as of December 31, 2012.

3. In our opinion, the consolidated financial statements give a true and fair view of the financial position of CIR Group as of December 31, 2012, and of the results of its operations and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n. 38/2005.

4. The Directors of CIR S.p.A. are responsible for the preparation of the report on operations and the annual report on corporate governance, published in the section “Governance” of CIR S.p.A.’s website, in accordance with the applicable laws and regulations. Our responsibility is to express an opinion on the consistency of the report on operations and of the information reported in compliance with art. 123-bis of Italian Legislative Decree n. 58/1998, paragraph 1, letters c), d), f), l), m) and paragraph 2, letter b) in the annual report on corporate governance, with the consolidated financial statements, as required by law. For this purpose, we have performed the procedures required under Auditing Standard n. 001 issued by the Italian Accounting Profession (CNDCEC) and recommended by Consob. In our opinion, the report on operations and the information reported in compliance with art. 123-bis of Italian Legislative Decree n. 58/1998 paragraph 1, letters c), d), f), l), m) and paragraph 2, letter b) included in the annual report on corporate governance are consistent with the consolidated financial statements of CIR Group as of December 31, 2012.

AUDITORS' REPORT PURSUANT TO ART. 14 AND 16 OF LEGISLATIVE DECREE No. 39 OF JANUARY 27, 2010

To the Shareholders of CIR S.p.A.

1. We have audited the financial statements of CIR S.p.A., which comprise the statement of financial position as of December 31, 2012, and the income statement, statement of comprehensive income, statement of changes in equity and cash flow statement for the year then ended, and the related explanatory notes. These financial statements prepared in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n. 38/2005 are the responsibility of the Company's Directors. Our responsibility is to express an opinion on these financial statements based on our audit.
2. We conducted our audit in accordance with the Auditing Standards recommended by Consob, the Italian Commission for listed Companies and the Stock Exchange. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the Directors, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

For the opinion on the prior year's financial statements, whose data are presented for comparative purposes, reference should be made to our auditors' report issued on April 4, 2012.

3. In our opinion, the financial statements give a true and fair view of the financial position of CIR S.p.A. as of December 31, 2012, and of the results of its operations and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n. 38/2005.

4. The Directors of CIR S.p.A. are responsible for the preparation of the report on operations and the annual report on corporate governance, published in the section “Governance” of CIR S.p.A.’s website, in accordance with the applicable laws and regulations. Our responsibility is to express an opinion on the consistency of the report on operations and of the information reported in compliance with art. 123-bis of Italian Legislative Decree n. 58/1998, paragraph 1, letters c), d), f), l), m) and paragraph 2, letter b) in the annual report on corporate governance, with the financial statements, as required by law. For this purpose, we have performed the procedures required under Auditing Standard n. 001 issued by the Italian Accounting Profession (CNDCEC) and recommended by Consob. In our opinion, the report on operations and the information reported in compliance with art. 123-bis of Italian Legislative Decree n. 58/1998 paragraph 1, letters c), d), f), l), m) and paragraph 2, letter b) included in the annual report on corporate governance are consistent with the financial statements of CIR S.p.A. as of December 31, 2012.
